Addendum #005

Project No. R.119901.002

2020-12-11

The following changes in the tender documents are effective immediately. This addendum will form part of the Contract documents.

Questions from Bidders and Responses

Question 1: As [Name Redacted] spoke to you about today, the wording in the Bougie Creek project specifications for biotic soil media (BSM) include the wording of the ingredients “biochar, polysaccharide biopolymers, seaweed extract, humic acid, endomycorrhizae and thermally processed wood fibers”. See the attached specification for Proganics BSM which includes all the words mentioned above. These ingredients don’t relate to the performance of the product.

Verdyol biotic earth has completed all of the same HECF ASTM tests and meets the standards however, do not have all of the ingredients listed above as Verdyol is a Canadian peat moss based product not wood fibre based (see letter attached).

Please advise if Verdyol biotic earth is acceptable for use on the project since it meets all the HECF standards.

Response 1: Products used on this project must meet all requirements of the contract specification. There will be no change to the hydroseeding requirements of the contract specifications.

All other terms and conditions remain unchanged.
