This amendment 003 is raised to answer bidders questions, amend solicitation and Annex A pricing.

1. Question 1;

Does the Government of Canada have a model year requirement for the base vehicles or only that they are provided as new condition?

Answer:

No models manufactured before 2019

Question 2;

Could the Government of Canada please clarify if they would be willing to accept an alternative base vehicle trim level designation other than VX if that other vehicle could be supplied with the required luxury options desired by GAC. The leather power seats and rear-view camera that are required under this contract could be installed independently of the VX package. If this approach were deemed acceptable it would allow for substantial cost savings to the Government of Canada and would remove other hurdles for the vehicle modifiers such as disabling advanced highly integrated vehicle electronic systems, adjustable suspension packages (KDSS), and sunroofs.

Answer:

The base vehicle model must be a VX.

Question 3;

Due to COVID 19 and its global effects on international trade, travel, and logistics it is extremely difficult to estimate delivery costs that are several months into the future. Would the government of Canada consider implementing a policy that allows for costs to be adjusted on freight at the time of delivery as long as they are supported by multiple competitive invoices?

Answer:

Solicitation and Annex A Pricing are amended.

Question 4;

How will the final inspection at the factory be carried out when Covid travel restrictions have not been lifted?

Answer;

An inspection is required to meet Government of Canada financial policies. It is premature to answer on the conditions at the time of Milestone #1. Decisions will be made at that time.

Question 5;

The Supply Arrangement does not clearly specify what type of heavy-duty wheels are preferred/required. Can you let us know if heavy-duty steel rims or heavy-duty alloy wheels are required?

Answer;
heavy-duty alloy wheels are required?

Question 6;

The VX is a TLC 200 with a 5.7 liter petrol engine, but in the RFQ you are asking for a Diesel engine. Please clarify.

Answer;
We are asking for both engine types for the VX model.

Question 7;

In the event that the vehicles are ready for inspection by the TA and/or at delivery and the effects of COVID are still apparent how does the Technical Authority plan on signing off on Milestone Payment #1 and at delivery on milestone payment #2.

Answer;
An inspection is required to meet Government of Canada financial policies. It is premature to answer on the conditions at the time of Milestone #1. Decisions will be made at that time.

Question 8;

Since the base vehicles requested are very expensive will the TA consider making an amendment to payment Milestones by paying the Armorer for the base vehicles once they reach the armoring facility?

Answer NO

Question 9A;

In 6.20 Service at Delivery, since the vehicles will include a master battery switch system that will be approved at the final inspection, proper instructions will be included for the only remaining service required is the fire extinguisher connection, and the 5 vehicles are going to shipped immediately after the final inspection, can this clause be amended to read that the assembly and preparation will be done at the final inspection at the Plant and prior to vehicle shipment.

Answer; No

Question 9B;

In accordance with para 6.20 can the Service Representative be someone appointed at destination by the Armoring Manufacturer?

Answer; Yes

Question 10;

ANNEX A – PRICING – 5.12 – Option Description: Please confirm if a self-sealing fuel tank or steel covered fuel tank is required.

Answer; Both are required.

2. At Part 4, article 4.1.2 Mandatory Financial Evaluation Criteria

Delete:

4.1.2.1 Bidders must provide, with their bid, the financial information requested in the bid solicitation and at Annex A - Pricing for all items.

Insert:

4.1.2.1 Bidders must provide, with their bid, the financial information requested in the bid solicitation and at Annex A - Pricing for items 001, 002, 003, 004, and 005.

3. At Part 6, Article 6.5.1.2 Basis of Payment (BOP) type 2 – Transportation Cost

Delete:

The transportation cost from the Contractor's facility to the final destination, in Canadian dollars, and Applicable Taxes extra if applicable.

The price paid will be adjusted in accordance with the exchange rate fluctuation provision. (if applicable)

Insert:

6.5.1.2 Basis of Payment (BOP) type 2 – Transportation Cost

The actual shipping cost from the Contractor's facility to the final destination without any allowance for profit and/or administrative overhead, in Canadian dollars, Customs duty and excise tax excluded and Applicable Taxes extra if applicable.
