**PROJECT TITLE: Development of enabling space technologies**

The purpose of this amendment is to answer questions received.

**Questions and answers:****Question 1:**

The second bullet point of **Section 3A.5.2 Team Experience and Capability (Evaluation Criterion 2)** includes the statement "*To obtain the maximum score, it will be essential for the bidder to involve at least three Canadian organisations.*" Would you please confirm whether one or more of these organisations may include Canadian government agencies?

**Answer 1:**

Yes, one or more Canadian government agencies may be included.

This said, it should be noted that this statement was intended for PT 2, 3 and 4; and does not apply to PT 1, 5, 6 and 7. The current wording presents an inconsistency with the detailed benchmark statements found under section 4A.3.2 and is here corrected as follows: (for clarity sake, change is underlined below)

**Delete:**

Second bullet under Section 3A.5.2, p.30 of 47.

**Replace with:**

Identify the key members of the project's technical, scientific and management teams and state their specific roles, qualifications and experience for the work involved. (For PT 2, 3 and 4, to obtain the maximum score, it will be essential for the bidder to involve at least three Canadian organisations.) The Bidder should include an organization chart that illustrates the structure of the proposed project team. The Project Manager's track record in past projects should be detailed. Detailed resumes should be provided into an Appendix to Section I of the bid. Names of back-up personnel for key positions should also be included.

**Question 2:**

The second bullet point of **Section 3A.5.2 Team Experience and Capability (Evaluation Criterion 2)** includes the statement "*to obtain the maximum score, it will be essential for the bidder to involve at least one student to perform science, technical, engineering and/or mathematical (STEM) tasks.*" Would you please confirm whether bidders must identify specific students by name and CV at the time of bidding or would it be acceptable to present a team experience and capability description (and associated organization chart) that includes one or more student positions and identifies the associated tasks, responsibilities, and capabilities of those student positions?

**Answer 2:**

The bid does not have to identify students by name and CV at the time of bidding. Identifying positions, associated tasks, responsibilities and capabilities of this/those student position(s), would be sufficient to qualify for this aspect of this criterion.

---

**Question 3:**

Section **3A.5.3.6 Schedule** states that bidders should use a project start date of February 2021 in their proposals. Would you please confirm whether a milestone and associated invoice can be submitted within the 2020-21 fiscal year (i.e., on or before March 31, 2021) or must be delayed until the 2021-22 fiscal year?

**Answer 3:**

The proposed project plan, milestone delivery and schedule of payments are entirely up to the bidder, as long as it meets the constraints found under Appendix A-5 – Under the *Schedule and Milestones* Section of the relevant PT. A milestone and its associated payment may (but do not have to) be scheduled by March 31, 2021. Note that no payment can be associated to the kick-off meeting.

**For Priority Technology 5: SAR High Speed On-Board Processing**

**Question 1:**

In PT-5, both HSP-20 and HSP-21 include the statement "*(Other standard high speed interface are acceptable)*". Would you please confirm specifically what other high speed interfaces would be acceptable for this technology area?

**Answer 1:**

CSA will not provide an exhaustive list of acceptable interfaces. It is up to the bidder to select and propose an equivalent interface that suits its proposal and the SOW, if applicable, and support its claim in the context of its bid.

**ALL OTHER TERMS AND CONDITIONS OF THE RFP REMAIN UNCHANGED**
