## Amendment No. 2

### Breathing Air Compressor

**This amendment is being raised to answer bidder questions.**

Q1. For the installation of the unit what are the access details? Is a lift truck available?

A1. Yes, we can arrange for a forklift or other material handling equipment to help offload and move crates/equipment around the site. The site is accessed by road which leads to a thoroughfare parking lot. From the parking area, there is a large bay door leading to the specific location of the installation, through which can pass any material handling equipment.

Q2. What is the voltage and amp rating of supply power?

A2. The current set-up is 240V, 60A. Additional photos showing more detail than the originals for the electrical are also enclosed.

Q3. Please define disconnection of existing system - We are assuming the unserviceable equipment will be disconnected and moved to a different location within the same room, is this correct?

A3. Correct, the unserviceable equipment needs to be disconnected and moved aside, we will handle further disposal from there.
