SOLICITATION AMENDMENT MODIFICATION DE L'INVITATION

The referenced document is hereby revised; unless otherwise indicated, all other terms and conditions of the Solicitation remain the same.

Ce document est par la présente révisé; sauf indication contraire, les modalités de l'invitation demeurent les mêmes.

Title - Sujet Wireless Monitoring System Wireless Monitoring System (temperature & CO2 concentration)	
Solicitation No. - N° de l'invitation 39903-210584/A	Amendment No. - N° modif. 003
Client Reference No. - N° de référence du client 39903-210584	Date 2021-01-06
GETS Reference No. - N° de référence de SEAG PW-\$MTA-030-15973	
File No. - N° de dossier MTA-0-43204 (030)	CCC No./N° CCC - FMS No./N° VME
Solicitation Closes - L'invitation prend fin at - à 02:00 PM Eastern Standard Time EST on - le 2021-01-21 Heure Normale du l'Est HNE	
F.O.B. - F.A.B. Specified Herein - Précisé dans les présentes	
Plant-Usine: <input type="checkbox"/> Destination: <input type="checkbox"/> Other-Autre: <input checked="" type="checkbox"/>	
Address Enquiries to: - Adresser toutes questions à: Pommet, Bruno André	Buyer Id - Id de l'acheteur mta030
Telephone No. - N° de téléphone (514) 702-9582 ()	FAX No. - N° de FAX () -

AMENDMENT 003

This amendment is to publish a new series of Questions and Answers (Q&A) related to the Requirement.

Question 5: In reference with amendment 002 (Grid – Annex A2): when there are two numbers in red, does this mean two sensors are required because there are two chambers?

Answer 5: No. This means that the probe associated with this equipment must be calibrated at these two temperatures in red.

Question 6: In reference with amendment 002 (Grid – Annex A2), it says 'Calibration required' in the 2nd column. Does it mean the sensors must be calibrated in the equipment and not be pre-calibrated with a certificate?

Answer 6: No. This means the probe associated with this equipment must be pre-calibrated with a certificate. The probe must be calibrated by an ISO / IEC 17025 Standard accredited calibration provider.

Question 7: Ref Annex A - criteria 4.17 & 4.18

Question 7.1: Is the entire temperature range (-150 ° C and 65 ° C) to be covered by each and every individual probe?

Answer 7.1: No. The individual probes must only cover the temperatures of the associated equipment (see Annex A2 – Amendment 002). It is the set of all temperatures of all the equipment to be monitored which is in the range of -150 ° C to 65 ° C. Note: although no temperature of 65 ° C is indicated in the equipment list of Annex A2, the temperature range indicated in criterion 4.17 of the Annex A goes up to 65 ° C, in order to meet an occasional and future need.

Question 7.2: Can you clarify the purpose of Annex A2, posted as part of the amendment 002? Can you confirm the following?

- The probes are no longer required to cover the entire range (-150 ° C and 65 ° C). Instead, they need to comply with the values shown on Annex 2.
- The temperature accuracy requirement was amended from 0.1° C to 0.5° C.
- The CO2 accuracy requirement was amended from 0.1% to 1%.

Answer 7.2: The purpose of Annex A2 is to provide a detailed equipment list to be monitored with the exact quantity, type of equipment, the monitored measurement with its acceptable range, and its location (room number).

- The individual probes do not have to cover the entire range (-150°C and 65°C). The individual probes must only cover the temperatures of the associated equipment (see Annex A2). It is the set of all temperatures of all the equipment to be monitored which is in the range

of -150°C to 65°C. Note: although no temperature of 65 ° C is indicated in the equipment list of Annex A2, the temperature range indicated in 4.17 of the Annex A goes up to 65 ° C, in order to meet an occasional and future need.

- No. The temperature accuracy requirement of the probe is still 0.1° C. The range indicated in the list of equipment (see Annex A2) only shown the range of temperature or % CO2 allowed for each monitored measurement. The range is related to the monitored measurement, not to the precision of the probe.
- No. The CO2 accuracy requirement of the probe is still 0.1° C. The range indicated in the list of equipment (see Annex A2) only shown the range of temperature or % CO2 allowed for each monitored measurement. The range is related to the monitored measurement, not to the precision of the probe.

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.
