This is the first round of testing:
Here is the description of the sampling from Johanna:

SOIL SAMPLE photos:

The Old fuel tank photos show the site of tank and location of 5 samples. The samples were numbered clockwise starting at 1 on the far left side of picture and ending with 5 on the bottom right below the measure tape. A close up shows the location of samples 1-3. I also took a "grab" sample in a larger jar at a point near the house where tank pipe would have extended into house.

From the north side of the central shed I took two soil samples: one just in front of the willow shrub next to building and a second one at the location of cooler in the photo. I also took a larger jar sample near the cooler.
