## **AMENDMENT 006**

The purpose of this amendment is to answer a question from a supplier.

### **Question 21**

Please confirm that the closing date is still February 23, 2021.

### **Answer 21**

Yes, the closing date is February 23, 2021.

### **Question 22**

When we were suggested the MIL-DTL-43511D testing method it was for Abrasion testing and to measure the haze after abrasion. The RCMP has come back with MIL-DTL-43511D Eraser Test being acceptable however this is not an abrasion test but can be conducted if that's what the RCMP would like to accept to show lens coating quality a maximum delta for haze of 2% is all that's required for this test method. If the Eraser Test was referenced in error then please advise if MIL-DTL-43511D, Section 4.4.12, Bayer Abrasion Test Method would be acceptable to test for lens abrasion and please advise if a maximum delta of 25% haze will be accepted since this is a much higher standard than the ASTM Testing Methods.

### **Answer 22**

Answer 20, Amendment 5 contains an error and should read Bayer test instead of eraser test. Upon further comparison of the test methods, the Technical Authority will accept a maximum 25% haze after abrasion when using MIL-DTL-43511D Bayer test.

-In Annex B Purchase Description,

Table II, Requirement 3, Test Method Column

Delete:

OR

MIL-DTL-43511D eraser test

Insert:

OR

MIL-DTL-43511D Bayer test

Table II, Requirement 3, Requirement Column

Delete:

OR

MIL: No more than 20%

Insert:

OR

MIL: No more than 25%

-In the Annex C Evaluation Grid,

Table II, Requirement 3, Test Method Column

Delete:

OR

MIL-DTL-43511D eraser test

Insert:

OR

MIL-DTL-43511D Bayer test

Table II, Requirement 3, Requirement Column
