### **Amendment 003**

The following is hereby amended:

- A. Answer questions from bidders;

#### **A. QUESTIONS AND ANSWERS**

- Q1. We cannot find water level information on the plans. How should we interpret the demand for a minimum overhead clearance of 2.44m minimum without having the water level rise during the work period?
- A1. Precision: the water level of reach 4 is around 19.9 m during the navigation season and the lowest level of the Gauron and Lafleur bridges inside the navigation channel is 22.91 m and 22.62 m respectively. This information is provided for informational purposes and must be validated on the field.

**ALL OTHER TERMS & CONDITIONS REMAIN UNCHANGED**
