Amendment 005 is to post questions and answers.

Q1. There are multiple sets of requirements defined in two separate files (see table below):

SOURCE		REQUIREMENTS DEFINED
*ITEM 1	SOW (MS Word)	470
ITEM 2	EC ENG (Excel)	Mandatory Technical Criteria [Tab]
		Point Rated Criteria [Tab]

***Note – the majority of the “SOW (MS Word)” requirements are marked (M) – Mandatory requirement.**

Please clarify if the minimum mandatory requirements are identified in the document related to item 1 or 2 in the table above.

A1 - Transport Canada Response: For the purposes of the bid evaluation, only the mandatory and rated requirements in the Evaluation Criteria will be evaluated; however, the remaining mandatory requirements are contractual and therefore will be assessed at during the factory acceptance test, the ground acceptance test and flight acceptance tests.

Q2. Does the upgrade (or replacement) of the three (3) existing MSS6000 Maritime Integrated Surveillance Mission Systems (MISMS) have to only include the additional capability of incorporating the new high definition MX-15HD Camera system while retaining its existing capability or does it need to also have to meet all the same MISMS requirements as identified for the fourth NASP aircraft? In other words, do the four (4) MSIMS systems need to meet the same mandatory criteria?

A2 - Transport Canada Response: No, as defined in the Statement of work under section 5, OBJECTIVE AND SCOPE, Section 7 requirements only apply to the new MSIMS, the existing systems only require an update to incorporate the new high definition MX-15HD Camera system while retaining its existing capability. If changes are made to the live streaming video system in the new MSIMS then the system must also be deployed across the three legacy systems.

The Contractor must provide:

- In accordance with SOW s.7, a MSIMS for TC's Dash 8, Serial Number 17, that will integrate all the specified components and sensors.
- In accordance with SOW s.8, an upgrade to three existing mission systems (currently MSS6000) and four existing Ground Stations to support the full functionality and capabilities of newly acquired MX-15HD (GFE). Or, the Contractor may replace the three existing mission systems with the solution being provided under this Contract for Serial Number 17 to support the full functionality and capabilities of the newly acquired MX-15HD (GFE), provided that the new missions systems meet all the requirements set out in this SOW.
- A live streaming solution which is the same across to all four aircraft in accordance with sections 7.2.8.4.2.2 for Video Handling and 7.2.8.5.2 for Data Transmission.

All other terms and conditions remain unchanged.
