Amendment 003

This amendment is being raised to respond to questions received from Industry.

QUESTIONS AND ANSWERS:

1] Could we suggest a system based on requirements as opposed to specifications?

The purpose of this request for information (RFI) is to request feedback and recommendations regarding the requirements.

2] Is there is a suction lift requirement for this unit?

Yes. Approximately 3 meters.

3] Is the integrated temporary tank capacity of 55 gallons a specific requirement?

Yes. Note that the tank capacity is to create the required vacuum and temporary storage. The recovered product will be transferred into secondary storage as required.

4] Do you have a flow requirement for the liquid that you would like to achieve such as gallons per minute?

The recovery rate for this system will be generated by the CFM power of the unit.

5] Is the integrated temporary storage device removable for transfer and emptying, or is this a permanent part of the pump system?

The storage device must be removable for transfer and emptying.

6] Would an alternate power source be acceptable?

The requirement is for diesel engine due to operation on small craft, shorelines and in remote locations where electricity is not available.

ALL TERMS AND CONDITIONS REMAIN UNCHANGED
