Amendment 001 has been raised to modify the Request for Proposal (RFP) and publish all answers to questions received to-date.

**A. QUESTIONS AND ANSWERS**

- Q1.** **Point 1.2.1.** The requirement is asking for a camera to have a 4K CMOS image sensor, which is normally 8MP. But further states at least a standard 3MP camera, can you clarify which is the required specification?
- A1.** The requirement will be changed to remove the 4K specification.
- Q2.** **Point 1.3.1 & Point 1.3.2.** You will not see the difference between the UHD and HD on a 23" diagonal monitor, the pixels are too small. Would you prefer a 23" HD monitor, or pay extra for a larger UHD display?
- A2.** The requirement for the monitor will be changed to 27 inches.
- Q3.** **Point 1.5.1 & Point 1.5.2.** The microscope mentioned in Point 1.1.1 cannot take 3D image data, please explain 1.5.1 and 1.5.2. There is a lot of software that can do 2D and 3D image with no issue. However, the microscope mentioned in the scope of work for compatibility in Point 1.1.1, do not acquire 3D information. Do you really want to pay more for a software with these capabilities that you will not be able to use or will you accept a software that can do 2D calibrated measurements in X and Y?
- A3.** The camera must be compatible with existing microscopes as stated in 1.1.1. The camera must also have 2D and 3D capabilities to meet future requirements.

**B. RFP MODIFICATION**
