

**Supplier Questions and Answers #2 – 1000217976A**

Question 2:

Could you please provide the blueprints for this project?

Answer 2:

All work done through the resulting contract will be done via a Task Authorization. Upon the Project Authority issuing a Task Authorization for the work required, the contractor would then be provided all information needed to provide a quote. This includes a description of the deliverables and a schedule indicating the required completion dates. If blueprints are required in order for the contractor to prepare a quote, they will be provided at this time. No blueprints will be provided prior to contract award.
