Description of Work:

ISED has a requirement for one (1) Application Software Architect Level 3 and one (1) Technical Architect Level 3. As part of the Digital Government for Business program's vision to leverage modern digital and data technologies, create a seamless web and mobile experience, modernize our service delivery and make it easier for Business to access government programs and services, ISED has established the DTSS Program Delivery Centre of Excellence (CoE) under the Architecture Services Directorate to support, maintain, and onboard programs onto the Salesforce platform. This CoE will require ongoing growth of Salesforce Application development expertise and state of the art application development processes and techniques.

The Senior Application Software Architect and the Senior Technical Architect will support the Centre of Excellence in their Salesforce initiatives. Duties and deliverables may include but not be limited to the following:

Senior Application Software Architect

- Translate business requirements into an architected solution;
- Propose best approach to configure solution optimizing for performance and cost efficiencies;
- Produce documentation such as solution design documents, options analysis, configuration standards;
- Lead solution design sessions, architect and document solutions;
- Recommend industry best practices to technology and business stakeholders;
- Provide knowledge transfer and coaching to CoE team members through documentation and information; sessions including hands-on assistance to developers, business analysts, user interface designers, and other relevant team members; and
- Provide updates/status reporting to project team management as required.

Senior Technical Architect

- Produce documentation such as development standards, architecture design, gap analysis between current and desired end state;
- Mentor and coach development team to standard including code reviews;
- Complete options analysis/research for complex system integration with Salesforce and existing/potential business systems and provide recommendations;
- Provide technical input to ensure system wide consistency of design, and overall system scalability and maintainability;
- Review security requirements such as SSO (Single Sign-On) and data security, and provide strategies to implement the solution; and
- Provide updates/status reporting to project team management as required.

- Bidders must submit a bid for all resource categories
- The work is currently being performed by Lumina IT Inc.

Security Requirement: PWGSCS FILE # Common PS SRCL#4 applies
