Amendment 006 is to post a question and answer.

Question: Please confirm the radome space envelope available for the Maritime Surveillance Radar?

Answer: The installation and certification of the system is the responsibility of TC-ASD and not the contractor's responsibility. The contractor will work with TC-ASD to install the systems they specify in order to achieve final certification.

The contractor will specify the equipment and MSIMS integration requirements, TC-ASD will install and certify the installation on the aircraft. The position will be determined together to ensure the contractor meets the requirements specified in the SOW and TC-ASD can actually certify the installation without interference (structural, electrical or functional) with other systems or installations. This is the intent of the systems requirements review (SRR) process post contract award, which includes Preliminary Design Review and the lead up to Critical Design Review. TC-ASD retains the role of prime integrator.

All other terms and conditions remain unchanged.
