Amendment 007

This amendment is raised to update the time zone information indicated in the bid closing date and to publish questions and answers.

1. Update the time zone indicated in the Bid Closing date

Delete: 2021-03-16 14:00 Eastern Standard Time (EST)

Insert: 2021-03-16 14:00 Eastern Daylight Time (EDT)

2. Publish questions and answers

Question 47: In amendment 6 – response 44, you state that the TSOR does not require a specific viscosity for testing. Therefore, does the CCG accept a bid to be compliant if a capacity of 100 m³/hr is obtainable on a viscosity of the vendor's choosing meeting the requirements of F631-15 even if actual recovery capacity at 540,000 cSt is for example only 1 liter per minute providing it is at 90% efficiency?

Response 47: Yes, CCG will accept a lower recovery capacity at high viscosity, provided that the skimmer meets all the requirements in the TSOR. No specific viscosity is defined for requirement B.3.1, however the testing must still be performed in accordance with the stated ASTM tests, as per B.3.9.

All other terms and conditions remain unchanged
