This amendment 003 is raised to extend the closing date of the solicitation and to answer questions received from the industry as follows:

The closing date of the solicitation has been extended until March 12, 2021, 2pm EST

Q1: For chairs A1, A2, A4. Does the “In/Out” lumbar support adjustment need to be independent of the back angle adjustment?

A1: Yes, the “In/Out” lumbar support adjustment is required to be independent of the back angle adjustment.

Q2: For chairs A1, A2, A3, nd A4. Do the arm pads need to have a least 2” of width adjustability inward independent of the arm bracket adjustment?

A2: Armrests are defined in Annex A – Article 4.5 of the SA as a component of a chair intended to provide support to the occupant’s forearm. The lateral movement must affect the armrest; this movement can be achieved by the mechanism that supports the armrest (arm bracket) or by the armrest movement itself.

Please reference CAN/CGSB-44.232 Article 5.11.3.2 for the minimum inward movement which states “....of which at least 43mm (1.69 in.) shall be inward from the 493 mm (19.4 in.) clearance dimension.”

Q3: For chairs A1, A2, A4.

a. Can the backrest be upholstered but designed with airflow breathability?

b. Very few manufacturers carry 10 colours of mesh, would having 2 mesh colours be sufficient?

A3: a. No, backrests are to be mesh where specified.

b. No. We will accept a minimum of 5 mesh colour options to be provided, instead of 10.

All other Terms and Conditions remain unchanged.
