Questions and Answers

Question 2:

CAT1B Item 19, GoCUID is for 24"W but the description is for 36"W, please confirm.

Answer 2:

Item should be 36"W, revise to GoCUID: 1BCPSXXNXXL36XCLNNN. Revise to GL36 per matrix provided in response to Question 3 below. Refer to revised drawings and Table 1 issued as part of this amendment.

| | | | | |
|------|------------------------------|--|--------------------------------|----|
| GL36 | 36w x 12h Glass Panel Add-On | Panel mounted privacy screen add-on, framless, clear glazing | (line 645) 1bCPSXXNXXL36XCLNNN | 20 |
| GL42 | 42w x 12h Glass Panel Add-On | Panel mounted privacy screen add-on, framless, clear glazing | (line 648) 1bCPSXXNXXL42XCLNNN | 12 |

Question 3:

CAT1B Item 20, GoCUID is for 36"W but the description is for 42"W, please confirm.

Answer 3:

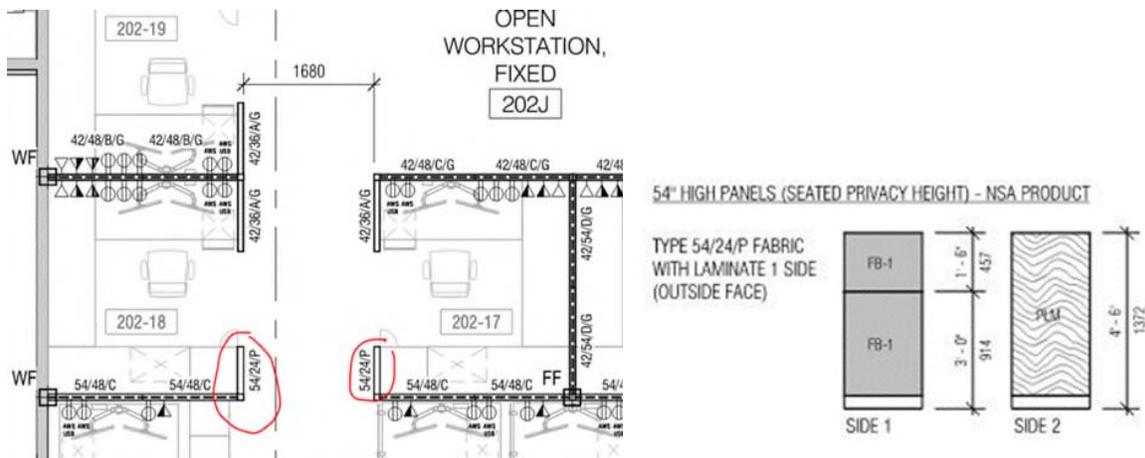

Item should be 42"W, revise to GoCUID: 1BCPSXXNXXL42XCLNNN. Revise to GL42 per matrix below. Refer to revised drawings and Table 1 issued as part of this amendment.

Question 4:

CAT1A NSA Line item 28, due to the panel builder configurations and stack-on modules it is not possible to have non-segmented tiles on one side only. Will the CA accept either a segmented laminate on the outside face or non-segmented fabric inside?

Answer 4:

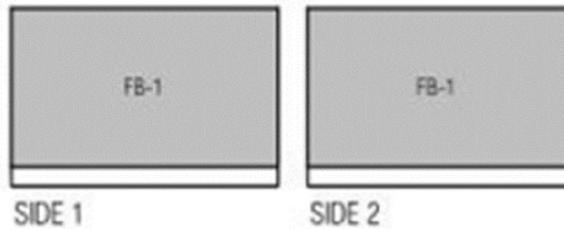

Non-segmented fabric inside is acceptable. Outside face must remain non-segmented laminate. Refer to images below for clarification. Refer to revised drawings and Table 1 issued as part of this amendment.

Question 5:

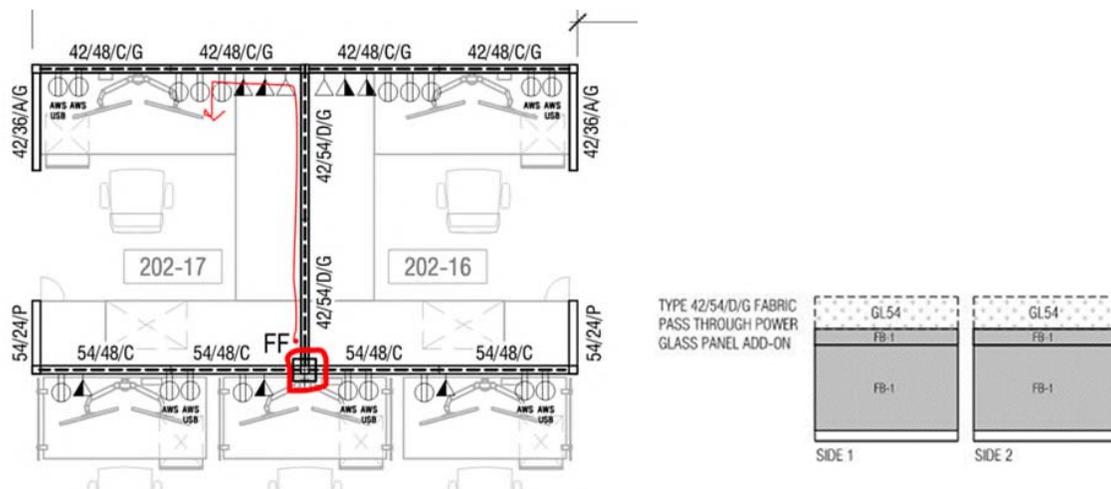

What exactly is meant by "pass through fabric"? Attached a snippet from the panel matrix where it asks for a "fabric pass through power". We would like a more detailed description on the pass through, is it for the fabric or for the power?

TYPE 36/53/D FABRIC
PASS THROUGH POWER

Answer 5:

PASS THROUGH POWER describes panels that will have wiring running through them, but will not provide power. All panels with "pass through power" function are labeled as TYPE D. For example, there is a floor feed located at the south-east corner of workstation 202-17, and in order to power the north panels, power will need to pass through the east panels. Refer to images below for clarification. Refer to revised drawings and Table 1 issued as part of this amendment.

Question 6:

Category 1B items 11 and 12: the GoCUIDSs provided are for freestanding worksurfaces, but the item description is for panel hung worksurfaces. Please clarify which is required and correct the GoCIOD or description via amendment.

Further to above, workstations 202-18,202-19, and 202-20 do not have panels behind one worksurface and these will have to be freestanding, please provide GoCUID if the answer for above is for panel hung surfaces.

Answer 6:

Refer to revised drawings and Table 1 issued as part of this amendment.

Question 7:

Electrical in panels - there is a discrepancy in number of receptacles required on plan vs. written descriptions. They are: Workstations: plan shows symbols for 5 duplex receptacles, but the written description is for 3 duplex per workstation.

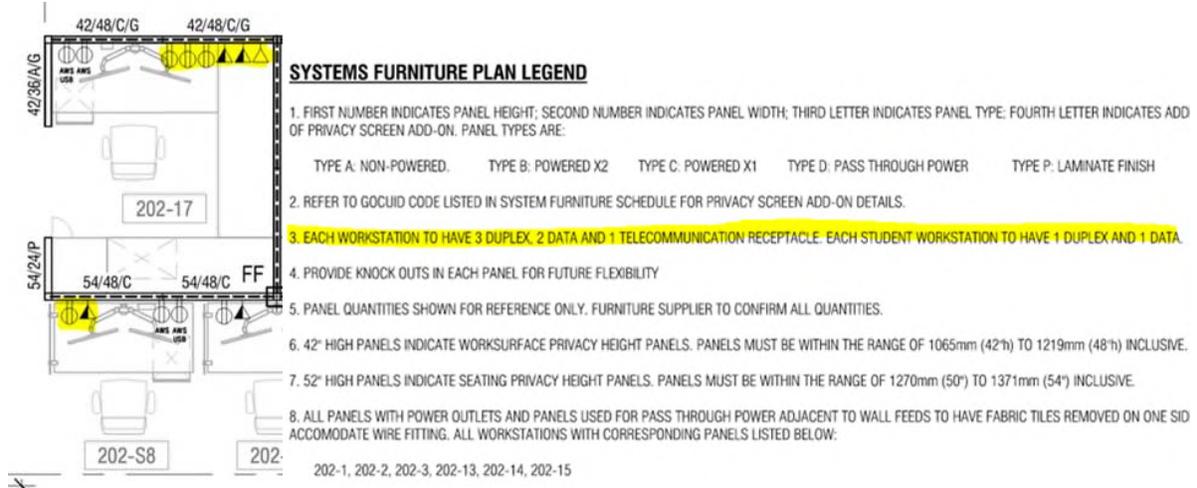

Student desks: plan shows symbols for 3 duplex receptacles, written description is for 1 duplex per desk

Please confirm the number of receptacles required. For your reference the SA specifications require:

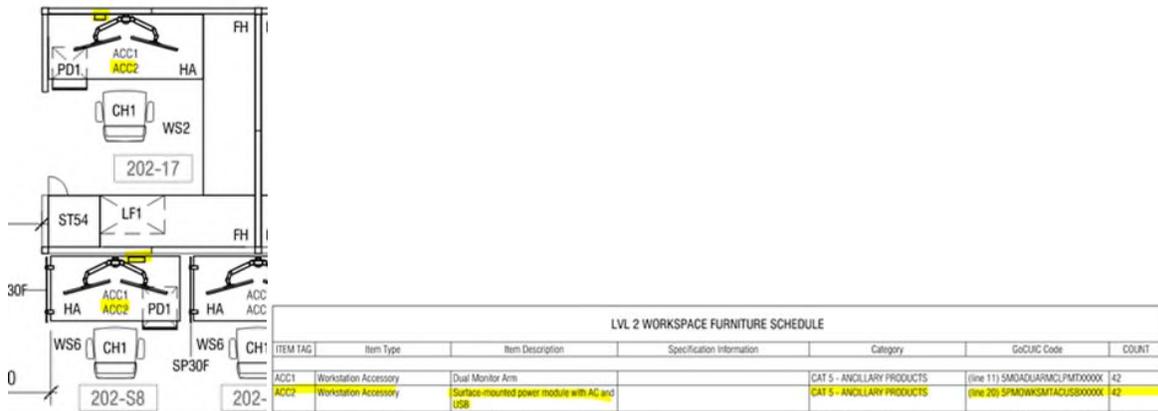

- ▶ .6 Each workstation must be provided with a maximum of six (6) face mounted power receptacles in combination of either three (3) duplex power outlets or two (2) triplex power outlets. Each workstation must have one (1) face mounted voice / data outlet.

Answer 7:

Workstations are to be provided with 3 duplex power outlets and 1 face mounted voice/data outlet that consists of: VOIP, GREEN (Data), ORANGE (Data). See below for further clarification.

In the images above, highlighted yellow are the power/data/voice provided from the panels. The 2 additional power symbols that are not highlighted come from ACC2, a workstation accessory (a surface-mounted power module with AC and USB). Note this is indicated in furniture plans (see plan and furniture schedule below for reference). Refer to revised drawings and Table 1 issued as part of this amendment.

Question 8:

NSA product requirement, Line 29 to 32 for work surface mounted acrylic screens: Please confirm the height of the screens required.

Answer 8:

Screen heights shall be 24". Refer to revised drawings and Table 1 issued as part of this amendment.

Question 9:

There are discrepancies in quantity for multiple items in the Cat 1b RFB table vs. items shown on the floor plan, please confirm which is to take precedence.

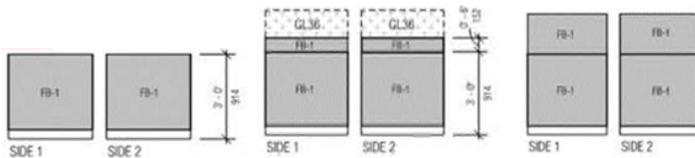

Answer 9:

Refer to revised drawings and Table 1 issued as part of this amendment.

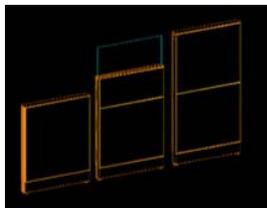

Question 10:

For the panel matrix, section FB-1 is requested at 6". Can the 6" be replaced with a 12" as long as we respect the overall height?

This is what is requested:

This is what we propose:

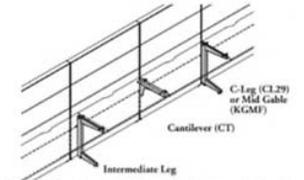

Answer 10:

Changing 6" segment to 12" is acceptable. There is no conflict with horizontal rail height and panel-mounted work surfaces because panel-mounted work surfaces are hung on vertical railing, not horizontal. See below image for reference.

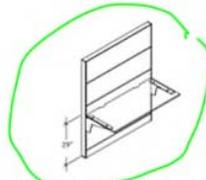

application guide

planning with supports – panel-mounted workspaces

The following rules should be considered when planning panel-mounted workspace supports.

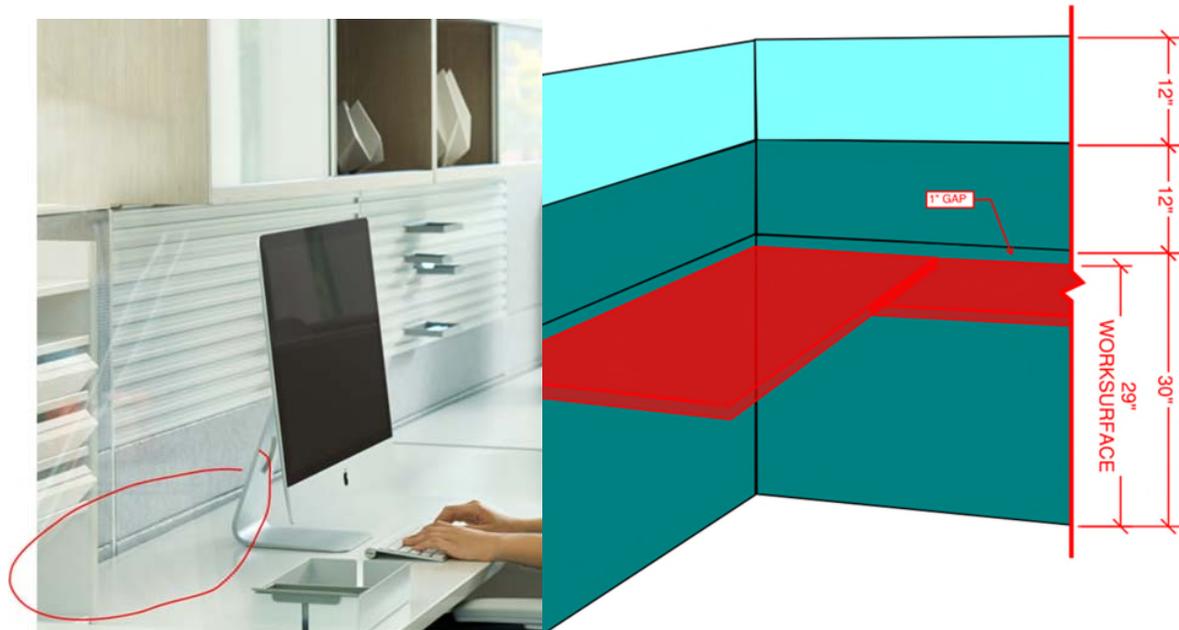

• All workspace supports must be on-module when suspended from the panel except for the Intermediate C-Leg (KCM) and Mid Gable (KGMF)

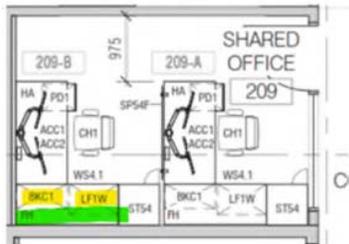

• All workspace supports allow for the workspace to be mounted at 29" above the finished floor. This height is considered to be the best height for stand work for a majority of people

For reference, the images below are additional studies to understand the way the change to a 12" panel will modify the look of workstations interior.

Question 11:

As we continue to work on our submission, we have discovered an issue of fit: In some of the private offices (the smaller ones), the return worksurface is 60"W, and the GoCUID is for a desk that is on Post Legs. A 30"W lateral file and a 30" bookcase have been requested under this surface. With Post Legs, you cannot fit 60" of storage under the 60" desk, as the post legs will obstruct the storage. The width of the storage needs to be decreased in these areas to clear the legs. Another possible solution is to request the storage pieces become the support, and the one piece worksurface just be installed on the top of the storage (eliminating the legs). Please advise clients' preferred solution via amendment with new GoCUIDs as required.

Answer 11:

Refer to revised drawings and Table 1 issued as part of this amendment.

All other Terms and Conditions remain unchanged.
