AMENDMENT 003

The purpose of this amendment is as follows:

- 1) Extend the closing date of the Tender Notice
- 2) Answer questions received
- 3) Amend the solicitation document

QUESTIONS / ANSWERS

- Q2. The intention is that the work surface (like the shelves) can be manually installed at varying heights on the vertical structure and if needed, with height adjustable legs in the front for more support. The use of tools will be required.**

Please advise if a mechanically adjustable foot assembly giving the worksurface a range of adjustability from 26"H up to 40"H is acceptable in this application? The operation to raise/ lower the surface will require basic tools and is not intended to be performed frequently.

A2. No

- Q3. With regards to part 3 – section 3.1.2.8 – Privacy Panels; the privacy panels must be open frame with the exception of two tackable upper elements to be removable. Can you advise what would be the general dimensions of these 2 tackable panels you're referring to?**

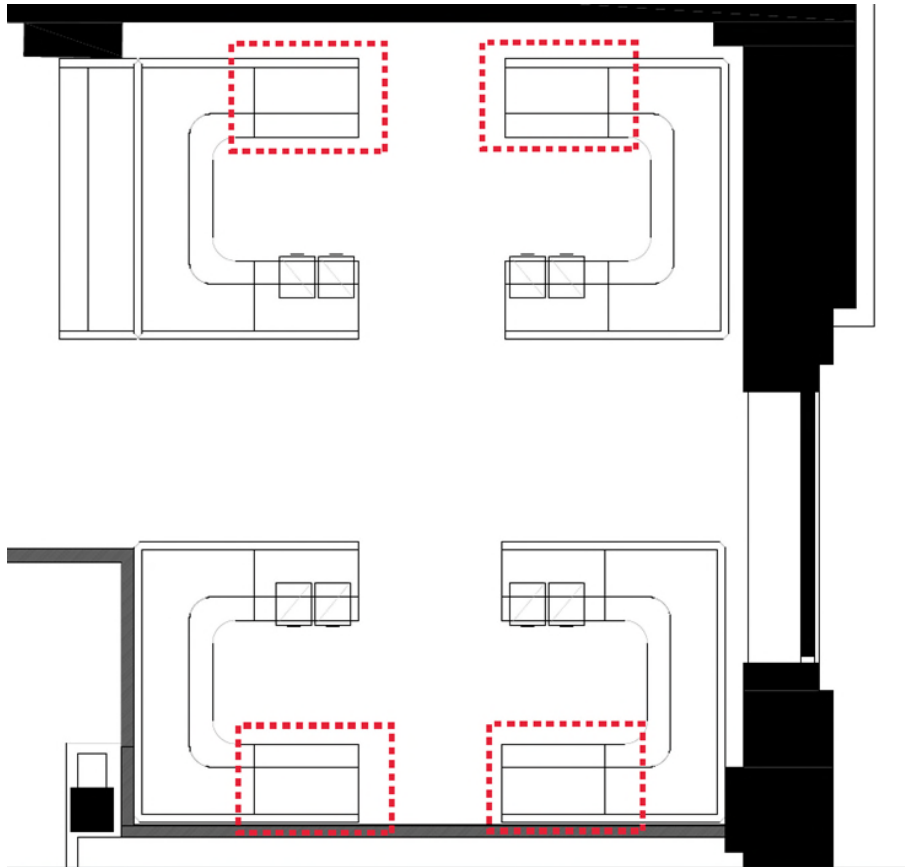

A3. This may be supplier dependent, but the width should fit within the vertical posts. The height can be approximately 12 inches (this may also be supplier dependent).

- Q4. For part 3.1.1.1.1, the full height panels, we plan on providing laminated finishing panels that are removable and installed with small brackets that attaches on the back of the rear vertical post. Can you advise if this is acceptable, and can you confirm if we must provide panels for all sides of the benches, including those where the benches are facing a wall in the room?**

A4. This is acceptable, and all sides of the panel should be closed.

Q5. Point 3.1.1.1.5 – can you advise what are the approximate expected width for the hutch, and if possible, on which section of the bench they will be installed?

A5. The width of an overhead storage unit must correspond with the width of the supporting panel. They should be placed on the panel which is against the wall.

ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED.
