VEHICLE-MOUNTED DIESEL EXHAUST SYSTEMS

Amendment 002 is raised to address the question received from the industry.

Q1. Looking for further information on this tender. About the best solution to reducing emissions is a purifier (sometimes known as a "scrubber") that are used on mining equipment. Depending on vehicle, age and condition reduction of 70%+ can be achieved assuming this is diesel engines in the tender. The size of purifier is based solely on exhaust tubing size and engine horsepower.

R1. 665 HP at 2100 RPM

Exhaust is 6 inches in diameter. Age of vehicle is 5 years

Q2. Is only supply of equipment required, or both supply and install?

R2. On-site installation, on existing Aircraft Rescue Fire Fighting Vehicles (ARFFV), would be included as an optional purchase in the resulting contract that can be exercised anytime within one year after contract award. The contractor will be paid using the price quote as outlined in Annex B, "Basis of Payment".

Please refer to section 6.4.3 of the solicitation.

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME AND IN FULL EFFECT.
