15. Vurtur Communications Group

Description of Work:

The main objective of the project is to establish a national integrated system for the collection of electronic fishing catch and effort data. Within this, the three key objectives are:

- To create a national infrastructure for the collection and storage of catch and effort data;
- To develop and implement a set of national standards for the development of electronic logbook applications; and,
- To develop an approval (qualification) process for electronic logbook applications.

The scope of the current phase is the definition and implementation of additional fisheries for onboarding with the national solution that would enable the program to:

- Further identify candidate fisheries for inclusion;
 - Identify requirements for data collection for candidate fisheries;
 - Improve software requirements for third party developers;
 - Provide the department with required input material; and,
 - Determine onboarding strategy for future fishing seasons.
- Bidders must submit a bid for all resource categories
- The work is currently being performed by Adhargas Consulting Inc. under contract (value \$59,500)

Security Requirement: *Common PS SRCL #34 applies*
