

## **Question & Answer 1**

**RFP 5Z011-22-0009**

### **Question #1**

I have gone over the mandate noted in the document and noticed that although it mentions languages, there was no specific mention of American Sign Language (ASL) - English, or la langue des Signes Québécoise (LSQ) – French in the translation requirements. In the COVID-era in which we now find ourselves, we have noticed a marked increase on the need for such Accessibility inclusions and accommodations. It is on that note that I wondered – would there be any openness or interest on this process to entertain a bid that speaks to the added provision of ASL and LSQ Sign Language services?

### **Answer #1**

Thank you for your question. This particular tender notice only pertains to French and English written translations. It does not include interpretation services.
