## ANNEX A

### STATEMENT OF WORK

#### 1. Title

Invasive Plant Management (IPM) in Prairie National Parks and Historic Sites in AB, SK and MB.

#### 2. Background

Invasive plants are recognized as a serious threat to native ecological communities and biodiversity. According to the International Union for the Conservation of Nature (IUCN), invasive species are the second most significant cause of global extinction following habitat loss (2011).

Invasive plants reduce biodiversity and compromise ecosystem function by out-competing native species, altering nutrient cycling, destabilizing soils and causing erosion, among other impacts (Pimentel et al. 2005, Zedler and Kercher 2004). Climate change may have synergistic effects on invasive plants, altering species distributions and local resilience to invasion (Zavalet and Royval 2002). Prevention and early action activities can prevent infestations before they become un-manageable in scope.

Invasive plants in the Prairie National Parks have been recognized as an important stressor to native biodiversity. Invasive Plant Management Plans or Integrated Pest Management Plans are to be developed, if not already in place, for each park or historic site to mitigate these impacts.

#### 3. Objective

3.1. Management, using integrated pest management principals, of priority invasive plants and areas that could be considered vectors of spread within the parks at one or more of the following locations:

- Elk Island National Park, Alberta
- Prince Albert National Park, Saskatchewan
- Grasslands National Park, Saskatchewan
- Riding Mountain National Park, Manitoba
- Batoche National Historic Site, Saskatchewan
- Motherwell Homestead National Historic Site, Saskatchewan
- Fort Battleford National Historic Site, Saskatchewan
- Fort Walsh National Historic Site, Saskatchewan

#### 4. Definitions

4.1. **First and Second Pass:** one or two visits to an invasive plant site to conduct invasive plant treatment.

4.2. **Inspection:** monitoring by the Parks Canada Agency (PCA) Representative or their designate which determines effectiveness of invasive plant treatment and that the activity complies with all legislative and contractual obligations.

4.3. **Invasive Plant Treatment:** chemically and/or manually treat as necessary to destroy all target plants on site and to prevent viable propagule spread. Propagules refer to reproductive plant parts that may include seeds, stolons, rhizomes, bulbs or stem or root fragments. Treatment should be completed by methodically traversing each site, on foot if necessary, in order to locate, survey, and treat each plant. Invasive plant treatment includes placing and removing

treatment notices, as directed by the PCA Representative. Signs will be supplied by Parks Canada.

- 4.4. Management effectiveness Monitoring:** a visit to a site to determine treatment compliance and efficacy; occurs the same season as the treatment.
- 4.5. Invasive Plant Treatment Site:** an area identified by a UTM coordinate that has target invasive plant species or multiple target species growing within 100 meters of the UTM coordinate. Target species that are greater than 100m from the coordinate are considered part of the original site if the gap between the last occurrence of a target species at the site and the newly found target species is less than 100 meters. A new site is created if there is greater than 100m between the last occurrence of a target species at the original site and another plant of the same target species.
- 4.6. Invasive Plant Management Area:** an area outlined by a clear UTM track or polygon shape file, in which one or multiple invasive plant species are to be managed. One Invasive Plant Management Area may contain multiple Invasive Plant Treatment Sites.
- 4.7. Monitoring:** either the initial/baseline visit to a site to determine species presence and relative abundance or a subsequent visit in succeeding years that measures change at that site.
- 4.8. Planting/Seeding:** the action of planting plugs or distributing seeds in a designated area, usually following Invasive Plant Treatment. Is done to promote the growth of desirable species at a site.
- 4.9. Target Species:** invasive plant species specifically listed for treatment.
- 4.10. Treatment Notices:** *Herbicide Application Signs* that are placed at the beginning of any public access route(s) that intersect the site prior to commencing herbicide treatments. Signage requirements will be posted in accordance with specifications laid out in the relevant IPMP or other site-level guidance.
- 4.11. Record of Treatment:** Each National Park or Historic Site will have its own methods of record-keeping, either digitally or hardcopy, but same for all is that records of treatment type, chemical used and area treated must be recorded.

## 5. Scope of Work

**TECHNICAL EVALUATION**

**1. Technical Bid Format**

The technical bid must address clearly and in sufficient depth the points that are subject to the evaluation criteria against which the bid will be evaluated. Simply repeating the statement contained in the bid solicitation is not sufficient.

In order to facilitate the evaluation of the bid, **Canada strongly requests that bidders address and present topics in the order of the evaluation criteria under the same headings.**

To avoid duplication, bidders may refer to different sections of their bids by identifying the specific paragraph and page number where the subject topic has already been addressed.

The Bidder is advised to pay careful attention to the wording used throughout this Request for Proposal (RFP). Failure to satisfy a term or condition of this RFP may result a bid being deemed non-responsive.

All information required for evaluation purposes must be included directly in the Bidder’s technical bid. The evaluation team cannot consider information not provided directly in the technical bid (e.g. links to additional website content, references checks, etc.).

**2. Mandatory Technical Criteria**

Technical bids will be evaluated against the mandatory technical criteria below.

For a bid to be declared responsive to the solicitation requirements it must demonstrate and meet all of the mandatory technical criteria. Bids declared non-responsive to the mandatory technical criteria will be given no further evaluation.

Item No.	Evaluation Criteria	Met / Not Met		Remarks / Notes
		Remarks/Notes	Remarks / Notes

--	---	--	--	--

**Bids that do not demonstrate and meet all mandatory technical criteria will not receive further evaluation.**

### 3. Point Rated Technical Criteria

Technical bids will be evaluated against the point rated technical criteria below.

For a bid to be declared responsive to the solicitation requirements it must meet or exceed the total minimum weighted points required for the point rated technical criteria. Bids that do not meet or exceed the minimum weighted points required for the point rated technical criteria will be given no further evaluation.

Each point rated technical evaluation criterion has a weight that reflects its importance in the proposal submission. The degree to which the proposal satisfies the requirement of each criterion will be assessed and a score will be assigned in accordance with the Evaluation Criteria. This score will then be multiplied by the weight indicated for that point rated evaluation criterion.
