ANNEX B

BASIS OF PAYMENT – Revision 1

The bidder is required to submit a **firm LOT price** for acquisition for the mandatory area, and a **firm LOT price** for acquisition per **each** optional area below. The bidder must not alter the tables below.

The **firm Lot price for acquisition** mentioned above shall include all steps including data acquisition, data processing, finalizing, preparation and submission of final deliverables, per identified area.

Mobilization/demobilization involves the sensor setup and calibration on the vessel and the initial relocation to the work site as well as the vessels return to its home port at the end of the survey. All costs associated with demobilization shall also be considered under this item. Transit between work areas (Mandatory and/or Optional) shall be considered as part of mobilization/demobilization.

Any additional requirements to resupply/re-provision will be considered as part of Southern Re-supply mobilization. There will be up to 2 lot prices available for this resupply. Costs will be paid out on a per lot basis. If one resupply is required (ie: work site to southern resupply, and return), one lot price will be paid. If two resupplies are required (ie: worksite to southern resupply destination and return), two lot prices will be paid out. If there is no need for a southern re-supply to occur, costs will not be paid out.

Payment in the context of downtime and other eventualities:

- If the Contractor is on-site and the weather is favourable for data acquisition however the Contractor cannot survey for any reason, CHS will not pay the Contractor for this time period.
- If the weather is not favorable for acquisition for a complete day, the CHS will pay the Contractor 24 hours of downtime.
- If the weather is favourable for a portion of the day, the CHS will pay for the portion of the day (up to 24 hours) as downtime. Example: If the weather is favorable for acquisition for 8 hours but is degraded for the remainder of the day, the CHS will pay for 16 hours of downtime.

CHS reserves the right to approve area expansion within or in the immediate proximity to an area as prescribed in this Statement of Work. This additional work includes but is not limited to an area expansion, and increased line overlap to improve existing coverage. There will be no additional mobilization costs approved by the CHS Technical Authority when this circumstance is applied. The bidder is required to submit a per hour rate for these services in Table E.

The Contractor is only authorized to conduct data acquisition in Mandatory and Optional areas (if applicable). The Contracting Authority (PSPC), in consultation with the Project Technical Authority (CHS), is the approving authority for any additional work next to the Mandatory and Optional (if applicable) survey areas.
