**TITLE : CHAIN STOPPERS – ENGINEERING AND FABRICATION
FOR CCGS MARTHA L BLACK
DFO- CANADIAN COAST GUARD (CCG), QUEBEC**

Solicitation amendment 002 is to answer questions from the industry.

Enquiries – Bid solicitation – Clause #2.3

To ensure consistency and quality of information provided to bidders, significant enquiries received and the replies to such enquiries will be provided simultaneously to bidders to which the bid solicitation has been sent, without revealing the sources of enquiries.

Here are the questions that we have received:

Question 1 : Are the plans for locating the equipment on the ship available?

Answer 1 : No. The plans for locating the equipment on the ship are not available.

Question 2 : Does CCG intend to replace the equipment as presented in the original plans provided? In the event that the CCG intends to change its design to meet other requirements, will the CCG provide a list of operator requirements.

Answer 2 : This request is an addition and not a replacement of existing equipment. The vessel does not currently have a chain stopper on board.

Question 3 : Is CCG able to provide photos of existing equipment and operational videos with the equipment?

Answer 3 : This request is an addition and not a replacement of existing equipment. The vessel does not currently have a chain stopper on board.

Question 4 : If we were able to supply an existing product from a Canadian supplier and integrate it with the ship, would that be acceptable to the CCG?

Answer 4 : The chain stoppers must be identical to the chain stopper in the drawing provided with the exception to modifications described in the Statement of Work.

Question 5 : What are the types of chains used?

Answer 5 : Size 1-1/8"

CCC No./N° CCC - FMS No./N° VME

Question 6 : What is the load capacity of the equipment provided? What is the load capacity of the existing equipment?

Answer 6 : The load capacity of the equipment is 10 tons. This is an addition of equipment and there is no existing equipment.

Question 7 : Given the engineering delays, the class approval delays and the manufacturing delays, it seems to us that the date of August 30, 2021 presents a tight schedule. Is this date flexible or can it be rescheduled according to the ship's schedule of operations in September? If not, does CCG agree to proceed with the installation of the equipment without final ABS approval?

Answer 7 : The delivery date is postponed to September 30 2021. Final ABS approval is essential

MODIFY THE REQUEST FOR PROPOSAL AS FOLLOWS:

DELETE :

6.3.2 Delivery Date

All the deliverables must be received no later than August 30, 2021.

INSERT :

6.3.2 Delivery Date

All the deliverables must be received no later than **September 30, 2021.**

ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME.
