AMENDMENT 003

PURPOSE:

The purpose of this amendment is to:

1. Answer Bidder questions 1 to 4; and
2. Extend the closing date.

1.1 Question 1:

EN12492 is a standard for mountaineering helmets not for military helmets. Would you accept an equivalent standard such as US Army Standard for impact protection AR/PD 10-02?

1.2 Answer 1:

Yes we accept the equivalent US Army Standard for impact protection AR/PD 10-02

1.3 Question 2

For the above mentioned solicitation, would a single product, capable of performing the role of both the CEP (Communication Ear Plugs) and the headset communication, be acceptable if it satisfies both communication and NRR (Noise Reduction Rating) requirements?

1.4 Answer 2

The proposed solution must include both. The headset provides communications and protection for the external ear against the elements during hoisting and parachuting. The CEP is essential to the SAR (Search and Rescue) Tech when attending a patient to maintain simultaneous communications with the rest of the crew and the patient while being protected against excessive noise.

1.5 Question 3:

For the White Light Headlamp required in 4.2.1.e, are there specifications for this item? Required Lumens, IP rating, strobe function, IR or other colour requirement, attachment method, rechargeable or replaceable power source?

1.6 Answer 3

- IP (Ingress Protection) rating: minimum IP 57 (Partial protection against dust that may harm equipment. Protection against full immersion for up to 30 minutes at depths between 15 cm and 1 metre (limited ingress permitted with no harmful effects).
- Strobe function: not required on headlamp
- IR (infrared) or other colour requirement: IR not required. Tactical green, and white for the colours of the light.
- Attachment method: EAD (External Attachment Devices) Rail mounted
- Power source: Replaceable
- Beam Distance: Minimum of 50 metres
- Multiple Beam: Beam pattern combines focused narrow and wide beams

1.7 Question 4

In regards to the communication system interfacing with the Motorola APX6000R requirement in section 4.3.a, which attachment point does this require? Do we need to provide all cables from the communication system to the radio (including a Push to Talk), or does DND have their own we need to patch into? What testing documentation would we require if we provide all of the cables?

1.8 Answer 4

Bidders must provide all cables from the communication system to the radio (including a Push to Talk)

2. Extend the closing date to 24/06/2021

All terms and conditions remain unchanged.
