TITLE: ORTHOPHOTO DATA CAPTURE AND VECTOR MAPPING OF GWICH'IN COMPREHENSIVE LAND CLAIM AGREEMENT BOUNDARY PARCELS

This solicitation amendment is to provide clarifications to the Solicitation.

PART A: QUESTIONS/ANSWERS

Q1. **Section 4.1.3.** of the RFP states that "*All imagery captured must be done when ... The solar angle... [is]... at least 32-degrees above the horizon at the time of exposure.*" We would like to see this relaxed. The resulting window of time available is narrow but flexibility is crucial when considering the many factors that could influence this large airborne mission.

A1. We recognize that photography acquisition at northern latitudes requires flexibility to mobilize at the earliest opportunity due to the shorter window of ideal conditions. This project requires the photos to be as clear from shadows as possible, particularly in proximity to the natural boundaries, which can only be achieved by adherence to these strict sun-angle requirements. If, however, the project cannot be flown within these specifications because of bad weather, smoky conditions, or other factors that are beyond the control of the flying contractor, a request to relax the requirements will be considered later in the summer. Priority and care must be given to meeting the absolute accuracy of the Ordinary High Water Mark (OHWM) mapping.

Q2. **Section 9.6.6. FINAL RETURNS g. Pointcloud files in LAS format and associated Digital Elevation Model files in DWG format for AutoCAD (2013).** We are uncertain of a corresponding requirement in **PROJECT REQUIREMENTS 4.1. Mapping/Orthophotography**. Can you please clarify this requirement?

A2. For the specific purposes of determining watershed boundaries, digital elevation models will be required as part of the process of mapping and accurately defining the watershed boundaries only. Whether they are generated from aerial imagery, or LiDAR, or other means is up to the Canada Lands Surveyor provided they can be determined accurately according to the National Standards. We are not expecting this information to be generated for the bulk of the project, but where it is necessary, it should be submitted as part of the final returns.

Q3. We appreciate that earliest possible contract award is good for the project, but we respectfully request an extension in the Solicitation Closing date/time to **Monday, June 14 at 11:50 PM (MDT)**.

A3. Solicitation Amendment 001, issue 2021-05-18, extended the closing date to 2021-06-15 14:00 Mountain Daylight Time (MDT).

If your bid has already been submitted, you may wish to revise it. Revisions to your bid can be submitted by facsimile or by ePost, in which the content is clearly identified. Please clearly indicate the content on the envelope, on the cover page or in the subject line, according to your method of presenting your amended proposal.
