

Amendment 002 – RFP 1000231119

**This amendment is raised to address the following question.
No aspects of the RFP are being amended.**

- Q5) We are not on the SA nor are we Class 1 Resellers however, we are an authorized partner and reseller of RPA software that is not on EN578-100808/D. In order for the RPA software to be compliant with the Crown does the product need to be on the EN578-100808/D. Part 11 of the RFP states that resellers must supply a letter from the software publisher.
- A5) **This particular requirement is ONLY open to products that are active on the supply arrangement EN578-100808/D. The Publisher of the product needs to be active on the Supply Arrangement.**

To clarify Part 11 of the RFP, we are accepting bids from both the publishers and the Class 1 Resellers. If the bidder is also the publisher, no other documentation is required under Part 11, the publisher will also fulfil the contract. If the bidder is a reseller than the reseller will be required to provide written confirmation from the publisher. This is required because under the SA the contract will need to be awarded to the Publisher but the reseller will fulfil the contract.

Thank you
