Amendment #001

The purpose of this amendment is to respond to potential bidders questions.

1) Question 1:

14. Government Furnished Equipment (GFE) The following GFE will be provided: QinetiQ Obsidian Radar, **DJI Aeroscope**

Would that mean if we wanted to bid on this RFP that we would have to use the **DJI Aeroscope** product as apposed to our made in Canada SkyEye system?

1) Answer 1:

It would be expected that the contractor would use the Aeroscope. If they are able to provide their own detection system as well that is good.

All other terms and conditions remain unchanged.
