Questions/Answers

Question 2: (Ref. ANNEX A – REQUIREMENT)

Explosion proof air conditioner/heating, lighting and outlets and switches clarification needed: What is hazardous condition classification. Is it inside the mechanical/energetic materials workshop only? Also, do you have any other implications such as wall/floor thickness?

Answer 2 :

Explosives class, divisions 1.1C. This only applies to the electrical equipment in the mechanical/energy area. There is no specification for wall and floor thickness.

Question 3: (Ref. ANNEX A – REQUIREMENT - 5.1 Mobile Laboratory)

Where detailed construction methods and materials are specified, can we have some latitude to use our know methods and materials?

Answer 3 :

Yes, it is acceptable to replace the detailed construction methods and materials with equivalent or superior quality. Consequently, see Change #2.

Question 4: (Ref. page 16-17 - ANNEX A – REQUIREMENT - 5.1 Mobile Laboratory - 1. Service compartment - 1.4 Generator)

Generator compartment states soundproof. This is not possible. Is sound-insulated acceptable?

Answer 4 :

Sound-insulated is acceptable.

Question 5: (Ref. page 21 - ANNEX A – REQUIREMENT - 5.2 Accessories)

Regarding the requested 6.5 kW gas generator, We believe a single 7 kW gas generator is not sufficient for 2 @ air conditioners and or heaters, air compressor (if not gas-powered), laptops, monitors, and other unknown CFE they might be using. Would you please reconsider your required generator capacity? Please note that if larger generator is required, they are typically Diesel-fueled, not gas.

Answer 5 :

Even if the capacity is at its limit, we do not reconsider the requirements.

Change #2

At Annex A, Section 5.1 (page 13):

N° de l'invitation - Solicitation No.
W7701-207273/C
N° de réf. du client - Client Ref. No.
