

Amendment 004 – RFP 1000231119

**This amendment is raised to address the following question.
No aspects of the RFP are being amended.**

- Q10) Would the Crown please consider including other multi-department contracting vehicles along with Software Licensing Supply Arrangement (the “SA”) PWGSC file number #EN578-100808/D Contracting vehicle? If a vendor has a solution that meets the requirements stated herein, and has other contracting references within the Federal Government, it would be in the best interests of the Crown to consider these options.
- A10) The SLSA is a mandatory procurement vehicle that Departments must use for software procurement. We will only explore multi-department contracting vehicles if no viable software solutions are found through SLSA.**
- Q11) Would the crown please grant an additional 14 day extension to respondents in order to ensure there is enough time to respond to use cases/requirements outlined?
- A11) There will be no end date extension at this time**

Thank you
