### **Amendment 005**

This amendment is raised to:

1. Answer questions that were received from Industry.
  2. Modify Annex A – Statement of Work
  3. Modify Annex 1 to part 4 – Technical Bid Eval Plan
- 

## **1. QUESTIONS AND ANSWERS**

### **QUESTION 1:**

Would a separate storage box for the spare battery be acceptable.

### **ANSWER 1:**

A separate storage box for the spare battery would be acceptable in the situation that a single storage box would exceed the dimensions of the CCG aerial baskets. The additional storage box must still meet all storage box requirements, with the exception of C1.6 (the inclusion of a document holder).

### **QUESTION 2:**

The drawings submitted as part of the design package, do they absolutely need to be stamped by a certified engineer.

### **ANSWER 2:**

The requirement has been amended. The drawings submitted as part of the design package no longer require to be stamped by a certified engineer.

### **QUESTION 3:**

Regarding the buoy's capability of emitting sound, can the nominal intensity of 130 decibels be lowered.

### **ANSWER 3:**

CCG has reviewed the requirement and determined that 114 dB would be acceptable for the intended application. The requirement has been changed from 130 dB to a nominal intensity of 114 dB.

## 2. MODIFY ANNEX A – STATEMENT OF WORK

At Annex A – Section 4 Deliverables,

**DELETE:** “The approved design package must be stamped by a professional engineer who is licensed or registered in the jurisdiction (e.g., country, province, or state) in which they work.” From Description of Item D-2, Design Package

At Annex A – 6.1.2 Bird Hazing Buoy Minimum Specification Requirements

**DELETE:** “130 decibels”, from requirement B2.6

**INSERT:** “114 decibels”

At Annex A – 6.2.3 Storage Box Environmental and Design Constraints

**DELETE:** C3.3 in its entirety

**INSERT:** requirement C3.3 as follows:

The storage box must be transportable by both air and land in support of CCG operations. CCG air baskets have dimensions of 34 ½” (length) x 40” (width) x 36” (height). All components that fit into this box must be secured for transport.

At Annex A – 6.4.2 Spare Battery Non-Functional Requirements

**DELETE:** T2.2 in its entirety

**INSERT:** requirement T2.2 as follows:

The spare battery must have a dedicated secure storage space within the storage box. A separate storage box may be provided for the spare battery should a single storage box not fit within the dimensions specified in C3.3. The additional storage box must meet all storage box requirements (except for C1.6.)

## 3. MODIFY TECHNICAL BID EVALUATION PLAN

At Mandatory Requirement M2

**DELETE:** “130 dB”, from Mandatory Requirement

**INSERT:** “114 dB”

**ALL OTHER TERMS AND CONDITIONS REMAIN UNCHANGED**
