## Solicitation Amendment

# Domestic Water System Upgrades

### Solicitation Amendment No. 001

This solicitation is hereby amended to:

(1) Answer the following questions:

Q1. On the drawings it shows to install bfp for the janitors sinks, the piping is inside the concrete block wall with no access on the other side. How do you want these installed (surface mount with new taps) or do we need to open the back side of the wall from the adjacent room?

A1. **The backflow preventors (BFP) should be installed as surface mounted. The BFP's piping connections should be done within the ceiling space using the existing DCW/DHW supply to the mop sinks. There shouldn't be any need to open walls.**

Q2. Ceiling tiles in both the research labs and hallways- how many will need to be replaced?

A2. **If ceiling tiles are damaged during the course of the work, the Contractor shall replace them to match existing. Of special note, some labs use Armstrong 870B.**
