### **QUESTIONS**

---

**Question 1:**

We have completed the redesign of our tower for this project and have not been able to reduce the tower face width to the required 4m maximum. We have been able to reduce our face width to 4.4 meters but would be required to cut into the 20% reserve capacity if we need to get the face width down. Can you confirm if a 4.4m face would be acceptable or if we are able to reduce the reserve capacity in attempt to reduce the face width further?

**Answer 1:**

An increase to 4.4m will be acceptable. This increase to 4.4m face width will require final location of the tower to be confirmed in field to ensure minimum setback of 2m from crest of the rock slope to the north can be met.
