This amendment is being raised to provide answers to the following questions:

Question 1: Does the end user want an 18" wide infeed conveyor quoted with the shredder?

Answer 1: Yes

Question 2: Does the end user need a discharge chute only, as you will be shredding into some kind of bin / gaylord?

Answer 2: Yes. Canada will shred materials based on commodity (e.g. clothing, hard hats) being fed through the shredder. The shredded material will then be collected in bins for recycling

Question 3: The discharge material from a dual-shaft shredder will come out in strips. What final particle size do they want to shred down to or does it just need to be destroyed and size doesn't matter?

Answer 3: Approximate size is 7/8" to 1" as the minimum shred size, in various lengths

Question 4: Please advise regarding the volume of material that needs to be shred per hour / day.

Answer 4: Minimum is 1,000 pounds an hour / 4,000 pounds per day

Question 5: How many pounds per hour do they want to shred?

Answer 5: Minimum is 1,000 pounds an hour.

ALL TERMS AND CONDITIONS ARE UNCHANGED
