This amendment has been raised to answer the following questions:

Question #1: *What are the hours of work inside the fence of the facility and the hours of work outside of the fence at the facility? Can they be extended beyond the 8:00 to 4:00 PM time included in the specs?*

Response #1: *Yes, this will be possible, if you are looking to have extended hours 48 hrs notice to CSC is required and is contingent upon commissionaire availability.*

Question #2: *In order to access an area within the facility, how much advance notice is required to be provided to ensure no delay in receiving access?*

Response #2: *5 days is requested by CSC, however 3 days can be accommodated in case of emergencies.*

Question #3: *Are there any security clearances required for the bidding organization or individual personnel working on site?*

Response #3: *No.*

Question #4: *Section 01 52 00 1.6 states that after hours and weekend security personnel are a requirement for the laydown area. Is this a requirement and is there any specific criteria for this individual given the proximity to the institution?*

Response #4: *This is not required.*

Question #5: *BA 06 states construction time is 30 weeks from acceptance of offer. Please confirm this work is intended for completion in the summer/fall 2021 season or spring/summer 2022?*

Response #5: *This is just a rough estimate of the total duration of construction, it is unlikely that this project will be completed in 2021, civil works will likely not take place over the winter.*

Question #6: *A second gas line from the ATCO meter station with a double valve and blind flange fitting are adjacent to the proposed tie-in location exiting the building. Is it possible to utilize the line where the blind flange terminates until completion of the new main is installed and the old line is abandoned?*

Response #6: *At this time, the second gas line cannot be used for construction purposes.*
