**Amendment 003 is issued to respond to questions raised.**

**Q1: What is the rope application?**

A1: The wire ropes will be installed on winches (hoists) that lift a platform out of the ocean. The platform, wire ropes, and winches (hoists) are components of a Syncrolift® ship lift. The platform is where an ocean going vessel is placed so that the ship lift can raise the vessel out of the water for maintenance and inspection work and then lower it back into the water once the work is completed.

**Q2: Is it going to be used offshore?**

A2: The wire ropes will not be used in an offshore application.

**Q3: Can you please clarify what is meant by SPC in inquiry item 10 against rope construction?**

A3: "SPC" means Solid Polymer Core, which is a core consisting of a solid polymer material having a round shape or a round shape with grooves. It may also contain an internal element of wire(s) or fibre. Refer to standard EN 12385-2 and/or ISO 17893.

**Q4: What is the break load of the wire rope?**

A4: The minimum wire rope breaking strength for each wire rope on winches 6A to 10A and 6B to 10B is confirmed to be 420,000 lbs. (187.5 long tons) or 190.5 tonnes (1,869 KN).

**Q5: Is it mandatory to give Crosby an open spelter socket?**

A5: An equivalent to the specified Crosby socket is acceptable.

**ALL OTHER TERMS AND CONDITIONS REMAIN THE SAME**
