SPECIFICATION

WHARF REPAIRS

LEADING TICKLES, NL

P/N: C2-00087

PREPARED ON BEHALF OF:

Fisheries and Oceans Canada

DATE

June 1, 2021 Revision 2

PROVINCE OF NEWFOUNDLAND

PERMIT HOLDER Class "A" This Permit Allows

CROSBIE ENGINEERING LIMITED

To practice Professional Engineering in Newfoundland and Labrador Permit No. as issued by PEG-NL D0123 which is valid for the year 2021.

PERMIT HOLDER This Permit Allows

APA ENGREERING INC.

To provide Professional Engineering in Meadown disable and Lebradov. Fo 292 Formit No. as lesued by APEGN Fo 292 which is valid for the year 2021

.2 Note that the Contractor must incorporate COVID-19 standardized protocols in their site specific Health and Safety Plan. The protocols are to include:

terms and conditions of the Contract.

- .1 Prevention (signage, practices to reduce risk of transmission, encouragement of social distancing, use of PPE, use of individual modes of transportation, monitoring status of workers, construction jobsite and trailer cleaning protocols, etc.).
- .2 Detection (screening at entry of construction site, unauthorized entry points, etc.).
- .3 Response measures (shut down procedures, individual case handling, etc.).

1.2 DESCRIPTION OF WORK

. 1

- In general, work under this contract will consist of, but will not necessarily be limited to, the following:
 - .1 Demolition of the existing wharf crib infrastructure on the east end of the marginal wharf, in the area noted on the drawings. Demolition and removal of fenders, ladders, wheelguard, coping, wheelguard blocking, partial deck removal is also required in other areas of the site, as specifically shown on the drawings. Note that any creosote timber and other demolition debris removed as part of the demolition work will have to be disposed of at a

work, the means of access to the site, severity, exposure and uncertainty of weather, soil conditions, any accommodations they may require, and in general shall obtain all necessary information as to risks, contingencies and other circumstances which may influence or affect their bid or costs to do the work. No allowance shall be made subsequently in this connection on account of error or negligence to properly observe and determine the conditions that will apply.

.2 Contractors, bidders or those they invite to site are to review specification Section 01 35 29 - Health and Safety Requirements before visiting site. Take all appropriate safety measures for any visit to site, either before or after acceptance of bid.

1.6 CODES AND STANDARDS

- .1 Perform work in accordance with the latest edition of the National Building Code of Canada, FCC Standard 373 Standard for Piers and Wharves
 (http://www.hrsdc.gc.ca/eng/labour/fire_protection/policies_standards/commissioner/373/page00.shtml), and any other code of provincial or local application including all amendments up to project bid closing date provided that in any case of conflict or discrepancy, the more stringent requirements shall apply.
- .2 Materials and workmanship must meet or exceed requirements of specified standards, codes and referenced documents.

1.7 TERM ENGINEER

.1 Unless specifically stated otherwise, the term Engineer where used in the Specifications and on the Drawings shall mean the Departmental Representative as defined in the General Conditions of the

Acceptance Form.

1.10 WORK SCHEDULE

- .1 Submit within 7 work days of notification of acceptance of bid, a construction schedule showing commencement and completion of all work within the time stated on the Bid and Acceptance Form and the date stated in the bid acceptance letter.
- .2 Provide sufficient details in schedule to clearly illustrate entire implementation plan, depicting efficient coordination of tasks and resources, to achieve completion of work on time and permit effective monitoring of work progress in relation to established milestones.
- As a minimum, work schedule to be prepared and submitted in the form of Bar (GANTT) Charts, indicating work activities, tasks and other project elements, their anticipated durations and planned dates for achieving key activities and major project milestones provided in sufficient details and supported by narratives to demonstrate a reasonable plan for completion of project within designated time. Generally Bar Charts derived from commercially available computerized project management system are preferred but not mandatory.
- .4 Submit schedule updates on a minimum monthly basis and more often, when requested by Departmental Representative, due to frequent changing project conditions. Provide a narrative explanation of necessary changes and schedule revisions at each update.
- .5 The schedule, including all updates, shall be to Departmental Representative's

PART 1 - GENERAL

1.1 SECTION .1 Inspecting and testing by inspecting firms or testing laboratories designated by Departmental Representative.

1.2 RELATED REQUIREMENTS SPECIFIED ELSEWHERE

.1 Particular requirements for inspection and testing to be carried out by testing laboratory designated by Departmental Representative are specified under various sections.

1.3 APPOINTMENT AND PAYMENT

- .1 Departmental Representative will appoint and pay for services of testing laboratory except for the following:
 - .1 Inspection and testing required by laws, ordinances, rules, regulations or orders of public authorities.
 - .2 Inspection and testing performed exclusively for Contractor's convenience.
 - .3 Mill tests and certificates of compliance.
 - .4 Tests specified to be carried out by Contractor under the supervision of Departmental Representative.
 - .5 Tests requested by Departmental Representative to confirm material specifications when the applicable manufacturer's documentation or test results are unavailable.
 - .6 Additional tests specified in the following paragraph.
- .2 Where tests or inspections by designated testing laboratory reveal Work not in accordance with contract requirements, pay costs for additional tests or inspections as required by Departmental Representative to verify acceptability of corrected work.

PART 1 - GENERAL

1.1 SECTION INCLUDES

- .1 Shop drawings and product data.
- .2 Samples.
- .3 Certificates.

1.2 SUBMITTAL GENERAL REQUIREMENTS

- .1 Submit to Departmental Representative for review submittals listed, including shop drawings, samples, certificates and other data, as specified in other sections of the Specifications.
- .2 Submit with reasonable promptness and in orderly sequence so as to allow for Departmental Representative's review and not cause delay in Work. Failure to submit in ample time will not be considered sufficient reason for an extension of Contract time and no claim for extension by reason of such default will be allowed.
- .3 Do not proceed with work until relevant submissions are reviewed by Departmental Representative.
- .4 Present shop drawings, product data, samples and mock-ups in SI Metric units.
- .5 Where items or information is not produced in SI Metric units, provide soft converted values.
- .6 Review submittals prior to submission to Departmental Representative. Ensure during review that necessary requirements have been determined and verified, required field measurements or data have been taken, and that each submittal has been checked and co-ordinated with requirements of Work and

	SUBMITTAL	PROCEDURES	Section	01	33	00
Wharf Repairs						
Leading Tickles, NL			Page 2			
Project number C2-00087			2021-06-	-18		

Contract Documents.

- .1 Submittals not stamped, signed, dated and identified as to specific project will be returned unexamined by Departmental Representative and considered rejected.
- .7 Notify Departmental Representative, in writing at time of submission, identifying deviations from requirements of Contract Documents stating reasons for deviations.
- .8 Verify field measurements and affected adjacent work and coordinate.
- .9 Contractor's responsibility for errors and omissions in submission is not relieved by Departmental Representative's review of submittals.
- .10 Contractor's responsibility for deviations in submission from requirements of Contract Documents is not relieved by Departmental Representative's review.
- .11 Submittal format: paper originals, or alternatively clear and fully legible photocopies of originals. Facsimiles are not acceptable, except in special circumstances pre-approved by Departmental Representative. Poorly printed non-legible photocopies or facsimiles will not be accepted and be returned for resubmission.
- .12 Make changes or revision to submissions which Departmental Representative may require, consistent with Contract Documents and resubmit as directed by Departmental Representative. When resubmitting, notify Departmental Representative in writing of any revisions other than those requested.
- .13 Keep one reviewed copy of each submittal document on site for duration of Work.

	SUBMITTAL	PROCEDURES	Section	01	33	00
Wharf Repairs						
Leading Tickles, NL			Page 3			
Project number C2-00087			2021-06-	-18		

1.3 SHOP DRAWINGS AND PRODUCT DATA

- .1 The term "shop drawings" means drawings, diagrams, illustrations, schedules, performance charts, product data, brochures and other data which are to be provided by Contractor to illustrate details of a portion of Work.
- .2 Number of Shop Drawings: submit sufficient copies of shop drawings which are required by the General Contractor and sub-contractors plus 2 copies which will be retained by Departmental Representative. Ensure sufficient numbers are submitted to enable one complete set to be included in each of the maintenance manuals specified, if applicable.
- .3 Shop Drawings Content and Format:
 - .1 Indicate materials, methods of construction and attachment or anchorage, erection diagrams, connections, explanatory notes and other information necessary for completion of Work. Where items or equipment attach or connect to other items or equipment, confirm that all interrelated work have been coordinated, regardless of section or trade from which the adjacent work is being supplied and installed.
 - .2 Shop Drawings Format:
 - .1 Opaque white prints or photocopies of original drawings or standard drawings modified to clearly illustrate work specific to project requirements. Maximum sheet size to be 1000 x 707 mm.
 - .2 Product Data from manufacturer's standard catalogue sheets, brochures, literature, performance charts and diagrams, used to illustrate standard manufactured products, to be original full colour brochures, clearly marked indicating applicable data and deleting information not applicable to project.
 - .3 Non or poorly legible drawings,

	SUBMITTAL	PROCEDURES	Section	01	33	00
Wharf Repairs						
Leading Tickles, NL			Page 4			
Project number C2-00087			2021-06	-18		

- photocopies or facsimiles will not be accepted and returned not reviewed.
- .3 Supplement manufacturer's standard drawings and literature with additional information to provide details applicable to project.
- .4 Delete information not applicable to project on all submittals.
- .4 Allow 10 calendar days for Departmental Representative's review of each submission.
- .5 Adjustments or corrections made on shop drawings by Departmental Representative are not intended to change Contract Price. If adjustments affect value of Work, advise Departmental Representative in writing prior to proceeding with Work.
- Representative, no errors or omissions are discovered or if only minor corrections and comments are made, fabrication and installation may proceed upon receipt of shop drawings. If shop drawings are rejected and noted to be Resubmitted, do not proceed with that portion of work until resubmission and review of corrected shop drawings, through same submission procedures indicated above.
- .7 Accompany each submission with transmittal letter, containing:
 - .1 Date.
 - .2 Project title and project number.
 - .3 Contractor's name and address.
 - .4 Identification and quantity of each shop drawing, product data and sample.
 - .5 Other pertinent data.
- .8 Submissions shall include:
 - .1 Date and revision dates.
 - .2 Project title and project number.
 - .3 Name and address of:

	SUBMITTAL	PROCEDURES	Section	01	33	00
Wharf Repairs			_			
Leading Tickles, NL			Page 5			
Project number C2-00087			2021-06-	-18		

- .1 Subcontractor.
- .2 Supplier.
- .3 Manufacturer.
- .4 Contractor's stamp, signed by Contractor's authorized representative certifying approval of submissions, verification of field measurements and compliance with Contract Documents.
- .5 Cross references to particular details of contract drawings and specifications section number for which shop drawing submission addresses.
- .6 Details of appropriate portions of Work as applicable:
 - .1 Fabrication.
 - .2 Layout, showing dimensions, including identified field dimensions, and clearances.
 - .3 Setting or erection details.
 - .4 Capacities.
 - .5 Performance characteristics.
 - .6 Standards.
 - .7 Operating weight.
 - .8 Wiring diagrams.
 - .9 Single line and schematic diagrams.
 - .10 Relationship to adjacent work.
- .9 After Departmental Representative's review, distribute copies.
- .10 The review of shop drawings by the Departmental Representative or their delegated representative is for sole purpose of ascertaining conformance with general concept. This review shall not mean that the Departmental Representative approves the detail design inherent in the shop drawings, responsibility for which shall remain with Contractor submitting same, and such review shall not relieve Contractor of responsibility for errors or omissions in shop drawings or of responsibility for

	SUBMITTAL	PROCEDURES	Section	01	33	00
Wharf Repairs						
Leading Tickles, NL			Page 6			
Project number C2-00087			2021-06	-18		

meeting all requirements of the construction and Contract Documents. Without restricting generality of foregoing, Contractor is responsible for dimensions to be confirmed and correlated at job site, for information that pertains solely to fabrication processes or to techniques of construction and installation and for co-ordination of Work of all sub-trades.

1.4 SCHEDULES, PERMITS AND CERTIFICATES

- .1 Upon acceptance of bid, submit to
 Departmental Representative copy of Work
 Schedule and various other schedules,
 permits, certification documents and project
 management plans as specified in other
 sections of the Specifications.
- .2 Submit copy of permits, notices, compliance Certificates received by Regulatory Agencies having jurisdiction and as applicable to the Work.
- .3 Submission of above documents to be in accordance with Submittal General Requirements procedures specified in this section.

	days after notification of acceptance of bid.
.2	Submit in accordance with the Submittal General Requirements specified in Section 01 33 00.
1.6 FIRE SAFETY REQUIREMENTS	Implement and follow fire safety measures during Work. Comply with following: .1 National Fire Code, 20152 Fire Protection Standards FCC 301 and FCC 3023 Federal and Provincial Occupational Health and Safety Acts and Regulations as specified in Section 01 35 29.
. 7	In event of conflict between any provisions of above authorities the most stringent provision will apply. Should a dispute arise in determining the most stringent requirement, Departmental Representative will advise on the course of action to be followed.
1.7 HOT WORK AUTHORIZATION	Obtain Departmental Representative's writter "Authorization to Proceed" before conducting any form of Hot work on site.
	To obtain authorization submit to Departmental Representative: .1 Contractor's typewritten Hot Work Procedures to be followed on site as specified below2 Description of the type and frequency of Hot Work required3 Sample Hot Work Permit to be used.

.3 Upon review and confirmation that effective fire safety measures will be implemented during performance of hot work, Departmental Representative will provide authorization to

proceed as follows:

	SPECIAL PROCEDURES ON FIRE	Section 01 35 24
	SAFETY REQUIREMENTS	
Wharf Repairs		
Leading Tickles, NL		Page 3
Project number C2-00087		2021-06-18

- .1 Issue one written "Authorization to Proceed" covering the entire project for duration of work or;
- .2 Separate work, or segregate certain parts of work, into individual entities. Each entity requiring a separately written "Authorization to Proceed" from Departmental Representative. Follow Departmental Representative's directives in this regard.
- .4 Requirement for individual authorization based on:
 - .1 Nature or phasing of work;
 - .2 Risk to Facility operations;
 - .3 Quantity of various trades needing to perform hot work on project or;
 - .4 Other situation deemed necessary by Departmental Representative to ensure fire safety on premises.
- .5 Do not perform any Hot Work until receipt of Departmental Representative's written "Authorization to Proceed" for that portion of work.
- .6 In tenant occupied Facility, coordinate performance of Hot Work with Facility Manager through the Departmental Representative.

 When directed, perform Hot Work only during non-operative hours of Facility. Follow Departmental Representative's directives in this regard.

1.8 HOT WORK PROCEDURES

- .1 Develop and implement safety procedures and work practices to be followed during the performance of Hot Work.
- .2 Procedures to include:
 - .1 Requirement to perform hazard assessment of site and immediate hot work area for each hot work event in accordance with Hazard Assessment and Safety Plan

	SPECIAL PROCEDURES ON FIRE	Section 01 35 24
	SAFETY REQUIREMENTS	
Wharf Repairs

requirements of Section 01 35 29.

- .2 Use of a Hot Work Permit system for each hot work event.
- .3 The step by step process of how to prepare and issue permit.
- .4 Permit shall be issued by Contractor's site Superintendent, or other authorized person designated by Contractor, granting permission to worker or subcontractor to proceed with hot work.
- .5 Provision of a designated person to carryout a Fire Safety Watch for a minimum of 60 minutes immediately upon completion of the hot work.
- .6 Compliance with fire safety codes and standards specified herein and occupational health and safety regulations specified in Section 01 35 29.
- .3 Generic procedures, if used, must be edited and supplemented with pertinent information tailored to reflect specific project conditions. Clearly label as being the Hot Work Procedures applicable to this contract.
- .4 Hot Work Procedures shall clearly establish worker instructions and allocate responsibilities of:
 - .1 Worker(s),
 - .2 Authorized person issuing the Hot Work Permit,
 - .3 Fire Safety Watcher,
 - .4 Subcontractors and Contractor.
- .5 Brief all workers and subcontractors on Hot Work Procedures and Permit system established for project. Stringently enforce compliance.
 - .1 Failure to comply with the established procedures may result in the issuance of a Non-Compliance Notification at Departmental Representative's discretion with possible disciplinary measures imposed as specified in Section 01 35 29.

1.9 HOT WORK PERMIT

- .1 Hot Work Permit to include, as a minimum, the following data:
 - .1 Project name and project number.
 - .2 Building name, address and specific room or area where hot work will be performed.
 - .3 Date when permit issued.
 - .4 Description of hot work type to be performed.
 - .5 Special precautions required, including type of fire extinguisher needed.
 - .6 Name and signature of person authorized to issue the permit.
 - .7 Name of worker (clearly printed) to which the permit is being issued.
 - .8 Time Duration that permit is valid (not to exceed 8 hours). Indicate start time and date, and completion time and date.
 - .9 Worker signature with date and time upon hot work termination.
 - .10 Specified time period requiring safety watch.
 - .11 Name and signature of designated Fire Safety Watcher, complete with time and date when safety watch terminated, certifying that surrounding area was under continual surveillance and inspection during the full watch time period specified in Permit and commenced immediately upon completion of Hot Work.
- .2 Permit to be typewritten form. Industry Standard forms shall only be used if all data specified above is included on form.
- .3 Each Hot Work Permit to be completed in full and signed as follows:
 - .1 Authorized person issuing Permit before hot work commences.
 - .2 Worker upon completion of Hot Work.
 - .3 Fire Safety Watcher upon termination of safety watch.
 - .4 Returned to Contractor's Site Superintendent for safe keeping.

- .2 Submit documentation within 7 calendar days of acceptance of bid. Do not proceed with work until submittal has been reviewed by Departmental Representative.
- .3 Submit above documents in accordance with the submittal requirements specified in Section 01 33 00.
- .4 Resubmit Lockout Procedures with noted revisions as may result from Departmental Representative's review.

1.7 ISOLATION OF EXISTING SERVICES

- .1 Obtain Departmental Representative's written authorization prior to conducting work on an existing active, energized service or facility required as part of the work and before proceeding with lockout of such services or facility.
- .2 To obtain authorization, submit to Departmental Representative the following documentation:
 - .1 Written Request for Isolation of the service or facility and;
 - .2 Copy of Contractor's Lockout Procedures.
- .3 Make a Request for Isolation for each event, unless directed otherwise by Departmental Representative, and as follows:
 - .1 Fill-out standard forms in current use at the Facility when so directed by Departmental Representative or;
 - .2 Where no form exist at Facility, make request in writing identifying:
 - .1 Identification of system or
 equipment to be isolated, including it's
 location;
 - .2 Time duration, indicating Start time and date, and Completion time and date when isolation will be in effect;
 - .3 Voltage of service feed to system or equipment being isolated;

Project number C2-00087			2021-06	-18	

.3

- .4 Name of person making the request. Document to be in typewritten format.
- .4 Do not proceed until receipt of written notification from Departmental Representative granting the Isolation Request and authorization to proceed with the isolation of designated equipment or facility. Departmental Representative may designate other individual at the Facility as the person authorized to grant the Isolation Request.
- .5 Conduct safe, orderly shut down of equipment or facilities, de-energize and isolate power and other sources of energy and lockout items in accordance with requirement of clause 1.8 below.
- .6 Plan and schedule shut down of existing services in consultation with the Departmental Representative and the Facility Manager. Minimize impact and downtime of facility operations.
- .7 Determine in advance, as much as possible, in cooperation with the Departmental Representative, the type and frequency of situations which will require a Request for Isolation. Follow Departmental Representative's directives in this regard.
- .8 Conduct hazard assessment as part of the planning process of isolating existing equipment and facilities. Hazard Assessments to conform with requirements of Health and Safety Section 01 35 29.

1.8 LOCKOUTS

- .1 Isolate and lockout electrical facilities, mechanical equipment and machinery from all potential energy sources prior to starting work on such items.
- .2 Develop and implement lockout procedures to be followed on site as an integral part of

	SPECIAL	PROCEDURES ON	Section	01 3	5 25
	LOCKOUT	REQUIREMENTS			
Wharf Repairs					
Leading Tickles, NL			Page 5

the Work.

- .3 Use energy isolation lockout devices specifically designed and appropriate for type of facility or equipment being locked out.
- .4 Use industry standard lockout tags.
- .5 Provide appropriate safety grounding and guards as required.
- .6 Prepare Lockout Procedures in writing.

 Describe safe work practices, work functions and sequence of activities to be followed on site to safely isolate all potential energy sources and lockout/tagout facilities and equipment.
- .7 Include within procedures a system of worker request and issuance of individual lockout permit by a person, employed by Contractor, designated to be "in-charge" and being responsible for:
 - .1 Controlling issuance of permits or tags to workers.
 - .2 Determining permit duration.
 - .3 Maintaining record of permits and tags issued.
 - .4 Submitting a Request for Isolation to Departmental Representative when required in accordance with Clause 1.7 above.
 - .5 Designating a Safety Watcher, when one is required based on type of work.
 - .6 Ensuring equipment or facility has been properly isolated, providing a Guarantee of Isolation to worker(s) prior to proceeding with work.
 - .7 Collecting and safekeeping lockout tags, returned by workers, as a record of the event.
- .8 Clearly establish, describe and allocate, within procedures, the responsibilities of:
 .1 Workers.

- .2 Designated person controlling issuance of lockout tags/permits.
- .3 Safety Watcher.
- .4 Subcontractors and General Contractor.
- .9 Procedures shall meet the requirements of Codes and Regulations specified in clause 1.5 above.
- .10 Generic procedures, if used, must be edited, supplemented with pertinent information and tailored to reflect specific project conditions. Clearly label as being the procedures applicable to this contract.

 .1 Incorporate site specific rules and procedures established by Facility Manager and in force at site. Obtain such procedures through Departmental Representative.
- .11 Procedures to be in typewritten format.
- .12 Submit copy of Lockout Procedures to
 Departmental Representative, in accordance
 with submittal requirements of clause 1.6
 herein, prior to commencement of work.

1.9 CONFORMANCE

- .1 Ensure that lockout procedures, as established for project on site, are stringently followed. Enforce use and compliance by all workers.
- .2 Brief all persons working on electrical facilities, mechanical and other equipment fed by an energy source on requirements of this section.
- .3 Failure to perform lockouts in accordance with regulatory requirements or follow procedures specified herein may result in the issuance of a Non-Compliance Notification at Departmental Representative's discretion with possible disciplinary measures imposed as specified in Section 01 35 29.

the responsibility and authority to:

- .1 Implement, monitor and enforce daily compliance with health and safety requirements of the Work
- .2 Monitor and enforce Contractor's site-specific Health and Safety Plan.
- .3 Conduct site safety orientation session to persons granted access to Work Site.
- .4 Ensure that persons allowed site access are knowledgeable and trained in health and safety pertinent to their activities at the site or are escorted by a competent person while on the Work Site.
- .5 Stop the Work as deemed necessary for reasons of health and safety.
- .3 Health & Safety Site Representative must:
 - .1 Be qualified and competent person in occupational health and safety.
 - .2 Have site-related working experience specific to activities of the Work.
 - .3 Be on Work Site at all times during execution of the Work.
 - .4 All supervisory personnel assigned to the Work shall also be competent persons.
 - .5 Inspections:
 - .1 Conduct regularly scheduled safety inspections of the Work on a minimum bi-weekly basis. Record deficiencies and remedial action taken.
 - .2 Conduct Formal Inspections on a minimum monthly basis. Use standardized safety inspection forms. Distribute to subcontractors.
 - .3 Follow-up and ensure corrective measures are taken.
 - .6 Cooperate with Facility's Occupational Health and Safety representative should one be designated by

	TH AND SAFETY Section 01 35 29 QUIREMENTS
Wharf Repairs	
Leading Tickles, NL	Page 11

- Departmental Representative.
- .7 Keep inspection reports and supervision related documentation on site.

1.15 TRAINING

- .1 Use only skilled workers on Work Site who are effectively trained in occupational health and safety procedures and practices pertinent to their assigned task.
- .2 Maintain employee records and evidence of training received. Make data available to Departmental Representative upon request.
- .3 When unforeseen or peculiar safety-related hazard, or condition occur during performance of Work, follow procedures in place for Employee's Right to Refuse Work in accordance with Acts and Regulations of Province having jurisdiction and advise Departmental Representative verbally and in writing.

1.16 MINIMUM SITE SAFETY RULES

- .1 Notwithstanding requirement to abide by federal and provincial health and safety regulations; ensure the following minimum safety rules are obeyed by persons granted access to Work Site:
 - .1 Wear appropriate PPE pertinent to the Work or assigned task; minimum being hard hat, safety footwear, safety glasses and hearing protection.
 - .2 Immediately report unsafe condition at site, near-miss accident, injury and damage.
 - .3 Maintain site and storage areas in a tidy condition free of hazards causing injury.
 - .4 Obey warning signs and safety tags.
- .2 Brief persons of disciplinary protocols to be taken for non compliance. Post rules on site.

materials, demolition debris and product packaging and delivery containers into various waste categories in order to maximize recycling abilities of various materials and avoid disposal of debris at landfill site(s) in a "mixed state". Where recycling firms, specializing in recycling of specific materials exist, transport such materials to the recycling facility and avoid disposal at landfill sites.

.6 Communicate with landfill operator prior to commencement of work, to determine what specific construction, demolition and renovation waste materials have been banned from disposal at the landfill and at transfer stations.

1.5 DRAINAGE

- .1 Provide temporary drainage and pumping as necessary to keep excavations and site free from water.
- .2 Do not pump water containing suspended materials into waterways, sewer or drainage systems.
- .3 Control disposal or runoff of water containing suspended materials or other harmful substances in accordance with governing regulations and requirements.
- .4 Pumped water must meet applicable federal, provincial, and municipal standards before it can be discharged to a surface water body. If regulatory guidelines exceedences are noted, the Departmental Representative has the right to issue stop pumping instructions to the Contractor. Contractor will not be compensated for any delays associated with retrofitting equipment to meet guidelines.

	ENVIRONMENTAL PROCEDURES Section 01 35 43	
Wharf Repairs Leading Tickles, NL Project number C2-00087	Page 3 2021-06-18	
•	Provide control devices such as filter fabrics, sediment traps and settling ponds to control drainage and prevent erosion of adjacent lands. Maintain in good order for duration of work.	
1.6 PERMITS	All guidelines and instructions stated on permits must be strictly adhered to. Use a silt/turbidity curtain if required to reduce sedimentation outside the work area during dredging to the approval of DFO.	
1.7 WORK ADJACENT TO WATERWAYS	1 Do not operate construction equipment in waterways.	
.:	2 Do not use waterway beds for borrow material.	
	Do not dump excavated fill, waste material or debris in waterways.	
-	At borrow sites, design and construct temporary crossings to minimize erosion to waterways in strict conformance with provincial and federal environmental regulations.	
_	Do not skid logs or construction materials across waterways.	
	Avoid indicated spawning beds when constructing temporary crossings of waterways.	
	7 Do not blast within 100 m of spawning beds.	
. :	Do not refuel any type of equipment within 100 m of a water body. Maintain equipment in good working condition with no fluid leaks, loose hoses or fittings.	
1.8 POLLUTION	Maintain temporary erosion and pollution control features installed under this	

contract.

	ENVIRONMENTAL PROCEDURES	Section 01 3	5 43
Wharf Repairs			
Leading Tickles, NL		Page 4	
Project number C2-00087		2021-06-18	

- .2 Control emissions from equipment and plant to local authorities emission requirements.
- .3 Prevent sandblasting and other extraneous materials from contaminating air beyond application area, by providing temporary enclosures.
- .4 Cover or wet down dry materials and rubbish to prevent blowing dust and debris. Provide dust control for temporary roads and around entire construction site.
- .5 Maintain inventory of hazardous materials and hazardous waste stored on site. List items by product name, quantity and date when storage began.
- .6 Have emergency spill response equipment and rapid clean-up kit, appropriate to work, at site. Locate adjacent to work and where hazardous materials are stored. Provide personal protective equipment as required for clean-up.
- .7 Report, to Federal and Provincial Department of the Environment, spills of petroleum and other hazardous materials as well as accidents having potential of polluting the environment. Also notify Departmental Representative and submit a written spill report to Departmental Representative within 24 hours of occurrence.
- .8 Provide a floating debris containment boom whenever any of the Contractors methods of work allow for the potential of floating debris.

1.9 WILDLIFE PROTECTION

.1 Should nests of migratory birds in wetlands be encountered during work, immediately notify Departmental Representative for directives to be followed.

	ENVIRONMENTAL	PROCEDURES	Section	01	35	43

1.4 INDEPENDENT INSPECTION AGENCIES

- Departmental Representative may engage and pay for service of Independent Inspection and Testing Agencies for purpose of inspecting and testing portions of Work except for the following which remain part of Contractor's responsibilities:
 - .1 Inspection and testing required by laws, ordinances, rules, regulations or orders of public authorities.
 - .2 Inspection and testing performed exclusively for Contractor's convenience.
 - .3 Testing, adjustment and balancing of conveying systems, mechanical and electrical equipment and systems.
 - .4 Mill tests and certificates of compliance.
 - .5 Tests as specified within various sections designated to be carried out by Contractor under the supervision of Departmental Representative.
 - .6 Additional tests specified in Clause 1.4.2.
- .2 Where tests or inspections by designated Testing Agency reveal work not in accordance with contract requirements, Contractor shall pay costs for additional tests or inspections as Departmental Representative may require to verify acceptability of corrected work.
- .3 Employment of inspection and testing agencies by Departmental Representative does not relax responsibility to perform Work in accordance with Contract Documents.

1.5 ACCESS TO WORK

- .1 Furnish labour and facility to provide access to the work being inspected and tested.
- .2 Co-operate to facilitate such inspections and tests.

PART 1 - GENERAL

FANT I GENERAL		
1.1 SECTION INCLUDES	.1	Barriers.
	.2	Traffic Controls.
1.2 INSTALLATION AND REMOVAL	.1	Provide temporary controls in order to execute work expeditiously.
	.2	Remove from site all such work after use.
1.3 HOARDING	.1	Erect temporary site enclosure using new 1.2 m high snow fence wired to rolled steel "T" bar fence posts spaced at 2.4 m centres. Provide one lockable truck gate. Maintain fence in good repair.
1.4 GUARD RAILS AND BARRICADES	.1	Provide secure, rigid guard rails and barricades around open excavations.
	.2	Provide barricades along wharf structure when wheelguard is removed.
	.3	Provide as required by governing authorities.
1.5 ACCESS TO SITE	.1	Provide and maintain access to adjacent harbour facilities.
1.6 PUBLIC TRAFFIC FLOW	.1	Provide and maintain competent signal flag operators, traffic signals, barricades and flares, lights, or lanterns as required to perform work and protect the public.
1.7 FIRE ROUTES	.1	Maintain access to property including overhead clearances for use by emergency

	AND BOARD	
Wharf Repairs		
Leading Tickles, NL		Page 1
Project number C2-00087		2021-06-18

1.1 DESCRIPTION

- .1 This section specifies requirements for board, lodgings and related services to be provided by the Contractor for the Inspector.
- . 2 It is a requirement of this contract that the Contractor provide and pay for all board and lodgings for the Site Inspector's sole use for the duration of the project. Provide for and maintain acceptable living accommodations on site for the Site Inspector's sole use. The minimum requirement would be a hotel within 5km of the project site, or other arrangement approved by the Departmental Representative. The minimum daily allowance for the site inspector's meals (to be paid for by the contractor), is in accordance with the latest published Treasury Board guidelines for breakfast/lunch/dinner allowances (these can be found on-line at http://www.njccnm.gc.ca/directive/travel-voyage/s-td-dva3-eng.php).

1.2 BOARD AND LODGINGS

- .1 For the purpose of this contract board and lodgings shall include but not necessarily be limited to: sleeping accommodation, meals and dining facilities, washroom facilities, laundry facilities, electrical and heating service, linens and bedding, etc. and any reasonable service as directed by the Departmental Representative.
- .2 Board and lodgings must be approved by the Departmental Representative and Contractor will cooperate in providing all services required to maintain an acceptable standard of living during construction period.

1.1 GENERAL

- .1 Use new material and equipment unless otherwise specified.
- .2 Within 7 days of written request by Departmental Representative, submit following information for any materials and products proposed for supply:
 - .1 name and address of manufacturer;
 - .2 trade name, model and catalogue number;
 - .3 performance, descriptive and test data;
 - .4 manufacturer's installation or application instructions;
 - .5 evidence of arrangements to procure.
 - .6 evidence of manufacturer delivery problems or unforseen delays.
- .3 Provide material and equipment of specified design and quality, performing to published ratings and for which replacement parts are readily available.
- .4 Use products of one manufacturer for equipment or material of same type or classification unless otherwise specified.
- .5 Permanent labels, trademarks and nameplates on products are not acceptable in prominent locations, except where required for operating instructions, or when located in mechanical or electrical rooms.

1.2 PRODUCT QUALITY AND REFERENCED STANDARDS

- .1 Contractor shall be solely responsible for submitting relevant technical data and independent test reports to confirm whether a product or system proposed for use meets contract requirements and specified standards.
- .2 Final decision as to whether a product or system meets contract requirements rest solely with the Departmental Representative in accordance with the General Conditions.

		COMMON PRODUCT REQUIREMENTS	Section 01 61 00
Wharf Repairs Leading Tickles, NL Project number C2-000	87		Page 2 2021-06-18
1.3 ACCEPTABLE MATERIALS AND ALTERNATIVES		Acceptable Materials: We specified include trade or manufacturer's or support the material descriptions one of the names list into the Work.	names or trade marks oplier's name as part tion, select and only
		Alternative Materials: Submission of alternative materials to trade names or manufacturer's names specified must be done during the bidding period following procedures indicated in the Instructions to Bidders.	
	.3	Substitutions: After ac substitution of a special dealt with as a change accordance with the Gene Contract.	fied material will be to the Work in
1.4 MANUFACTURERS INSTRUCTIONS	.1	.1 Unless otherwise specified, comply wit manufacturer's latest printed instruct for materials and installation methods used. Do not rely on labels or enclosu provided with products. Obtain written instructions directly from manufacture	
	.2	Notify Departmental repwriting of any conflict specifications and manuinstructions, so that DRepresentative will desist to be followed.	between these facturers epartmental
1.5 AVAILABILITY	1	Immediately notify Departmental Representative in writing of unforeseen or unanticipated material delivery problems by manufacturer. Provide support documentation as per Clause 1.1.2 above.	
1.6 WORKMANSHIP	1	Ensure quality of work is of highest standard executed by workers experienced and skille in respective duties for which they are

	employed.	
. 2	Remove unsuitable or incompetent workers from	

- .2 Remove unsuitable or incompetent workers from site as stipulated in General Conditions.
- .3 Ensure cooperation of workers in laying out work. Maintain efficient and continuous supervision on site at all times.
- .4 Coordinate work between trades and subcontractors.
- .5 Coordinate placement of openings, sleeves and accessories.

1.7 FASTENINGS - GENERAL

- .1 Provide metal fastenings and accessories in same texture, colour and finish as base metal in which they occur. Prevent electrolytic action between dissimilar metals. Use non-corrosive fasteners, anchors and spacers for securing exterior work and in humid areas.
- .2 Space anchors within limits of load bearing or shear capacity and ensure that they provide positive permanent anchorage. Wood or organic material plugs not acceptable.
- .3 Keep exposed fastenings to minimum, space evenly and lay out neatly.
- .4 Fastenings which cause spalling or cracking of material to which anchorage is made, are not acceptable.
- .5 Do not use explosive actuated fastening devices unless approved by Departmental Representative. See Section 01 35 29 on Health and Safety in this regard.

1.8 FASTENINGS - EQUIPMENT

.1 Use fastenings of standard commercial sizes and patterns with material and finish suitable for service.

	COMMON PRODUCT REQUIREMENTS	Section 01 61 00
Wharf Repairs	~	
Leading Tickles, NL		Page 4
Project number C2-00087		2021-06-18

- .2 Use heavy hexagon heads, semi-finished unless otherwise specified.
- .3 Bolts may not project more than one diameter beyond nuts.
- .4 Use plain type washers on equipment, sheet metal and soft gasket lock type washers where vibrations occur and, use resilient washers with stainless steel.

1.9 STORAGE, HANDLING AND PROTECTION

- .1 Deliver, handle and store materials in manner to prevent deterioration and soiling and in accordance with manufacturer's instructions when applicable.
- .2 Store packaged or bundled materials in original and undamaged condition with manufacturer's seal and labels intact. Do not remove from packaging or bundling until required in Work. Provide additional cover where manufacturer's packaging is insufficient to provide adequate protection.
- .3 Store products subject to damage from weather in weatherproof enclosures.
- .4 Store cementitious products clear of earth or concrete floors, and away from walls.
- .5 Keep sand, when used for grout or mortar materials, clean and dry. Store sand on wooden platforms and cover with waterproof tarpaulins during inclement weather.
- .6 Store sheet materials and lumber on flat, solid supports and keep clear of ground. Slope to shed moisture.
- .7 Store and mix paints in heated and ventilated room. Remove oily rags and other combustible debris from site daily. Take every precaution necessary to prevent spontaneous combustion.

	COMMON PRODUCT REQUIREMENTS	Section	01	61	00
Wharf Repairs	~				
Leading Tickles, NL		Page 5			
Project number C2-00087		2021-06-	-18		

- .8 Immediately remove damaged or rejected materials from site.
- .9 Touch-up damaged factory finished surfaces to Departmental Representative's satisfaction. Use touch-up materials to match original. Do not paint over name plates.

1.10 CONSTRUCTION EQUIPMENT AND PLANT

- .1 On request, prove to the satisfaction of Departmental Representative that the construction equipment and plant are adequate to manufacture, transport, place and finish work to quality and production rates specified. If inadequate, replace or provide additional equipment or plant as directed.
- .2 Maintain construction equipment and plant in good operating order. Prevent oil and other contaminant leaks. Should any contaminant leak onto ground or into the water, take immediate and appropriate measures to contain, cleanup and dispose in an environmentally responsible manner.

	CLEANING	Section 01 74 11
Wharf Repairs		
Leading Tickles, NL		Page 1
Project number C2-00087		2021-06-18

PART 1 - GENERAL

1.1 GENERAL	.1	Conduct cleaning and disposal operations to comply with local ordinances and anti-pollution laws.
	.2	Store volatile waste in covered metal containers, and remove from premises at end of each working day.
	.3	Prevent accumulation of wastes which create hazardous conditions.
	. 4	Provide adequate ventilation during use of volatile or noxious substances.
1.2 MATERIALS	.1	Use only cleaning materials recommended by manufacturer of surface to be cleaned, and as recommended by cleaning material manufacturer.
1.3 CLEANING DURING CONSTRUCTION	.1	Maintain project grounds and public properties in a tidy condition, free from accumulations of waste material and debris. Clean areas on a daily basis.
	. 2	Provide on-site garbage containers for collection of waste materials and debris.
	.3	Remove waste materials and debris from site on a daily basis.
1.4 FINAL CLEANING	1	In preparation for acceptance of the Work perform final cleaning.

.2

.3

Inspect finishes, fitments and equipment.

Broom clean exterior paved and concrete

Ensure specified workmanship and operation.

Project number C2-00087	2021-06-18

installation work.

- Representative for review and approval.

 .1 Make revisions to Plan as directed by Departmental Representative.
- .6 Implement and manage all aspects of Waste Management Workplan for duration of work.
- .7 Revise Plan as work progresses addressing new opportunities for diversion of waste from landfill.

1.3 WASTE AUDIT

- .1 At project start-up, conduct waste audit of:
 .1 Site conditions identifying salvageable
 and non-salvageable items and waste resulting
 from demolition and removal work.
 - .2 Projected waste resulting from product packaging and from material leftover after
- .2 Develop written list. Record type, composition and quantity of various salvageable items and waste anticipated, reasons for waste generation and operational factors which contribute to waste.

1.4 WASTE REDUCTION

- .1 Based on waste audit, develop waste reduction program.
- .2 Structure program to prioritize actions, with waste reduction as first priority, followed by salvage and recycling effort, then disposal as solid waste.
- .3 Identify materials and equipment to be:
 - .1 Protected and turned over to Departmental Representative when indicated.
 - .2 Salvaged by Contractor.
 - .3 Sent to recycling facility.
 - .4 Sent to waste processing/landfill site for their recycling effort.
 - .5 Disposed of in approved landfill site.

	CONSTRUCTION/DEMOLITION WASTE	Section 01	74	21
	MANAGEMENT AND DISPOSAL			
Wharf Repairs				
Leading Tickles, NL		Page 3		
Project number C2-00087		2021-06-18		

- .4 Reduce construction waste during installation work. Undertake practices which will minimize waste and optimize full use of new materials on site, such as:
 - .1 Use of a central cutting area to allow for easy access to off-cuts;
 - .2 Use of off-cuts for blocking and bridging elsewhere.
 - .3 Use of effective and strategically placed facilities on site for storage and staging of left-over or partially cut materials to allow for easy incorporation into work whenever possible avoiding unnecessary waste.
- .5 Develop other strategies and innovative procedures to reduce waste such as minimizing the extent of packaging used for delivery of materials to site, etc.

1.5 MATERIAL SOURCE SEPARATION PROCESS

- .1 Develop and implement material source separation process at commencement of work as part of mobilization and waste management at site.
- .2 Provide on-site facilities to collect, handle and store anticipated quantities of reusable, salvageable and recyclable materials.
 - .1 Use suitable containers for individual collection of items based on intended purpose.
 - .2 Locate to facilitate deposit but without hindering daily operations of existing building tenants.
 - .3 Clearly mark containers and stockpiles as to purpose and use.
- .3 Perform demolition and removal of existing structure components and equipment following a systematic deconstruction process.
 - .1 Separate materials and equipment at source, carefully dismantling, labelling and stockpiling alike items for the following

	CONSTRUCTION/DEMOLITION WASTE	Section 01 74 2	21
	MANAGEMENT AND DISPOSAL		
Wharf Repairs			
Leading Tickles, NL		Page 4	
Project number C2-00087		2021-06-18	

purposes:

. 1 Reinstallation into the work where indicated.

- Salvaging reusable items not needed in project.
- Sending as many items as possible to locally available recycling facility.
- Segregating remaining waste and . 4 debris into various individual waste categories for disposal in a "non-mixed state" as recommended by waste processing/landfill sites.
- . 4 Isolate product packaging and delivery containers from general waste stream. Send to recycling facility or return to supplier/manufacturer.
- Send leftover material resulting from . 5 installation work for recycling whenever possible.
- . 6 Establish methods whereby hazardous and toxic waste materials, and their containers, encountered or used in the course work are properly isolated, stored on site and disposed in accordance with applicable laws and regulations from authorities having jurisdiction.
- . 7 Isolate and store existing materials and equipment identified for re-incorporation into the Work. Protect against damage.

1.6 WORKER TRAINING AND SUPERVISION

- Provide adequate training to workforce, . 1 through meetings and demonstrations, to emphasize purpose and worker responsibilities in carrying out the Waste Management Plan.
- Waste Management Coordinator: designate . 2 full-time person on site, experienced in

	CONSTRUCTION/DEMOLITION WASTE	Section 01 74 21
	MANAGEMENT AND DISPOSAL	
Wharf Repairs		
Leading Tickles, NL		Page 5
Project number C2-00087	7	2021-06-18

waste management and having knowledge of the purpose and content of Waste Management Plan to:

- .1 Oversee and supervise waste management during work.
- .2 Provide instructions and directions to all workers and subcontractors on waste reduction, source separation and disposal practices.
- .3 Post a copy of Plan in a prominent location on site for review by workers.

1.7 CERTIFICATION OF MATERIAL DIVERSION

- .1 Submit to Departmental Representative, copies of certified weigh bills from authorized waste processing sites and receipts from recycling/reuse facilities confirming receipt of building materials and quantity of waste diverted from landfill.
- .2 Submit data at pre-determined project milestones as determined by Departmental Representative.
- .3 Compare actual quantities diverted from landfill with projections made during waste audit.

1.8 DISPOSAL REQUIREMENTS

- .1 Burying or burning of rubbish and waste materials is prohibited.
- .2 Disposal of waste, volatile materials, mineral spirits, oil, paint, paint thinner or unused preservative material into waterways, storm, or sanitary sewers is prohibited.
- .3 Do not dispose of preservative treated wood through incineration.
- .4 Do not dispose of preservative treated wood with other materials destined for recycling or reuse.

	CONSTRUCTION/DEMOLITION WASTE	Section	01	74	21
	MANAGEMENT AND DISPOSAL				
Wharf Repairs					
Leading Tickles, NL		Page 6			
Project number C2-00087		2021-06-	-18		

- .5 Dispose of treated wood, end pieces, wood scraps and sawdust at a sanitary landfill.
- .6 Dispose of waste only at approved waste processing facility or landfill sites approved by authority having jurisdiction.
- .7 Contact the authority having jurisdiction prior to commencement of work, to determine what, if any, demolition and construction waste materials have been banned from disposal in landfills and at transfer stations. Take appropriate action to isolate such banned materials at site of work and dispose in strict accordance with provincial and municipal regulations.
- .8 Transport waste intended for landfill in separated condition, following rules and recommendations of Landfill Operator in support of their effort to divert, recycle and reduce amount of solid waste placed in landfill.
- .9 Collect, bundle and transport salvaged materials to be recycled in separated categories and condition as directed by recycling facility. Ship materials only to approved recycling facilities.

PART 1 - GENERAL

1.1 DESCRIPTION

- .1 This section specifies requirements for demolishing and removing wholly or in part various items designated to be removed or partially removed.
- .2 Demolition and removal will consist of, but not necessarily be limited to demolition of the existing wharf crib infrastructure on the east end of the marginal wharf, in the area noted on the drawings. Also required will be demolition and removal of fenders, ladders, wheelguard, coping, wheelguard blocking, partial deck removal in other areas of the west marginal, finger pier and east marginal infrastructure, as specifically shown on the drawings.

1.2 GENERAL REQUIREMENTS

- .1 A Notice to Shipping is to be issued prior to commencement and upon completion of work.
- .2 During construction, any vessels or barges utilized must be marked in accordance with the provisions of the Canada Shipping Act Collision Regulations.
- .3 Upon completion of the project, a written Notice to Mariners must be issued.

1.3 PROTECTION

- .1 Protect existing objects designated to remain. In event of damage, immediately replace or make repairs to approval of and at no additional cost to Canada.
- .2 Place a floating boom around entire demolition site to prevent loss of any materials. If required by DFO Habitat, place a silt curtain around the work area and maintain throughout the period of construction.

- .2 Contractor shall obtain and pay for all necessary permits and disposal fees for use of an approved waste disposal site.
- .3 Contractor to dispose of all demolished materials at a rovincially approved waste disposal facility. Ensure the disposal site is approved and willing to accommodate any materials, including treated timbers, disposed of from the work.
- .4 Excavated material from below the water to be transported using watertight dump trucks to a provincially approved waste disposal facility.
- .5 Contractor to collect two (2) creosote timber samples from timbers that were located below L.N.T. Contractor to contact BV Labs (formerly Maxxam Analytics) at 49 Elizabeth Avenue, Telephone, 709-754-0203 to determine the sampling requirements. Samples to be tested for treated timber package (cresols, benzo (a) pyrene, PCP), TCLP leachate. Results of sampling to be presented to representatives of the Robin Hood Bay landfill site at the time of disposal. Contractor responsible for costs of sampling and testing.

3.4 RESTORATION

- .1 Upon completion of work, remove debris, trim surfaces and leave work site in clean condition.
- .2 Reinstate areas and existing works outside areas of demolition to conditions that existed prior to commencement of work.

- .3 Form release agent: non-toxic, chemically active release agents containing compounds that react with free lime present in concrete to provide water insoluble soaps, preventing set of film of concrete in contact with form.
- .4 Falsework materials: to CSA-S269.1.
 .1 Materials required to bear grade marks, or be accompanied with certificates, test reports or other proof of conformity.
- .5 Premoulded joint fillers:.1 Bituminous impregnated fibreboard toASTM D1751.
- .6 Bond Breaker:
 .1 Impermeable tube formed of polyvinylchloride, rubber or similar material to the approval of the Departmental Representative. Internal diameter equal to dowels.
- .7 Sealant: to Section 07 92 10 Joint Sealing.

PART 3 - EXECUTION

3.1 FABRICATION AND ERECTION

- .1 Verify lines, levels and centres before proceeding with formwork/falsework and ensure dimensions agree with drawings.
- .2 Obtain Departmental Representative's approval for use of earth forms framing openings not indicated on drawings.
- .3 Hand trim sides and bottoms and remove loose earth from earth forms before placing concrete.
- .4 Fabricate and erect falsework in accordance with CSA S269.1.

	CONCRETE FORMING AND	Section 03 10 00
	ACCESSORIES	
Wharf Repairs		
Leading Tickles, NL		Page 4
Project number C2-00087		2021-06-18

- .5 Fabricate and erect formwork in accordance with CAN/CSA-S269.3 to produce finished concrete conforming to shape, dimensions, locations and levels indicated within tolerances required by CAN/CSA-A23.1.
- .6 Align form joints and make watertight. Keep form joints to minimum.
- .7 Use 25 mm chamfer strips on external corners and/or 25 mm fillets at interior corners, joints, unless specified otherwise.
- .8 Form chases, slots, openings, drips, recesses, expansion and control joints as indicated.
- .9 Build in anchors, sleeves, and other inserts required to accommodate Work specified in other sections. Assure that all anchors and inserts will not protrude beyond surfaces designated to receive applied finishes, including painting.
- .10 Clean formwork in accordance with CAN/CSA-A23.1, before placing concrete.

3.2 REMOVAL AND RESHORING

- .1 Leave formwork in place for following minimum periods of time after placing concrete.
 .1 5 days for slabs, decks and other structural members, or 3 days when replaced immediately with adequate shoring to standard specified for falsework.
- .2 Remove formwork when concrete has reached 75% of its design strength or minimum period noted above, whichever comes later, and replace immediately with adequate reshoring.
- .3 Provide all necessary reshoring of members where early removal of forms may be required

	2 Proportion concrete to compl Alternate 1, Table 2 in CAN/ following requirements: .1 Cement: .1 Type GU Portland C .2 Minimum compressive str at 28 days3 Class of exposure: C1 (penetrability test requireme coulombs within 56 days does be met for this mix design)4 Minimum cement content: concrete5 20 mm nominal size coar .6 Air content 5% to 8%7 Density of air-dry conc of 2240 kg/m³ to 2400 kg/m³8 Slump at time and point 50 mm to 100 mm. 3 When the Contractor wishes t	ement. ength: 35 MPa chloride ion nt of <1,500 not have to 385 kg/m³ of se aggregate. rete in range of discharge o purchase
	concrete from a ready mix co supplier, submit a letter fr supplier certifying the foll .1 That plant and equipmen and all materials to be used concrete comply with the req CAN/CSA-A23.1. .2 That the mix proportion will produce concrete of the quality and yield. Indicate proportions and sources of a	ncrete om the owing: t is certified in the uirements of s selected specified mix ll materials.

.3 That the strengths will comply with the strengths specified herein.

	CAST-IN-PLACE CONCRETE	Section 03 30 00
Wharf Repairs		
Leading Tickles, NL		Page 6
Project number C2-00087		2021-06-18

- . 4 When the Contractor wishes to mix concrete on site, identify the source of aggregates and submit samples of fine and coarse aggregates to a testing laboratory for testing and trial mixes in order to determine a suitable mix design. The testing laboratory, at Contractor's cost, will test the trial mix for slump, air content, density and strength. The results of these tests will be submitted to the Departmental Representative to be reviewed for compliance with the specification. This review must be completed before permission to place concrete is given. The sand, gravel, water and air entraining agent should be mixed prior to the addition of cement and water reducer.
- .5 Weigh aggregates, cement, water and admixture when batching. No alternative methods of measuring will be permitted.
- .6 Do not use calcium chloride.

PART 3 - EXECUTION

3.1 PREPARATION

- .1 Obtain Departmental Representative's approval before placing concrete. Provide 24 hours notice prior to placing of concrete.
- .2 Pumping of concrete is permitted only after approval of equipment and mix.
- .3 Ensure reinforcement and inserts are not disturbed during concrete placement.
- .4 Prior to placing of concrete obtain
 Departmental Representative's approval of
 proposed method for protection of concrete
 during placing and curing in adverse
 weather.

		formwork to maintain line and grades.
3.5 CONTROL JOINTS	.1	Construct control joints in locations shown on drawings or directed by Departmental Representative.
	.2	All joints will be centred over a support. Joints will be made in a perfectly straight line.
	.3	Cut control joint when concrete has hardened.
	. 4	Fill saw cut with joint sealer as specified.
3.6 PLACING CONCRETE	.1	Place and consolidate concrete to CAN/CSA-A23.1.
	. 2	Do not place concrete on or against frozen material.
	.3	Place concrete continuously from joint to joint.
	. 4	Place concrete in a uniform heading, normal to the centreline. Limit rate of placing to that which can be finished before beginning of initial set.
3.7 STRIKE OFF AND CONSOLIDATION	.1	High speed internal poker vibrators shall be used to consolidate the concrete during placing. Final compaction of the surfaces shall be done by beam-type vibratory air screed as approved by Departmental Representative. A surcharge of approximately 65 mm of concrete will be maintained at the screed face during consolidation.

.2 Strikeoff and consolidation must be

	CAST-IN-PLACE CONCRETE	Section 03 30 00
Wharf Repairs		
Leading Tickles, NL		Page 9
Project number C2-00087		2021-06-18

completed before excess water bleeds to the surface.

.3 Ensure that the concrete deck conforms to the elevations and slopes as shown on the drawings so that satisfactory drainage will result.

3.8 FINISHING

- .1 Only ACI certified or other pre-approved concrete finishers are to be utilized in finishing all concrete works. All work is to be finished to CAN/CSA-A23.1, and as specified below.
- .2 The surface will be brought to the specified level by means of darbying or bull floating which will be carried out immediately following screeding and must be completed before any bleed water is present on the surface. Surface tolerance to be 8 mm under a 3 metre straight edge.
- .3 Provide slope as shown on the drawings to permit proper drainage of the concrete deck.
- .4 Finish slabs to elevations indicated on drawings.
- .5 Strike off the surface with a straight edge.
- .6 Hand tamp low slump concrete with jitterbug.
- .7 Darby or bull float the surface to smooth and level the concrete.
- .8 Allow bleed water or sheen to disappear.
- .9 Float the surface by means of power and/or hand float where the concrete has hardened

	CAST-IN-PLACE CONCRET	E Section 03 30 00
Wharf Repairs		
Leading Tickles, NL		Page 10

210,000 11411001 01 0000	enough for a man to	
	enough for a man to leave only slight footprints on the surface.	

- footprints on the surface.
- .10 Do not bring water and fines to the surface by over floating. Where extra floating is required the floating operation shall be repeated after the time interval necessary for any sheen to disappear and for concrete to set further.
- .11 Steel trowel the concrete surfaces by means of power and/or hand trowel. Do not leave any hard, smooth, polished or burnished surface area.
- .12 Do not bring water and fines to the surface by overtrowelling.
- .13 After slight interval necessary for concrete to further harden, repeat the trowelling operation.
- .14 Lightly broom surface with a soft bristle broom obtaining a fine and even textured finish with a non-slip finish. All brush strokes to be parallel across paving.
- .15 The surface shall be true and accurate to a maximum tolerance of 1 mm in 500 mm.

3.9 PROTECTION AND CURING

- Cure to CAN/CSA-A23.1. . 1
- . 2 Cure concrete by protecting it against loss of moisture, rapid temperature change and mechanical injury for at least 7 days after placement. After finishing operations have been completed, the entire surface of the newly placed concrete shall be covered by whatever curing medium is applicable to local conditions and approved by the Departmental Representative. The edges of concrete slabs exposed by removal of forms shall be

protected with continuous curing treatment equal to the method selected for curing the slab and curb surfaces. Cure to CAN/CSA-A23.1. Have the equipment needed for adequate curing at hand and ready to install before actual concrete placement begins.

- .3 When air temperature is at or below 5°C or when there is a probability of its falling to that limit within 24 hours of placing (as forecast by the nearest official meteorological office) cold weather protection as per CAN/CSA-A23.1 will be provided and the following:
 - .1 Housing Protect concrete by a windproof shelter of canvas or other material to allow free circulation of inside air around fresh touch formwork and provide sufficient space for removal of formwork for finishing. Supply approved heating equipment capable of keeping inside air at a constant temperature sufficiently high to maintain concrete at following curing temperatures.
 - .1 For initial 3 days at a temperature of not less than 15°C nor more than 27°C at surface.
 - .2 Maintain concrete at 10°C for an extra 4 days plus the initial 3 days.
 - .3 In addition to the protective housing, the concrete must be cured as outlined in Clause 3.9.2 above.

3.10 TESTING

- .1 Departmental Representative will appoint a concrete testing company to test all work under this section of specification as per CAN/CSA-A23.1.
- .2 Cost of compressive strength tests shall be paid for by the Departmental Representative.

	CAST-IN-PLACE CONCRETE	Section 03 30 00
Wharf Repairs		
Leading Tickles, NL		Page 12
Project number C2-00087		2021-06-18

- .3 Testing company shall issue reports to Departmental Representative on quality of test cylinders.
- .4 Notify Departmental Representative at least 7 days prior to start of placing concrete. Provide for testing purposes an adequate quantity of approved test cylinders.
- .5 At least 1 set of 3 cylinders each shall be taken from 25 m³ or fraction thereof of each day's pour, whichever is less. 1 cylinder shall be tested at 7 days and other 2 tested at 28 days.
- .6 Crate cylinders and deliver to the testing laboratory within 48 hours after casting in accordance with CAN/CSA-A23.1. Contractor will pay for crating and delivery of cylinders to the laboratory.
- .7 If strength tests of test cylinder for any portion of the work falls below the specified compressive strength at 28 days, the Departmental Representative reserves the right to determine the acceptability of the concrete by performing additional field testing as outlined in CAN/CSA-A23.1.
- .8 If concrete does not conform to drawings or specifications, take measures as directed to correct the deficiency. All costs of correctional measures will be at the expense of the Contractor.

1.1 GENERAL

.1 This section covers items common to Sections of Division 26 and 33. This section supplements requirements of Division 01.

1.2 CODES AND STANDARDS

- .1 Do complete installation in accordance with CSA C22.1-2021 except where specified otherwise.
- .2 Do overhead and underground systems in accordance with CSA C22.3 No.1-M1987 except where specified otherwise.
- .3 Abbreviations for electrical terms: to CSA Z85-1983.
- .4 Adhere to DFC Standards, latest editions.
- .5 Adhere to Canadian Electrical Code current edition.

1.3 CARE, OPERATION AND START-UP

.1 Instruct Departmental Representative and operating personnel in the operation, care and maintenance of systems, system equipment and components.

1.4 VOLTAGE RATINGS

- .1 Operating voltages: to CAN3-C235-83.
- .2 Distribution devices and equipment to operate satisfactorily at 60 Hz within normal operating limits established by above standard. Equipment to operate in extreme operating conditions established in above standard without damage to equipment.

1.5 PERMITS, FEES AND INSPECTION

.1 Submit to Electrical Inspection Department and Supply Authority necessary number of drawings and specifications for examination and approval prior to commencement of work.

	mmon W	fork Results - Electrical Section 26 05 01
Wharf Repairs Leading Tickles, NL		Page 2
Project number C2-00	087	2021-07-06
riojece namber ez oo	.2	Pay associated fees.
	.3	Departmental Representative will provide drawings and specifications required by Electrical Inspection Department and Supply Authority at no cost.
	. 4	Notify Departmental Representative of changes required by Electrical Inspection Department prior to making changes.
	.5	Furnish Certificates of Acceptance from Electrical Inspection Department and authorities having jurisdiction on completion of work to Departmental Representative.
1.6 MATERIALS AND EQUIPMENT	.1	Provide materials and equipment in accordance with Division 01.
	. 2	Equipment and material to be CSA certified. Where there is no alternative to supplying equipment which is not CSA certified, obtain special approval from Electrical Inspection Department.
	.3	Factory assembles control panels and component assemblies.
1.7 FINISHES	.1	Shop finish metal enclosure surfaces by application of rust resistant primer inside and outside, and at least two coats of finish enamel.
	.2	Clean and touch up surfaces of shop painted equipment scratched or marred during shipment or installation, to match original paint.
	.3	Clean and prime exposed non-galvanized hangers, racks and fastenings to prevent rusting.
1.8 EQUIPMENT IDENTIFICATION	.1	Identify electrical equipment with nameplates as follows:

Common	Work	Results -	- Electri	cal Secti	on 26	05	01
Wharf Repairs							
Leading Tickles, NL				Page	3		
Project number C2-00087				2021-	-07-06		

.2 Nameplates:

 Lamicoid 3 mm thick plastic engraving sheet, black face, white core, mechanically attached with self tapping screws.

NAMEPLATE SIZES

Size	1	10	х	50 mm	1	line	3 mm high letters
Size	2	12	х	70 mm	1	line	5 mm high letters
Size	3	12	х	70 mm	2	lines	3 mm high letters
Size	4	20	x	90 mm	1	line	8 mm high letters
Size	5	20	x	90 mm	2	lines	5 mm high letters
Size	6	25	x	100 mm	1	line	12 mm high letters
Size	7	25	x	100 mm	2	lines	6 mm high letters

- .3 Wording on nameplates and labels to be approved by Departmental Representative prior to manufacture.
- .4 Allow for average of twenty-five (25) letters per nameplate.
- .5 Identification to be provided in English.

1.9 TESTING, ACCEPTANCE AND GUARANTEE

- .1 The work of this Contractor shall be tested and installed and any devices not operational shall be remedied immediately. Tests required by local authorities shall be the responsibility of the Contractor. When the work is completed, it shall be tested in its entirety, and shall be in good working order before the Certificate of Acceptance shall be issued.
- .2 A written guarantee shall be supplied to Canada by the Contractor covering the prompt making good of any and all defects in material and workmanship for the period of one (1) year from the date of acceptance and the making good of any such defects shall be completely the responsibility of the Contractor.
- .3 The Contractor will be responsible for the supply of sufficient power on a temporary basis to allow testing of all equipment and systems. These will be tested in the presence of the Departmental

1.15 MOUNTING HEIGHTS .1	If mounting height of equipment is not indicated, verify before proceeding with installation.
. 2	Mounting height of equipment is from finished floor to centreline of equipment unless specified or indicated otherwise.
.3	 Install electrical equipment at following heights unless indicated otherwise. 1. Pedestal receptacles as indicated on drawing details. 2. Light fixtures on wooden poles as indicated on drawing details. 3. Light fixtures on jib cranes as indicated on drawing details.
1.16 LOAD BALANCE .1	Measure phase current to panelboards with normal loads, (lighting), operating at time of acceptance. Adjust branch circuit connections as required to obtain best balance of current between phases and record changes.
1.17 FIELD QUALITY .1 CONTROL	All electrical work to be carried out by qualified, licensed electricians or apprentices as per the conditions of the Provincial Act respecting manpower vocational training and qualification. Employees registered in a provincial apprentices program shall be permitted, under the direct supervision of a qualified licensed electrician, to perform specific tasks - the activities permitted shall be determined based on the level of training attained and the demonstration of ability to perform specific duties.
. 2	The work of this division to be carried out by a contractor who holds a valid Master Electrical contractor license as issued by the Province that the work is being constructed.

Conduct and pay for following tests:

Power distribution system including phasing, voltage, grounding and load

- .5 Each shop drawing shall be stamped and signed by the Contractor before submitting, stating that he has checked the drawings against the requirements as called for in the contract documents, and also in the case here the equipment attached to or connects to other equipment, that it has been properly coordinated with this equipment, whether supplied under the Electrical Division or under other Divisions.
- .6 Each shop drawing for non-catalogue items shall be prepared specifically for this project. If brochures are submitted for catalogue items, the brochures shall be marked definitely indicating the item or items to be supplied.
- .7 Work shall not be proceeded until final review of shop drawings are received by the Contractor.
- .8 Shop Drawing Review is for general compliance with contract documents. No responsibility is assumed by the Departmental Representative for correctness of dimensions or details. Corrections or comments made on the shop drawings during the Departmental Representative's review do not relieve the Contractor from compliance with the requirements of the drawings and specifications.

1.19 OPERATION AND MAINTENANCE DATA

- .1 Submit operation and maintenance data in accordance with Division 01.
- .2 Include in manuals information based on following requirements:
 - 1. Operation and maintenance instructions to be sufficiently detailed with respect to design elements, construction features and component function and maintenance requirements, to permit effective

Common	Work	Results	_	Electrical	Section	26	05	01

- startup. Operation, maintenance, repair, modification, extension and expansion of any portion or feature of installation.
- 2. Technical data to be in the form of approved shop drawings, project data, supplemented by bulletins, component illustrations, exploded views technical descriptions of items, and parts lists. Advertising of sales literature will not be accepted.
- 3. Provide wiring and schematic diagrams and performance curves.
- 4. Include names and addresses of local suppliers for all items included in maintenance manuals.
- 5. Material to be in English.

1.20 MATERIAL SPECIFIED

- 1 Where substitutions are to be submitted for materials bearing the clause "or approved equal", approval of the substitute item must be submitted to the Departmental Representative at least TEN DAYS PRIOR to the closing date of the tender. The proposed substitution shall show product name, complete specification and be equal to, or better than the named item. No increase in the tender price shall be made for such a substitution should it be accepted. Accepted equals will be listed in an addendum seven days prior to the Trade closing date.
- .2 Where additional manufacturers are named under Articles entitled "Approved Manufacturers", the choice of which of the manufacturers named in reference to a particular article is to be used, shall be the Contractors.
- .3 Materials or product specified without the clauses "or approved equal" or "approved manufacturers" shall be supplied as specified and no proposed substitution will be considered.

1.1 SCOPE OF WORK AND GROUNDING

- .1 The Electrical Contract includes all electrical work at the site including but not limited to:
 - The removal of existing electrical equipment, devices, wiring, conduit, etc. as indicated on electrical drawings.
 - Supply and installation of new shore power junction boxes, coverplates, receptacles, labels, power pedestals, etc. as indicated.
 - 3. Supply and installation of new conduit and fittings for a complete installation.
 - 4. Removal of existing multi-circuit metering system complete with all associated wiring and conduit.
 - 5. Removal of existing exterior lighting on existing fish plant and supply and installation of new LED fixtures.
 - 6. Contractor to coordinate with
 Department Representative and the
 Harbour Authority the removal of
 existing jib crane from adjacent
 harbour area and the reinstallation
 at this site. Electrical Contractor
 to supply and install all new wiring,
 conduit, etc. as indicated on
 drawings. All work to be coordinated
 on site with General Contractor.
 - 7. Supply and installation of new 400 Amp, 120/240 Volt, single phase panel.
 - 8. Installation of owner supplied light fixtures on wooden poles and jib cranes.
 - 9. Supply and installation of conduits and wiring to power pedestals, jib cranes and light poles as indicated.
 - 10. Other work as indicated on drawings and in this specification.

PART 1 GENERAL (NOT APPLICABLE)

PART 2 PRODUCTS

2.1 SUPPORT CHANNELS

.1 U shape, size 41 x 41 mm, 2.5 mm thick, surface mounted, suspended or set in poured concrete walls and ceilings as required.

PART 3 EXECUTION

3.1 INSTALLATION

- .1 Secure equipment to hollow or solid masonry, tile and plaster surfaces with lead anchors or nylon shields.
- .2 Secure equipment to poured concrete with expandable inserts.
- .3 Support equipment, conduit or cables using clips, spring loaded bolts, cable clamps designed as accessories to basic channel members.
- .4 Fasten exposed conduit or cables to building construction or support system using straps.
 - .1 One-hole steel straps to secure surface conduits and cables 50 mm and smaller.
 - .2 Two-hole steel straps for conduits and cables larger than 50 mm.
 - .3 Strap AC-90 cable at box location plus every 900 mm.
- .5 Suspended support systems.
 - .1 Support individual cable or conduit runs with 6 mm dia threaded rods and spring clips.
 - .2 Support 2 or more cables or conduits on channels supported by 6 mm dia threaded rod hangers where direct fastening to building construction is impractical.

Hangers and Supports for Electrical Systems Section 26 05 29 Wharf Repairs Leading Tickles, NL Page 2 Project number C2-00087 2021-07-06

- .6 For surface mounting of two or more conduits use channels at 1.5 m on centre spacing.
- .7 Provide metal brackets, frames, hangers, clamps and related types of support structures where indicated or as required to support conduit and cable runs.
- .8 Ensure adequate support for raceways and cables dropped vertically to equipment where there is no wall support.
- .9 Do not use wire lashing, wood blocking, plastic strap or perforated strap to support or secure raceways or cables.
- .10 Do not use supports or equipment installed for other trades for conduit or cable support except with permission of other trade and approval of Owner's Representative.
- .11 Install fastenings and supports as required for each type of equipment cables and conduits, and in accordance with manufacturer's installation recommendations.

- .2 Contractor shall present the drawings to the Electrical Inspection Authority for approval and obtain a permit before starting work.
- .3 Notify the Departmental Representative of any changes required before proceeding.

PART 2 - PRODUCTS

2.1 CONDUIT

- .1 Liquid tight flexible conduit to CSA C22.2 No. 56. To be used for final connection to lighting fixtures.
- .2 Rigid PVC conduit: to CSA C22.2 No. 211.2. To be used below grade unless noted otherwise.
- .3 Rigid PVC conduit: to CSA C22.2 No. 211.2 to be used on wooden poles and jib cranes as indicated.

2.2 CONDUIT FASTENINGS

.1 One hole PVC straps to secure surface conduits 50 mm and smaller. Two hole PVC straps for conduits larger than 50 mm.

		, Conduit Fastenings Section 26 05 34 onduit Fittings
Wharf Repairs Leading Tickles, NL	7	Page 2 2021-07-06
Project number C2-00087		2021-07-06
	.2	Beam clamps to secure conduits to exposed steel work.
	.3	Channel type supports for two or more conduits at 1 m oc.
	. 4	Threaded rods, 6 mm dia., to support suspended channels.
2.3 CONDUIT FITTINGS	.1	Fittings for raceways: to CSA C22.2 No. 18-M1987.
	.2	Factory 90° bends are required for 25 mm and larger conduits.
	.3	Fittings manufactured for use with conduit specified, approved for encasement in slab.
2.4 EXPANSION FITTINGS FOR RIGID CONDUIT	.1	Weatherproof expansion fittings with internal bonding jumper suitable for linear expansion and 19mm deflection in all directions as required.
	.2	Watertight expansion fittings with integral bonding jumper suitable for linear expansion and 19mm deflection in all directions as required.
	.3	Weatherproof expansion fittings for linear expansion at entry to panel as required.
2.5 FISH CORD	.1	6mm stranded nylon pull rope tensile strength 5 KN.
PART 3 - EXECUTION		
3.1 INSTALLATION	.1	Install conduit in centre one-third of concrete slab in location as shown for conduits in deak

conduits in deck.

.2 Ensure conduit has a minimum concrete

cover of 35 mm all around except where

Condui	t,	Condi	uit	Fastening	S
and	Cor	nduit	Fit	tings

Page 3 2021-07-06

noted otherwise on drawings.

- .3 Place conduit between mats of steel and secure in position with tye wire.
- .4 Install sleeves where conduits pass through timber.
- .5 Install junction boxes for lighting on sides of poles and jib cranes in locations shown. Secure in place and fill with packing to be removed after concrete is placed.
- .6 Ensure system is intact and clear after concrete is poured. Remove and replace any blocked conduit.
- .7 Install pull rope in empty conduit before pouring concrete.
- .8 Swab conduits when system is complete.
- .9 Dry conduits out before installing wire.
- .10 Install rigid PVC conduit except where noted otherwise on drawings.
- .11 Install surface mounted rigid PVC conduit in fish plant.

	Panelboards Breaker Type	Section 26 24 17
Wharf Repairs		
Leading Tickles, NL		Page 1
Project number C2-0008	7	2021-07-06

- 1.1 SECTION INCLUDES .1 Materials and installation for standard and custom breaker type panelboards.
- 1.2 RELATED SECTIONS .1 Section 01 33 00 Submittal Procedures.
 - .2 Section 26 28 21 Moulded Case Circuit Breakers.
 - .3 Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.
- 1.3 SHOP DRAWINGS .1 Submit shop drawings in accordance with Section 01 33 00 Submittal Procedures.
 - .2 Drawings to include electrical detail of panel, branch breaker type, quantity, ampacity and enclosure dimension.

PART 2 - PRODUCTS

2.1 PANELBOARDS

- .1 Panelboards: to CSA C22.2 No. 29 and product of one manufacturer.
 - 1. Install circuit breakers in panelboards before shipment.
 - 2. In addition to CSA requirements manufacturer's nameplate must show fault current that panel including breakers has been built to withstand.
- .2 250V panelboards: bus and breakers rated for 18,000 A (symmetrical) interrupting capacity or as indicated.
- .3 250 V panelboards shall be complete with bolt-on circuit breakers.

Wharf Repairs	
Leading Tickles, NL	Page 2
Project number C2-00087	2021-07-06

- .4 Sequence phase bussing with odd numbered breakers on left and even on right, with each breaker identified by permanent number identification as to circuit number and phase.
- .5 Panelboards: mains, number of circuits, and number and size of branch circuit breakers as indicated.
- .6 Two keys for each panelboard and key panelboards alike.
- .7 Copper bus with neutral of same ampere rating as mains.
- .8 Mains: suitable for bolt-on breakers.
- .9 Trim with concealed front bolts and hinges.
- .10 Trim and door finish: baked grey enamel.
- .11 Panel to be complete with main breaker as indicated.

2.2 BREAKERS

- .1 Breakers: to Section 26 28 21- Moulded Case Circuit Breakers.
- .2 Breakers with thermal and magnetic tripping in panelboards except as indicated otherwise.

2.3 EQUIPMENT IDENTIFICATION

- .1 Provide equipment identification in accordance with Section 26 05 01 Common Work Results Electrical.
- . 2 Nameplate for each panelboard size indicated. Indicate engraved as on nametaq the supply distribution panelboard.
- .3 Complete circuit directory with typewritten legend showing location and

	Panelboards B	Breaker Type	Section 26 24 17
Wharf Repairs			
Leading Tickles, NL			Page 3
Project number C2-00087			2021-07-06

load of each circuit.

PART 3 - EXECUTION

3.1 INSTALLATION

- .1 Locate panelboards as indicated and mount securely, plumb, true and square, to adjoining surfaces.
- .2 Install surface mounted panelboards in enclosure or as indicated.
- .3 Mount panelboards to height specified in Section 26 05 01 or as indicated.
- .4 Connect loads to circuits.
- .5 Connect neutral conductors to common neutral bus with respective neutral identified.

Wharf Repairs					
Leading Tickles, NL	I				Page 1
Project number C2-0	0087				2021-07-06

1.1 RELATED DOCUMENTS

.1 Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.

1.2 SUMMARY

- .1 Section Includes:
 - 1. Moulded Case Circuit Breakers.

1.3 PRODUCT DATA

- .1 Submit product data in accordance with Section 01 33 00 Submittal Procedures.
- .2 Include time-current characteristic curves for breakers with ampacity of 300 Amp and over with interrupting capacity of 10,000 A symmetrical (rms) and over at system voltage.

PART 2 - PRODUCTS

2.1 BREAKERS GENERAL

- .1 Bolt-on moulded case circuit breaker: quick- make, quick-break type, for manual and automatic operation with temperature compensation for 40°C ambient.
- .2 Common-trip breakers: with single handle for multi-pole applications.
- .3 Magnetic instantaneous trip elements in circuit breakers to operate only when value of current reaches setting. Trip settings on breakers with adjustable trips to range from 3-8 times current rating.
- .4 Circuit breakers with interchangeable trips as indicated.
- .5 Breakers to be GFCI with trip rating as indicated.

	Moulded	Case	Circuit	Breakers	Section 26 28 21
Wharf Repairs					
Leading Tickles, NL					Page 2
Project number C2-0	0087				2021-07-06

.6 Circuit breakers to have minimum of 18,000 A symmetrical rms interrupting capacity rating.

2.2 THERMAL MAGNETIC .1 BREAKERS DESIGN A

Moulded case circuit breaker to operate automatically by means of thermal and magnetic tripping devices to provide inverse time current tripping and instantaneous tripping for short circuit protection.

PART 3 - EXECUTION

3.1 INSTALLATION

.1 Install circuit breakers in new panel as indicated.

6	
	6

- 1.1 RELATED DOCUMENTS .1 Drawings and general provisions of the Contract, including General and Supplementary Conditions and Division 01 Specification Sections, apply to this Section.
- 1.2 RELATED SECTIONS .1 Division 1 Specification Sections.
 - .2 Section 26 05 01 Common Work Results Electrical.
- 1.3 PRODUCT DATA .1 Submit product data in accordance with Division 1 Specification Sections.

PART 2 - PRODUCTS

2.1 DISCONNECT SWITCHES

- .1 Fusible and non-fusible disconnect switch, sized as indicated.
- .2 Provision for padlocking in on-off switch position by three locks.
- .3 Mechanically interlocked door to prevent opening when handle in ON position.
- .4 Fuse holders: relocatable and suitable without adaptors, for type and size of fuse indicated.
- .5 Quick-make, quick-break action.
- .6 ON-OFF switch position indication on switch enclosure cover.
- .7 EEMAC 4X (stainless steel) rated for exterior use and EEMAC 2 rated for interior use.

2.2 EQUIPMENT IDENTIFICATION

.1 Provide equipment identification in accordance with Section 26 05 01 - Common Work Results - Electrical.

	Disconnect	Switches	Fused	and	Non-Fused	Section	26	28	23
Wharf Repairs									
Leading Tickle	es, NL					Page 2			
Project number	c C2-00087					2021-07-	-06		

.2 Indicate name of load controlled on size 4 nameplate.

PART 3 - EXECUTION

3.1 INSTALLATION .1 Install disconnect switches complete with fuses as indicated.

	Commissioning	of	Electrical	Systems	Section	26	80	00
Wharf Repairs								
Leading Tickles,	NL				Page 1			
Project number C2	2-00087				2021-07-	-06		

1.1 SCOPE OF WORK .1

Testing and commissioning are called for throughout the individual specifications. This does relieve this trade from not providing all and commissioning testing necessary to ensure that systems equipment operate as required and that they interface with other systems and equipment as required.

1.2 SECTION INCLUDES

.1

- Commissioning of all building electrical systems and component including:
 - .1 Testing and adjustment.
 - .2 Demonstrations and Training.
 - .3 Instructions of all procedures for Owner's personnel.
 - .4 Updating as-built data.
 - .5 Co-ordination of Operation and Maintenance material.

1.3 RELATED SECTIONS

- .1 Section 01 78 00 Closeout Submittals.
- .2 Section 26 05 01 Common Work Results Electrical.

1.4 REFERENCES

- .1 CSA (Canadian Standards Association).
- .2 Underwriters Laboratories of Canada.

1.5 QUALITY ASSURANCE

- .1 Provide qualified trades persons, certified testing agencies, factory trained and approved by the Commissioning Team Leader.
- .2 Submit the names of all personnel to be used during the Commissioning activities for Owner Approval.

	Commissioning	of	Electrical	Systems	Section	26	80	00
Wharf Repairs								
Leading Tickles,	NL				Page 2			
Project number C2	2-00087				2021-07-	-06		

1.6 COMMISSIONING

- .1 The purpose of the commissioning process is to fully test all electrical components and operating procedures by challenging these systems to realistic operation conditions.
- .2 The Commissioning activities shall be co-ordinated by the General Contractor.
- .3 Commissioning activities for the electrical systems must have available up to date as-built drawing information and accurate Operations and Maintenance Manuals. These documents shall be a major part of this activity.
- .4 Contractor shall be responsible to update all documentation with information and any changes duly noted during the Commissioning exercise.
- .5 Contractor shall arrange for all outside suppliers, equipment manufacturers, test agencies and others as identified in the commissioning sections of this specification. The cost associated with this requirement shall be included as part of the tender price.
- .1 As-built drawings and data books must be available two weeks prior to commissioning for review and use by the consultant and Commissioning Team prior to the start of the commissioning activities.

1.8 PREPARATION

1.7 SUBMITTALS

- .1 Provide test instruments required for all activities as defined in the commissioning documents.
- .2 Verify all systems are in compliance with the requirements of the commissioning documents prior to the precommissioning check out operation.
- .3 Confirm all scheduled activities have

Wharf Repairs Leading Tickles, NL Project number C2-00087

Page 3 2021-07-06

identified personnel available.

. 4 Where systems or equipment do operate as required, make the necessary corrections or modifications, re-test and re-commission.

1.9 SYSTEM DESCRIPTION

- Perform all startup operations, control . 1 adjustment, trouble shooting, servicing and maintenance of each item of equipment as defined in the commissioning documentation.
- . 2 Owner will provide list of personnel to instructions and receive will ordinate their attendance at agreed upon times.
- . 3 Prepare and insert additional data in the operations and maintenance manuals and update as-built drawings when need for additional data becomes apparent during the commissioning exercise.
- Where instruction is specified in the . 4 commissioning manual, instruct personnel all phases of operation and maintenance using operation and maintenance manuals as the basis of instruction.
- Conduct . 5 presentation on Owner's premises. Owner will provide space.

. 1 This trade shall assemble all testing data and commissioning reports submit them to the Owner.

Each form shall bear signature of recorder, and that of supervisor of reporting organizer.

and

. 1 Commissioning activities shall be conducted based on pre-established with all schedule members the

1.10 FINAL REPORT

Commissioning of Electrical Systems Section 26 80 00 Wharf Repairs
Leading Tickles, NL Page 4
Project number C2-00087 2021-07-06

ACTIVITIES

commissioning team.

- .2 Adhering to the established schedule is very important as the co-ordination and scheduling of the participants will be difficult to alter once this is established. Close co-ordination of this schedule is important.
- .3 the event project be In cannot commissioned in the allotted time slot, the contractor shall pay for all costs associated with assembling the Commissioning Team at a later date. Ιf the contractor has not performed his duties to reach commissioning stage as outlined earlier, he will incur all expenses of other trades and the Commissioning Team due to his noncompliance.

PART 2 - PRODUCTS NOT APPLICABLE TO THIS SECTION

PART 3 - EXECUTION NOT APPLICABLE TO THIS SECTION

	TIMBER CRI	IBWORK	Section 31	53 13
Wharf Repairs Leading Tickles, NL			Page 1	
Project number C2-00087			2021-06-18	3

1.1 DESCRIPTION

.1 This section specifies requirements for supply and installation of treated timber and necessary fastenings for fabrication, placing, and ballasting of timber cribwork for the new wharf.

1.2 RELATED SECTIONS

- .1 Section 01 74 21 Construction/Demolition Waste Management and Disposal.
- .2 Section 06 05 73 Wood Treatment.

1.3 MEASUREMENT FOR PAYMENT

- .1 <u>Treated Timber Cribwork</u>: to be measured in cubic metres (m³) of completed work which include excavation, ballast stone, gravel, treated timber, fastenings and all plant, labour, materials and equipment to perform work.
- .2 Measure timber cribwork in cubic metres determined by product. Use following dimensions measured in place:
 - .1 Height: average of measurements taken at each vertical from bottom of lowest timber to top side of uppermost course of timber.
 - .2 Width: average of measurements between outside faces of exterior longitudinal timbers, each width measured on top ties of each row of cross ties.
 - .3 Length: measured horizontally along centre-line of crib between outside faces of exterior cross ties.
- .3 Cribwork below step will be determined by product of following dimensions measured in place:
 - .1 Height: average of measurements taken at each vertical from bottom of lowest timber to top side of uppermost course of timber.

	TIMBER	CRIBWORK	Section	31	53	13
Wharf Repairs						
Leading Tickles, NL			Page 2			
Project number C2-00087			2021-06-	-18		

- .2 Width: average of measurements between outside faces of exterior longitudinal timbers, measured at each crosstie at low water elevations.
- .3 Length: measured horizontally along centre-line of crib and parallel to level water surface between outside faces of exterior cross ties.
- .4 Cribwork above step will be determined by product of following dimensions measured in place:
 - .1 Height: average of measurements taken at each vertical from top of step crib to top of top course of timber.
 - .2 Width: average of measurements between outside faces of exterior longitudinal timbers, each width measured on top tier of each row of crossties.
 - .3 Length: measured horizontally along centre-line of crib and parallel to level water surface between outside faces of exterior cross ties.
- .5 Measurements of the vertical lengths, widths and lengths of cribwork, will be taken in the presence of both the Contractor and the Inspector and will be verified and signed by both parties on the site to avoid any disputes. Departmental Representative will make final approval in this regard, as there will be no overpayment for cribwork not actually installed in the work.

1.4 SAFETY REQUIREMENTS

.1 Worker protection:

.1 Workers must wear gloves, respirators, dust masks, long sleeved clothing, eye protection, protective clothing when handling, drilling, sawing, cutting or sanding preservative treated wood and applying preservative materials.

	TIMBER CRIBWORK	Section 31 53 13
Wharf Repairs Leading Tickles, NL Project number C2-00087		Page 3 2021-06-18

approved to grade lumber by Canadian Lumber Standards Accreditation Board of CSA.

- .2 Species: Douglas Fir, Pacific Coast Hemlock and Eastern Hemlock.
- .3 Grade: No. 1 Structural.
- .4 Grading authority: NLGA.
- .5 Preservative treatment: To CSA 080 for coastal waters and Section 06 05 73.

 Supply timbers in lengths required. Cut and field treat timbers only as may be necessary to suit site conditions.

 Contractor will have on site sufficient lengths and thickness of treated timber to permit leveling of cribs after ballasting operations.
- .6 Miscellaneous steel: Medium structural steel conforming to CSA SpecificationG40.21 "Structural Quality Steels"..1 Hot dip galvanized: to CAN/CSA-G164.
 - Minimum weight of zinc coating as stated in Table 1 of this Standard. Fabricator to adhere to recommendations in Appendix A and B of Standard.
 - .2 Wire nails, spikes, staples: to CSA-B111.
 - .3 Bolts, nuts, washers: to ASTM A307.
 - .4 Drift Bolts: to G40.21 from round stock, button head and diamond or wedge point.
 - .5 Washers:
 - .1 Round Plate Washers: for 19 mm diameter machine bolts, 79 mm diameter by 7.9 mm thick, with hole diameter of 21 mm. Washers to G40.21.
 - .2 Square washers not permitted to be used.
 - .6 All hardware galvanized.

	TIMBER	CRIBWORK	Section	31	53	13
Wharf Repairs						
Leading Tickles, NL			Page 6			
Project number C2-00087			2021-06	-18		

- .7 Ballast for filling cribs to following requirements:
 - .1 Stone, consisting of hard durable particles free from clay lumps, organic material and other deleterious materials.
 - .2 Dry density in place: minimum 2600 kg per cubic metre.
 - .3 Ballast stone to be well graded with maximum sizes not exceeding 400 mm on any side and minimum size of not less than 250 mm on any side.
- .8 Gravel: Evenly graded pit run or crushed stone, maximum size, 50 mm, with not more than 8% passing the 0.075 mm sieve.

PART 3 - EXECUTION

3.1 PREPARATION

- .1 Place cribs after bottom has been approved by Departmental Representative (at elevation shown on drawing) to be suitable for crib placement.
- .2 Contractor to confirm with Departmental Representative that bottom is adequate for cribwork placement.
- .3 Before construction, stockpile sufficient ballast to completely fill cribs. Provide suitable plant and equipment to keep crib in proper position and alignment during sinking operations.
 - .4 Take closely spaced accurate soundings and probings, 1500 mm centre to centre or less, precisely located by template, to determine actual base area of crib.
- .5 Cribs out of alignment or not correctly located to be refloated and replaced in correct position.

	ı	TIMBER CRIBWORK	Section 31 53 13
Wharf Repairs Leading Tickles, NL Project number C2-00087			Page 7 2021-06-18
3.2 CRIB CONSTRUCTION	.1	Construct timber cribwork LNT prior to sinking in fiwork.	
	. 2	Levelling Pieces:	

- .1 Place treated timber levelling pieces beneath bottom timbers to conform to shape of base area.
- .2 Place levelling pieces horizontally.
- .3 Secure succeeding pieces at intersections of bottom timbers and vertical posts, and other levelling pieces with machine bolts.

.3 Bottom timbers:

- .1 Place bottom timbers lengthwise, and crosswise to form bottom three courses of cribs.
- .2 Crosswise bottom timbers to be of one piece.
- .3 Lengthwise bottom timbers to be of one piece.
- .4 Secure three courses of bottom timbers together with machine bolts at every intersection with each other and with vertical posts.

.4 Ballast floor:

- .1 Place ballast floor on pockets on bottom or middle course of bottom timbers.
- .2 Secure each ballast floor timber to bottom timbers with drift bolts securing adjacent ballast floor timbers to same bottom timber.

.5 Longitudinals:

- .1 Longitudinals one length for individual cribs below LNT.
- .2 Longitudinals minimum 6100 mm long above LNT.
- .3 Where cribs are married together, longitudinals of sufficient length to span a minimum of a half a bay of one crib and

	TIMBER (CRIBWORK	Section	31	53	13
Wharf Repairs Leading Tickles, NL			Page 8	1.0		
Project number C2-00087			2021-06-	-18		

one and a half bays of the adjacent crib.

- .4 Butt join exterior and interior longitudinals a minimum distance of 600 mm from crosstie with joint in centre of a 1200 mm long joiner block.
- .5 Secure block to lower timber with drift bolt at centre and secure longitudinals and splice at ends to block with drift bolts.
- .6 Stagger joints in longitudinal timbers. Do not join in same bay or on same vertical post.
- .7 Secure longitudinals to intersection of cross ties with drift bolt and to intersection of vertical posts with machine bolt every third course of longitudinals, along with the top course.
- .8 Countersink machine bolts on exterior face above LNT.
- .6 Cross ties: one length across cribs.

 .1 Secure cross ties to intersection of longitudinals with drift bolt and to intersection of vertical posts with machine bolt every third course of cross tie, along with the top course.

 .2 One row of crossties and verticals may be eliminated from one crib where cribs marry together above +400 mm LNT.
- .7 Vertical posts: one length from bottom of cribwork to top of cribwork. Locate one vertical post at corner of each crib and at intersection of crossties with longitudinals.
- .8 Blocking: install treated timber filler blocking as indicated on drawings.
 .1 Cut blocking exact length to completely fill spaces and such that the total thickness of crossties and longitudinals carrying the bearing weight of the deck be a minimum of 1000 mm if

	TIMBER (CRIBWORK	Section	31 53 13
Wharf Repairs			D 0	
Leading Tickles, NL			Page 9	
Project number C2-00087			2021-06-	18

cribwork ends on a crosstie.

- .2 If cribwork ends on a longitudinal one additional tier of blocking is required.
- .3 Blocking of same size and material as crossties or longitudinals and fastened with 2 drift bolts into timber immediately below it.
- .9 Levelling: treated timber required for levelling of cribwork after ballasting, must be full width continuous over entire length to be levelled.
- .10 Bolt Sizing and Holing:
 - .1 Drift Bolts: length of drift bolts equal to thickness of timbers fastened less 50 mm, unless otherwise specified. Bore holes for drift bolts 2 mm smaller diameter than bolt and for full length of bolt.
 - .2 Machine Bolts: length of machine bolts equal to thickness of timbers fastened plus thickness of washers plus 40 m. Where bolts are countersunk, the length, as noted above, less depth of countersink. Thread machine bolts for 64 mm. Bore holes for machine bolts to same diameter as bolts.

3.3 HANDLING TREATED TIMBER

- .1 Handle treated material without damaging original treatment.
 - .1 Replace treated timber with major damage to original treatment, as instructed by Departmental Representative.
- .2 Field treatment: to CAN/CSA-080. Apply and saturate cuts, minor surface damage, abrasions, and nail and spike holes with preservative.
- .3 Ripping treated timber not permitted without Engineer approval.

bending.

- .3 Handle treated timber with hemp, manila or sisal rope slings or other approved means of support that will not damage surface.
- .4 Do not use sharp pointed tools to handle treated timber. Any timber so handled will be rejected and be replaced at Contractor's expense.

1.7 MEASUREMENT FOR PAYMENT

.1 Structural Timber:

- 1 Treated Dimension Timber: The supply and installation of treated dimension timber on the wharf, for wheelguard, wheelguard blocking and coping will be measured by the cubic metre (m³) of timber secured in place, including all timber, fastenings, plant, material, equipment, labour, wheelguard bolt hole levelling sealant, painting of wheelguard and wheelguard blocking.
- .2 <u>Untreated Dimension Timber</u>: The supply and installation of untreated dimension hardwood timber for hardwood fenders, and ladders as specified will be measured by the cubic metre (m³) of timber secured in place including all timber, fastenings, plant, material, equipment, and labour, ladder rungs, wheelguard hand grips, and painting of complete ladder uprights.
- .2 Payment for all dimension timber will be made on volume calculated from nominal sizes as indicated on drawing and specified, eg. 200 mm x 200 mm.
- .3 Include the supply and installation of treated timber plywood (marine grade) to house the electrical conduit, in the lump sum.

Wharf Repairs		
Leading Tickles, NL		Page 4
Project number C2-00087		2021-06-18

PART 2 - PRODUCTS

2.1 TIMBER MATERIALS

- .1 Timber: Use timber graded and stamped in accordance with applicable grading rules and standards of associations or agencies approved to grade lumber by Canadian Lumber Standards Administration Board of CSA.
- .2 Species
 - .1 Wheelguard, wheelguard blocks and coping: Hemlock or Douglas Fir (CCA or ACA treated).
 - .2 Hardwood fenders and ladder uprights: Birch or Maple (untreated).
- .3 Grade: No. 1 Structural Grade
- .4 Grading Authority: NLGA
- .5 Preservative Treatment: Treat to CSA 080, for coastal waters and Section 06 05 73. Timbers will be treated in the lengths required. Unnecessary field cutting will not be permitted.
- .6 Primer: Alkyd undercoat, exterior oil wood primer, similar to Pittsburgh 6-9.
- .7 Paint: Alkyd/Oil Resin paint similar to Pittsburgh Paints "Safety Yellow" Product ID 7-808. Paint to conform to CAN/CGSB-1.61-2004.

2.2 MISCELLANEOUS STEEL AND FASTENINGS

- .1 Miscellaneous Steel: All steel and fastenings to be CSA G40.21, Grade 300 W, galvanized.
- .2 Nails and Spikes: to CSA B111.
- .3 Machine Bolts and Nuts: to ASTM A307. All machine bolts and nuts to be galvanized.

	STRUCTURAL TIMBER	Section 31 53 16
Wharf Repairs		
Leading Tickles, NL		Page 5
Project number C2-00087		2021-06-18

.4 Drift Bolts: to G40.21 from round stock button head and diamond or wedge point. All drift bolts to be galvanized.

.5 Washers:

- .1 Round Plate Washers: for 16 mm machine bolts will be 76 mm diameter by 6.4 mm thick, for 19 mm machine bolts will be 79 mm diameter by 7.9 mm thick and have a hole diameter of 18 mm and 21 mm diameter respectively. Washers to conform to G40.21. All washers to be galvanized.
- .2 Plain Washers: to CSA B19.1, Class 2. All washers to be galvanized.
- .3 Square washers are not permitted.
- .6 Galvanizing: will conform to CSA G164 "Hot Dip Galvanizing of Irregularly Shaped Articles." Unless otherwise specified, minimum weight of zinc coating will be as stated in Table 1 of this standard. Fabricator is to adhere to recommendations of Appendix A and Appendix B of standard.
- .7 Ladder Rungs and Hand Grips: to CSA G40.21, galvanized.
- .8 Welding in accordance with CSA Standards. The welders will be qualified to the appropriate classification as stated in CSA W47.1 "Certification of Companies for Fusion Welding of Steel Structures." Conform welding to all appropriate requirements and recommendations of CSA Standard W59 "Welded Steel Construction" (metal arc welding).

PART 3 - EXECUTION

3.1 PREPARATION

.1 Install structural timbers to details shown on drawings or as specified.

specified. Holes for drift bolts will be bored 2 mm smaller diameter than size of steel used and for full length of bolts.

- .2 Machine Bolts: Machine bolts used in work will have a length equal to thickness of timbers being fastened plus thickness of washers plus 40 mm. Where bolts are countersunk, the length will be as above less depth of countersinking. Machine bolts will be threaded for 64 mm. Holes will be drilled same diameter as bolt.
- .3 Lag Screws: All lag screws used in the work will have a length equal to thickness of timbers being fastened less 50 mm and depth of countersinking. Holes for lag screws to be drilled same diameter as shank portion of screw and to inside thread diameter for threaded portion of screw and for full length. All lag screws will be countersunk, screwed, not driven in place, and will have one (1) standard washer under the head.
- .4 Countersink lag screws in hardwood fenders and ladders to the extent that the minimum distance from face of timber to head of bolt is 12 mm.
- .5 Bolting of timbers without properly drilled bolt holes will not be accepted.

	GRANULAR	BASE	COURSES	Section	32	11	23
Wharf Repairs							
Leading Tickles, NL				Page 1			
Project number C2-00087				2021-06-	-18		

PART 1 - GENERAL

1.1 DESCRIPTION

.1 This section specifies the requirements for the supplying, producing and placing crushed gravel for quarried stone as a granular base course to lines, grades and typical cross sections indicated, or as directed by Departmental Representative. Include all costs associated with granular base courses in the lump sum.

1.2 REFERENCES

- .1 ASTM C 117-04, Test method for material finer than 0.075 mm sieve in mineral aggregates by washing.
- .2 ASTM C 131-06. Test method for resistance to degradation of small size coarse aggregate by abrasion and impact in the Los Angeles machine.
- .3 ASTM C 136-6, Method for sieve analysis of fine and coarse aggregates, CAN/CGSB-8.2-M88, Sieves testing, woven wire, metric..

1.3 DELIVERY, STORAGE .1 AND HANDLING

Deliver and stockpile aggregates as directed by Departmental Representative.

PART 2 - PRODUCTS

2.1 MATERIALS

.1 Granular base fill (Class "A") will consist of clean, hard, durable crushed gravel or stone, free from shale, clay, friable materials, organic matter and other deleterious substances and graded within the following limits when tested

	GRANULAR	BASE	COURSES	Section	32	11	23

 - .5 CBR: ASSHTO T193-72 Min 100 when compacted to 100% of AASHTO T180-74 Method D.
- .5 Materials from deposits acceptable as to the quality of the particles, but deficient in sizes to provide the

	GRANULAR	BASE	COURSES	Section	32	11	23
Wharf Repairs							
Leading Tickles, NL				Page 4			
Project number C2-00087				2021-06-	-18		

required gradation, may be accepted if the contractor furnishes and satisfactorily incorporates into the product supplementary sizes from other sources to produce the required grading. If the deficiencies occur in Class "A" or Class "B" materials, corrections may be attempted by crushing to a smaller maximum particle size. In that event, the Departmental Representative will furnish special grading limits on the actual maximum particle size.

- . 6 Material shall be considered unsuitable even though particle sizes are within the specified gradation limits if particle shape or any other characteristic precludes satisfactory compaction or fails to provide a roadway suitable for traffic. If, in the opinion of the Departmental Representative, an improved particle shape can be achieved by using a different crushing unit for that proposed by the contractor, then the Contractor shall supply and use a crushing unit of the type directed by the Departmental Representative.
- .7 Class "A" and Class "B" shall be processed by crushing and, when necessary, to eliminate surplus fines passing the 4.76 mm sieve, shall be screened and washed.

PART 3 - EXECUTION

3.1 INSTALLATION

.1 Place granular base after sub-base surface is inspected and approved by Departmental Representative.

	GRANULAR BASE COURSES	Section 32 11 23
Wharf Repairs		
Leading Tickles, NL		Page 5
Project number C2-00087		2021-06-18

.2 Placing:

- .1 Construct granular base to depth and grade in area indicated.
- .2 Ensure no frozen material is placed.
- .3 Place material only on clean unfrozen surface, free from snow and ice.
- The contractor shall place all . 4 granular bases in such a manner as to prevent contamination by other materials and to prevent segregation. If, in the opinion of the Departmental Representative, the methods and techniques used by the Contractor cannot overcome contamination or segregation, then the Departmental Representative may direct a modification in these methods which may require the use of an approved spreader box or other acceptable device.
- .5 All granular bases shall be placed in uniform layers such that the thickness of the compacted layer does not exceed 50 mm.
- .6 Prior to closing down operations for each working day, all granular materials shall be bladed and compacted to the specified density.
- .7 The materials shall be sprayed with water when and as directed by the Departmental Representative, either to aid compaction or reduce dust nuisance or both. When water is added to aid compaction, it shall be applied immediately ahead

	GRANULAR	BASE	COURSES	Section	32	11	23
Wharf Repairs

- of the compacting unit
- .8 Each layer of granular base shall be bladed shaped and compacted as necessary to produce the required profile and cross-section. finished surface shall not deviate at any place on a 3 m straight edge by more than 10mm for Class "A" and Class "B". The upper layer shall be maintained to these tolerances and to the specified density until compaction of the contract. This may require keeping the moisture content at the appropriate value during periods of dry weather in addition to regarding and re-compacting as frequently as may be deemed necessary by the Departmental Representative.
- .3 Shape each layer to smooth contour and compact to specified density before succeeding layer is placed.
- .4 Compaction Equipment:
 - .1 Compaction equipment to be capable of obtaining required material densities.
- .5 Compacting:
 - .1 All Class "A" and Class "B" materials shall be compacted to not less than 100% of the maximum Standard Proctor Dry Density ASTM D698-07el Method D.
 - .2 Compaction operations shall be carried out as closely as possible behind the placing and spreading operation. At the end of each working day, all materials placed shall have been compacted to the
