This Solicitation Amendment 003 is raised to incorporate response(s) to additional question(s) received.

Questions & Answers:

Q9: Where are the cribs and footings located?

A9: There are three (3) cribs located directly on the bow side (inside) of the skirting, underneath the stern of the vessel's hull. One is on the port side, one on the starboard side and one in the center along the keel of the ship. Each crib is supported by ~8" thick concrete pads located below grade. The concrete pads are further supported by ~18" thick strip footings, which are interlaced below the ship. The strip footings run port to starboard, as well as bow to stern supporting other cribs, creating a latticed matrix and do not extend astern beyond the skirting. The strip footings are not known to tie into the cantilever beam or rudder support posts. Due to these structural elements and the heritage nature of the structure, an Excavation Temporary Slope and Shoring Design must be signed and sealed by the Contractor's Qualified Professional, as per Section 02 61 00.03. No soil below any supports or footings is to be removed, and the excavation grade is not to exceed the base of the footings in the vicinity of the footings.

All other terms and conditions remain unchanged.

End of Solicitation Amendment 003.
