Amendment 001 is raised to answer the following questions from the industry:

- Q1. With reference to Annex A, section "8) Optional Requirement"  
In solicitation "31184-211979/A" Canada agreed to accept equipment which does not meet this requirement. Since the price of this option will be evaluated in basis of payment, it is not clear how proposals without this option will be evaluated. Will Canada accept removing this requirement from this solicitation?
- A2. Canada will accept bids without the option and will perform fair assessment of price when evaluating the bid. However, the requirement will not be removed from the solicitations because if available, this option will form part of the capital equipment being purchased. Purchasing the option separately would lead to contract splitting since it is known that such an option if available on the equipment will be purchased sub sequentially.
- Q2. With reference to Annex A, section "3.2) ii. Probe 2"  
In solicitation "31184-211979/A" Canada agreed to accept a probe with 34mm scan coverage area. Is this acceptable for this solicitation?
- A2. Yes.
- Q3. With reference to Annex A, section "3.1.h"  
Does Canada accept an equipment with width of about 36cm?
- A3. No, please see the dimensions at *3. Mandatory Technical Requirements, 3.1 General, h).*
- Q4. With reference to section "6.4.1 Delivery Date"  
The current lead time of the requested system is about 18 weeks ARO. Is this timeframe acceptable?
- A4. No, please see the delivery date details at *6.4.1 Delivery Date.*
- Q5. Could you please confirm if this is for tube inspection or surface inspection? I would need to know the type of material this is to inspect and the wall thickness? If this is for tubes, I would also need to know the diameter, if the tubes are straight or U-bend, if the bundle is in or out of the shell, if they have fins etc?
- A5. It is for generic **surface** inspection, which may have various degree of curvature. As it is for generic applications the material will vary but would include typical materials found in aerospace such as aluminum, steel, Titanium, nickel-base alloy, etc.

**ALL OTHER TERMS AND CONDITIONS OF THE SOLICITATION  
REMAIN THE SAME**
