GENERAL INFORMATION

1.0 PROJECT SUMMARY

The Research Centre maintains a herd of 130 dairy cows for research purposes. The Centre is seeking a private company to raise Holstein replacement heifers on a fee-for-service basis.

The company's mandate is to raise the Centre's heifers starting from the age of approximately twenty-two (22) weeks until eight (8) weeks before the expected calving date.

The breeder herd consists of 100 purebred Holstein dairy cows. No herd increases are expected over the next 5 years.

The estimated replacement rate of the herd is 35% per year. The number of heifers that must enter the herd annually will therefore be around 35 head. The calvings are spread throughout the year.

The estimated length of time to raise a dairy heifer is 22 to 28 months. Consequently, each heifer will have to be boarded at the company's farm for 14 to 21 months.

Therefore, to be able to accommodate the maximum number of heifers at one time, the company's minimum housing capacity must be approximately 70 head (35 heifers per year × 2 years).

5.0 RIGHTS OF CANADA

- 5.1 Canada reserves the right to:
 - 1. Accept any Proposal in whole or in part, without prior negotiation;
 - 2. Reject any or all Proposals received in response to this RFP;
 - 3. Cancel and/or re-issue this RFP at any time;
 - 4. Ask the Bidder to substantiate any claim made in the Proposal;
 - 5. Enter into negotiations with one or more Bidders on any or all aspects of their Proposals;
 - 6. Award one or more Contracts;
 - 7. Retain all Proposals submitted in response to this RFP.

6.0 SUBSTANTIATION OF PROFESSIONAL SERVICES RATES

- 6.1 In Canada's experience, bidders will from time to time propose prices at the time of bidding that they later refuse to honour, on the basis that these prices do not allow them to recover their own costs and/or make a profit. When evaluating the prices for professional services bid, Canada may, but will have no obligation to, require price support for any prices proposed. Examples of price support that Canada would consider satisfactory include:
1. documentation (such as billing records) that shows that the Bidder has recently provided and invoiced another customer (with whom the Bidder deals at arm's length) for services similar to the services that would be provided under a resulting contract, and the fees charged are equal to or less than the price offered to Canada (to protect the privacy of the customer, the Bidder may black out the customer's name and personal information on the invoice submitted to Canada);
 2. a signed contract between the Bidder and an individual qualified (based on the qualifications described in this bid solicitation) to provide services under a resulting contract where the amount payable under that contract by the Bidder to the resource is equal to or less than the price bid;
 3. a signed contract with a subcontractor who will perform the work under any resulting contract, which provides that the required services will be provided at a price that is equal to or less than the price bid; or
 4. details regarding the salary paid to and benefits provided to the individuals employed by the Bidder to provide services, where the amount of compensation, when converted to a per diem or hourly rate (as applicable), is equal to or less than the rate bid for that resource category.

Once Canada requests substantiation of the prices bid, it is the sole responsibility of the Bidder to submit information (either the information described in the examples above, or other information that demonstrates that it will be able to recover its own costs based on the prices it has proposed) that will allow Canada to determine whether it can rely, with confidence, on the Bidder's ability to provide the required services at the prices bid, while, at a minimum, recovering its own costs. Where Canada determines that the information provided by the Bidder does not demonstrate the Bidder's ability to recover its own costs in providing the prices bid, Canada may, at their sole discretion declare the bid non-compliant.

7.0 MANDATORY CLAUSES

- 7.1 Where the words "**must**", "**shall**" or "**will**" appear in this RFP, the clause is to be considered as a mandatory requirement.

Authority. The debriefing may be in writing, by telephone or in person at the discretion of the Contracting Authority.

9.0 CANADIAN INTERNATIONAL TRADE TRIBUNAL

If you have issues or concerns regarding the solicitation, you have the option of raising them with the department or with the Canadian International Trade Tribunal (CITT). The Canadian International Trade Tribunal (CITT) is the bid challenge authority for Canada for the North American Free Trade Agreement (NAFTA), World Trade Organization Agreement on Government Procurement (WTO-AGP), Canada - Chile Free Trade Agreement (CCFTA), Canada - Peru Free Trade Agreement (CPFTA), Canadian Free Trade Agreement and Agreement on Internal Trade (AIT). A potential supplier may file a complaint concerning a procurement action to the CITT, on the grounds that any aspect of the procurement process relating to a requirement covered by these agreements is unfair or discriminatory. You can also obtain more information on the Canadian International Trade Tribunal services available to you on their website at <http://www.citt-tcce.gc.ca/en>.

However, any indication of price modification **shall not reveal the amount of the original or the revised total price**. Price modifications should only include the amount of the increase or decrease of the bid. Any indication of the old or the new total price will get the Proposal discarded automatically.

6.0 CERTIFICATION REQUIREMENTS (Section 3)

In order to be awarded a contract, the certifications attached in **Appendix “E”** will be required. The certifications should be submitted with the proposal. Canada may declare a bid non-responsive if the certifications are not submitted or completed as required. Where Canada intends to reject a proposal pursuant to this paragraph, the Contracting Authority will so inform the Bidder and provide the Bidder with a time frame within which to meet the requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within that time frame period will render the proposal non-responsive.

Compliance with the certifications the Bidder provides to Canada is subject to verification by Canada. The Contracting Authority shall have the right to ask for additional information to verify that the Bidder is compliant with the applicable certifications before and after award of a contract. Any certification made by the Bidder that is determined to be untrue, whether made knowingly or unknowingly, or any failure to comply with the certifications or comply with the request of the Contracting Authority for additional information, will render the bid non-responsive.

4.2 Except for government property specifically provided for in the Contract, the Contractor shall supply everything necessary for the performance of the Work, including all the resources, facilities, labor and supervision, management, services, equipment, materials, drawings, technical data, technical assistance, engineering services, inspection and quality assurance procedures, and planning necessary to perform the Work.

4.3 The Contractor shall:

- (a) Carry out the Work in a diligent and efficient manner;
- (b) Apply as a minimum, such quality assurance tests, inspections and controls consistent with those in general usage in the trade and that are reasonably calculated to ensure the degree of quality required by the Contract; and
- (c) Ensure that the Work:
 - (1) is of proper quality, material and workmanship;
 - (2) Is in full conformity with the Statement of Work; and
 - (3) Meets all other requirements of the Contract.

4.4 Notwithstanding acceptance of the Work or any part thereof, the Contractor warrants that the Work shall be of such quality as to clearly demonstrate that the Contractor has performed the Work in accordance with the undertaking in subsection 4.3.

GC5. Inspection and Acceptance

5.1 The Work will be subject to inspection by Canada. Should any part of the Work whether it be a report, document, good or service not be in accordance with the Contract or not be done to the satisfaction of the Canada, as submitted, Canada will have the right to reject it or require its correction at the sole expense of the Contractor before making payment.

5.2 The Contractor will be in default of the Contract if the Work is rejected by Canada or if he fails to correct the Work within a reasonable delay.

GC6. Amendments and Waivers

6.1 No design change, modification to the Work, or amendment to the Contract shall be binding unless it is incorporated into the Contract by written amendment or design change memorandum executed by the authorized representatives of Canada and of the Contractor.

6.4 The waiver by a Party of a breach of any term or condition of the Contract shall not prevent the enforcement of that term or condition by that Party in the case of a subsequent breach, and shall not be deemed or construed to be a waiver of any subsequent breach.

GC7. Time of the Essence

It is essential that the Work be performed within or at the time stated in the Contract.

GC8. Excusable delay

The notice shall state the cause and circumstances of the delay and indicate the portion of the Work affected by the delay. When requested to do so by the Minister, the Contractor shall deliver a description, in a form satisfactory to the Minister, of work-around plans including alternative sources and any other means that the Contractor will utilize to overcome the delay and Endeavour to prevent any further delay. Upon approval in writing by the Minister of the work-around plans, the Contractor shall implement the work around plans and use all reasonable means to recover any time lost as a result of the excusable delay.

8.3 Unless the Contractor complies with the notice requirements set forth in the Contract, any delay that might have constituted an excusable delay shall be deemed not to be an excusable delay.

8.4 If an excusable delay has continued for thirty (30) days or more, Canada may, by giving notice in writing to the Contractor, terminate the Contract. In such a case, the Parties agree that neither will make any claim against the other for damages, costs, expected profits or any other loss arising out of the termination or the event that contributed to the excusable delay. The Contractor agrees to repay immediately to Canada the portion of any advance payment that is unliquidated at the date of the termination.

8.5 Unless Canada has caused the delay by failing to meet an obligation under the Contract, Canada will not be responsible for any cost incurred by the contractor or any subcontractors or agents as a result of an excusable delay.

8.6 If the Contract is terminated under this section, Canada may require the Contractor to deliver to Canada, in the manner and to the extent directed by Canada, any completed parts of the Work not delivered and accepted before the termination and anything that the Contractor has acquired or produced specifically to perform the Contract. Canada will pay the Contractor:

- (a) The value, of all completed parts of the Work delivered to and accepted by Canada, based on the Contract price, including the proportionate part of the Contractor's profit or fee included in the Contract price; and
- (b) The cost to the Contractor that Canada considers reasonable in respect of anything else delivered to and accepted by Canada.

Appendix B

STATEMENT OF WORK

Custom Raising of Dairy Heifers

PROJECT OBJECTIVE

The Research Centre maintains a herd of 130 dairy cows for research purposes. The Centre is seeking a private company to raise Holstein replacement heifers on a fee-for-service basis.

The company's mandate is to raise the Centre's heifers starting from the age of approximately twenty-two (22) weeks until eight (8) weeks before the expected calving date.

The breeder herd consists of 100 purebred Holstein dairy cows. No herd increases are expected over the next 5 years.

The estimated replacement rate of the herd is 35% per year. The number of heifers that must enter the herd annually will therefore be around 35 head. The calvings are spread throughout the year.

The estimated length of time to raise a dairy heifer is 22 to 28 months. Consequently, each heifer will have to be boarded at the company's farm for 14 to 21 months.

Therefore, to be able to accommodate the maximum number of heifers at one time, the company's minimum housing capacity must be approximately 70 head (35 heifers per year \times 2 years).

PROJECT REQUIREMENTS

The Centre will provide the producer with a projected calving schedule. This calendar will be updated every 3 months.

TRANSPORTATION OF THE HEIFERS

At the beginning of the contract, AAFC will be responsible for transporting heifers that are ready for breeding.

Based on the calving schedule, the producer will be responsible for scheduling an average of one transportation per month. Whenever possible, the parties will make every reasonable effort to synchronize the transportation of young heifers from the Centre to the company with the return transportation of ready-to-calve heifers from the company to the Centre.

Conditions for the transportation of animals shall be in accordance with the standards set forth in :

- The Code of Practice for the Care and Handling of Dairy Cattle produced by the National Farm Animal Care Council. These standards are available at the following address : [https://www.nfacc.ca/codes-of-practice/dairy-cattle/codeof Practice for the Care and Handling of Dairy Cattle \(nfacc.ca\)](https://www.nfacc.ca/codes-of-practice/dairy-cattle/codeof Practice for the Care and Handling of Dairy Cattle (nfacc.ca))

- Health of Animals Regulations: <https://inspection.canada.ca/animal-health/humane-transport/health-of-animals-regulations-part-xii/eng/1582126008181/1582126616914>

- ProAction Standards:
https://www.producteurslaitiers.ca/Media/Files/proaction/Le_transport_des_animaux_et_proAction.pdf

- At the time of transport, only the Centre's animals are allowed on the trailer

The date and time of the transportation must be agreed upon in advance by both parties.

At the beginning and end of the contract, the Centre will be responsible for the transportation of the animals. Arrangements for the date and time of the return delivery will be established between the parties 1 month prior to the end of the contract.

RECEPTION OF THE HEIFERS

Upon arrival at the producer's facilities, particular attention must be paid to the health status of the heifers (monitoring of injuries during transport, monitoring of food intake and water consumption). Health data is recorded in the **Individual Heifer Health Record, which is completed and provided by AAFC when the animals are received by the producer.**

ACCEPTABLE HOUSING CONDITIONS

The producer shall provide and maintain all conditions for the housing and handling of heifers in a manner acceptable to the Centre.

Acceptable conditions for the raising of dairy heifers are based on the most recent version of the CODE OF PRACTICE FOR THE CARE AND HANDLING OF DAIRY CATTLE, published by the National Farm Animal Care Council. This code is available online at <https://www.nfacc.ca/codes-of-practice/dairy-cattle>.

A summary of facility and practice compliance standards is provided on the DECLARATION OF COMPLIANCE FORM.

FEEDING AND GROWTH OF THE HEIFERS

The animals must have access to water at all times. The heifers must be provided with adequate quantity and quality of feed to allow them to follow the growth curve prescribed in the specifications.

The expected growth curve for heifers is presented in the appendix. This growth curve is the one proposed by Lactanet (2014). Under the projected growth curve, it is important to consider weight and height at shoulder and hip in order to maintain an optimal growth curve for the heifers according to their constitution.

The targeted parameters for the growth of the heifers are the following:

Weight at first insemination: 408 kg (minimum age of 12 months)

Weight at first calving: 657 kg

Age at calving: 24 months

The producer must weigh and measure the height at shoulder and hip of each heifer once every 2 months. The producer must compile the weight and height data for all heifers on a cumulative growth spreadsheet.

The producer must aim to obtain measurements that fall between the 50th and 90th percentile values on the **growth chart** for the three parameters measured.

ANIMAL HEALTH

AAFC will contract a veterinary clinic to deliver the preventive medicine program. Between visits, the farmer will be required to follow the recommendations of the attending veterinarian in relation to preventive and curative treatments.

The farmer will be responsible for the cost of medications and treatments administered for curative purposes during or between preventive visits.

Important note: In order to ensure the effectiveness of the vaccination program, the producer must have a vaccination program equivalent or similar to that administered at the Centre.

The producer must record in the heifer's individual health record all treatments and observations made during the heifer's life. This information must be dated. This record will be given to the foreman of the Dairy Centre when the animals are returned.

HEALTH TESTS

The heifers will be tested according to preventive medicine during the boarding period.

All heifers must be tested 1 to 3 weeks prior to the date of return to the Research Centre and must:

- test negative for CAE;
- test negative on blood tests for enzootic bovine leukosis, neospora, BVD, bovine paratuberculosis and Salmonella Dublin;
- receive a negative nasal swab PCR test result for Mycoplasma bovis; and
- have no foot rot and no locomotion problems.

Cows that test positive for any of these diseases must be returned to the Centre or to the auction at the producer's expense. In both cases, transportation will be at the producer's expense.

REPRODUCTION

The Centre will provide the producer with a mating program for heifers 3 months prior to the expected breeding age. The program will specify the age and weight at first breeding and the list of bulls selected for each heifer.

As soon as the heifer begins to show estrus behaviour (heat), these observations should be recorded in the Individual Heifer Health Record. When the recommended age and weight for mating is reached, the producer must inseminate the heifer or have it inseminated.

All heifers must be artificially inseminated. No natural service will be accepted.

All information regarding service must be recorded in the **Individual Heifer Health Record**. The producer must record the following information: date of insemination, heifer number, bull identification, note concerning the act of insemination and estrus of the heifer.

All heifers that have been inseminated and do not show signs of returning to estrus will need to be examined by the veterinarian to establish the pregnancy diagnosis.

Heifers that do not conceive after two services will require a reproductive system examination by the veterinarian (preventive).

Heifers that do not show signs of estrus after 13 months of age will require a reproductive system examination by the veterinarian. Following the veterinarian's diagnosis, the Centre will decide whether to continue raising the heifer or to eliminate it.

MORTALITY OF THE HEIFERS

In the event of heifer mortality, the cause of death must be determined by a veterinarian. In case of doubt, an examination by a pathology laboratory will be required. A death certificate (provided by the Centre) must be completed by the veterinarian and sent to the Dairy Centre foreman as soon as possible after death.

If the heifer's death is the fault of the producer, the producer shall reimburse the Centre for the original value of the heifer and the boarding costs incurred up to the time of death for that heifer.

TRANSPORTATION OF THE HEIFERS

At least 8 weeks before the expected calving date, the heifers shall be transported by the producer from its farm to the Centre. Whenever possible, the parties shall make every reasonable effort to synchronize the return transportation of ready-to-calve heifers from the company to the Centre with the transportation of young heifers from the Centre to the company.

The conditions for the transportation of the animals must comply with the standards set out by the Sherbrooke Research Centre. A SOP will be provided to the producer. The SOP include rules regarding the number of animals that can be transported according to the weight of the animals, the exterior temperature, the type of vehicle, maximum transport times, emergency measures, and vehicle disinfection standards. At the time of transportation, only the Centre's animals are allowed in the trailer.

The date and time of the transportation must be agreed upon in advance by both parties.

INITIAL VALUE OF THE HEIFERS

The initial value of the heifers will be established jointly by the two parties at the signing of the contract. This value will be used as a reference in case of loss or mortality during the boarding period.

OWNERSHIP OF THE HEIFERS

The heifers remain the property of the Centre for the duration of the boarding period with the producer.

IDENTIFICATION OF THE HEIFERS

The Centre must ensure that all heifers are identified and registered with Attestra: <https://attestra.com/en/traceability/livestock/animal-identification/>.

The Centre will provide the producer with a copy of the certificate of registration issued by Holstein Canada.

The producer must ensure that the identifiers are maintained in good condition and replaced as needed.

RESPONSIBILITIES AND COMMITMENTS OF THE DEPARTMENT

The Centre is committed to raising healthy, weaned heifers. The Centre will provide the producer with all relevant information concerning the pedigree and health history of the heifers, as well as all health information.

RESPONSIBILITIES AND COMMITMENTS OF THE PRODUCER

The producer agrees to provide the necessary infrastructure, expertise, labour and money to ensure housing, care, veterinary and medication costs (curative), and transportation of the heifers from the Centre to the breeding farm and back to the Centre (or to auction).

The producer agrees to allow the Centre's personnel access to its farm for the examination of the animals and the rearing conditions. The producer must also allow access to the farm for veterinarians and others required to fulfill the mandate. Farm visits must be scheduled in advance at the convenience of both parties.

SEMEN COSTS

AAFC will provide the breeder with bull semen. The cost of inseminations will be at the breeder's expense

PAYMENT REQUIREMENTS

The producer will be required to provide a detailed inventory of the animals in its care every 2 months. The inventory will consist of **individual heifer growth records** and **Individual Heifer Health Records**. This inventory will serve as proof for payment.

DEVIATION FROM CONTRACT TERMS

If the Centre judges that the development of the heifers does not follow a balanced curve for weight and height, the producer will have to correct the situation (feeding of the heifers, herd management, its facilities, etc.) in order to bring the development of the heifer back into its optimal growth curve.
