

## Questions and Answers:

Question in reference to Q19:

**Q19:** Can you provide the historical data for volume of waste that has been collected?

**A19:** Data for 2019 (a more representative year than 2020) shows that 20 x 205 L drums and 132 x 20 L pails were labpacked, which is equal to 6,740 L.

**Q20:** Are you able to provide the volume split amongst the three locations?

**A20:** The volume indicated in #A19 is for the 303 Main location. Below is the available data for the tier 2 locations.

For the Vancouver lab:

3671 East 1<sup>st</sup> Avenue  
Vancouver, British Columbia  
V5M 1C2

In 2020, they disposed of 180L of waste.

In 2021, so far they disposed of 210L of waste..

For 196 Innovation Drive:

196 Innovation Drive  
Winnipeg, Manitoba  
R3T 6C5

In 2020, they disposed of 485L of waste (they cleaned up some chemicals and so disposed of more than usual).
