## **Amendment 001 is raised for the following:**

**To upload attachment #1:** Appendix B Figures of North South Building

### **Specification Clarifications:**

Health & Safety requirements – under Section 01 35 29.06, part 1.8, insert the following:

All personnel are required to wear personal floatation devices (PFD) when working within 3m / 10' of the open canal. All PFDs must have a label indicating approval by Transport Canada, the Canadian Coast Guard, or the Department of Fisheries and Oceans.

### **Questions and Answers:**

#### **Question 1:**

Referencing the metal siding, specification Section 07 46 19, the specified product has a 30 week delivery lead time after approved shop drawings. The specified product will also require the Owner to purchase the entire coil which will be a premium cost to the Owner due to the small quantity of material required. Would the Owner consider an alternate product based on Vic West Weather XL standard stock colors?

#### **Answer 1:**

Metal cladding material – no specific product / profile is called for; intent is to achieve a reasonable match to the existing buildings in terms of profiles and colour. Standard stock colours may not give a suitable match, depending on chosen manufacturer.

Metal cladding finish system – alternatives for the PVDF finish system according to Section 07 46 19 part 2.3 will be considered as long as they meet the performance and warranty requirements of the same Section.

Roof insulation – we do not recommend use of mechanical fasteners for the roofing insulation due to the presence of a reinforced concrete deck.

Laydown areas – refer to Section 01 10 00, part 1.19 Temporary Barriers, for securing any laydown areas against weather – notably wind, on this project site. At both gate houses, there are concrete pads adjacent to the buildings that can be used as laydown areas.

#### **Question 2:**

Would you kindly provide a photo of the interior of the windows for EB144-220957, Gate Control Building Envelope Upgrades, Canso Canal, in order that we are able to determine pricing to match existing finishes.

#### **Answer 2:**

Please see below:
