Erosion Repairs	Addendum 002	October 21, 2021
Racing River km 641.1		Page 1
Project No. R.122128.002		
Liard River km 780		
Project No. R.117668.001		

The following changes/clarifications in the tender and tender documents are effective immediately. This addendum will form part of the contract documents.

Questions form Bidders and Responses:

Question 1:

Can you please clarify how much (m3) and what type of rip rap is stockpiled on site at Liard river site.

Response 1:

The riprap stockpiled on the south side of the site at Liard River is estimated to be a volume of 540 m³ and is the full quantity of Class 2000 kg riprap required for the work at Liard River. Supply of additional Class 2000 kg riprap is not required. If the actual volume on-site is different than anticipated, the balance will be made up with a change to the Class 500 kg riprap required to fulfill the total riprap quantity required at Liard River.

Question 2:

Are there specific nail and washer size to be used for securing the geotextile on slope?

Response 2:

Pinning the geotextile to the slope under the riprap is not strictly required for this work except as required for securement during riprap installation, or as required by the manufacturer's recommendations. Specific nail or washer sizes are not specified in this contract.
