

Questions 13 RFP ISED 200774

13. As in the RFP specifies that the Contractor will need to primarily conduct the work offsite, it did not specify if it will be required at the workplace later on. Therefore, is a proof of vaccination required with the RFP?

Per the buy and sell site posting on October 6th, <https://buyandsell.gc.ca/notice-to-federal-contractors>, all contractors who access federal sites will be required to attest that any resources sent to a federal worksite will be fully vaccinated. In this case the contractor may work remotely so for the moment this does not apply to this RFP.
