This amendment 001 is being raised to answer some potential bidders questions, as follows:

Question 1

We submitted your dust collector specifications to the factory and they have advised the WX5000 would not meet your spec.

The airflow and static pressure requirements you state on your W355B-228302/A spec will not be met using the Diversitech WX5000.

Answer 1

We believe that the WX5000 will be sufficient but line 2.2.1 in the spec to be removed.

Question 2

What is the application/process?

Answer 2

Used for a roto-belt dual belt sander.

Question 3

Dust type?

Answer 3

Used to process ferrous metals.

Question 4

Hours/week usage?

Answer 4

The shop operates 40 hours a week with the hours of use on this machine varying depending on production demands.

Question 5

What will the wet collector connect to?

Answer 5

The collector will be connected to a roto-belt dual belt sander.

Question 6

What is the outlet port diameter of the machine that the collector will connect to?

Answer 6

Approximately 7"x7.5" rectangular to 8" round.

Question 7

Is there any residual smoke from the process? Or just dust?

Answer 7

There is minimal smoke from the process.

Question 8

We are going to offer an equivalent wet dust collector that meets all features except bag strainer system in Annex "A" line # 2.3. We offer a **sludge conveyor** and a sludge vacuum as well. The Designated manufacturer in this tender uses an internal venturi system which requires much higher horse power and will clog and fail over time. Our model scrub occurs above the water line and does not clog or lose performance. Please confirm will it be acceptable?

Answer 8

Unfortunately with our available space in the shop, the additional width will not work for us.

Question 9

In reference to Annex "A" line #2.1.1 and #2.1.2 our machine width will be 72" and Length will be 63" (with note overhang of inlet plenum and sludge conveyor gooseneck will be 141.50"). Could you please clarify will it be acceptable?

Answer 9

Unfortunately with our available space in the shop, the additional width will not work for us.
