FIGURE NOTE

Content presented in this figure may display details that differ from figures included in the Faro Mine Remediation Project Proposal. Any such differences are likely a result of advancing engineering beyond conceptual design. Advancement of designs are expected to result in further positive changes on the receiving environment and should not fundamentally alter the conclusions of the assessment under YESAA.

FARO MINE

Faro Mine Remediation Plan

Mine Buildings and Infrastructure

Date:	May 2019	Approved:	SDM
Figure:			3-8

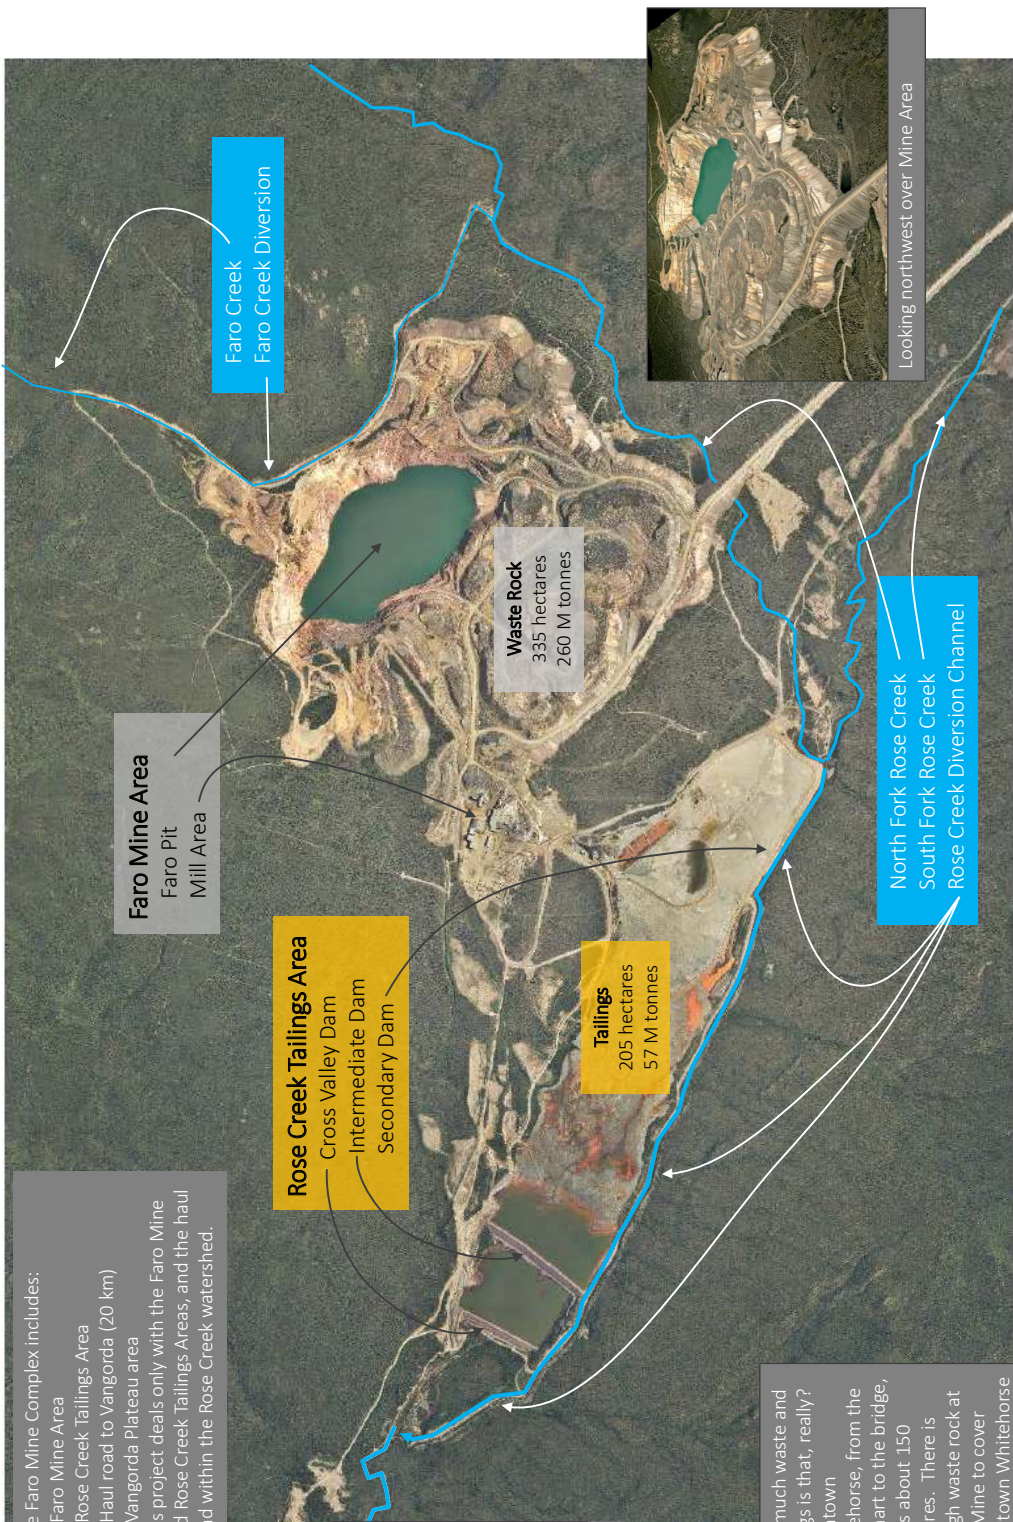

The Faro Mine Complex includes:
 Faro Mine Area
 Rose Creek Tailings Area
 Haul road to Vangorda (20 km)
 Vangorda Plateau area
 This project deals only with the Faro Mine and Rose Creek Tailings Areas, and the haul road within the Rose Creek watershed.

Looking southeast over Tailings Area

How much waste and tailings is that, really? Whitehorse, from the Walmart to the bridge, covers about 150 hectares. There is enough waste rock at Faro Mine to cover downtown Whitehorse 90 m deep, and enough tailings to add another 30 m!

Notes:
 Coordinate System: NAD 1983 CSRS UTM Zone 8N
 Basemap Image: Aerial photography acquired by Peregrine Aerial Surveyors Inc. and Eagle Mapping in August 2012.
