TABLE OF CONTENTS

PART 1 – SOLICITATION AMENDMENT 011 2

1.1 SOLICITATION AMD. 0112

PART 1 – SOLICITATION AMENDMENT 011

1.1 Solicitation Amd. 011

Solicitation Amendment 011 is raised to address the following:

➤ **Question #1:**

In reference to Annex "A", Specifications, line item 7: The Tensile grade of our offer is 1960 n/mm2. Is it acceptable ?

Answer:

No 1960 n/mm2 will not be acceptable. The specification states, tensile grade 1570/1770 n/MM2.

➤ **Question #2:**

We think, that the published Question/Comment exchange may require additional clarifications on what "requirement" and its tolerance that exchange was about.

Answer:

Understood, Thank you. The **Question/Comment (Q/C)** exchange was seeking clarification on the wire rope diameter specification. The Question/Comment exchange has been updated:

Q: The tolerance Canada has set as a requirement is not commercially available.

A: Canada has researched and a wire rope meeting our specification of 25.4mm (1.0") diameter +/- 1.5% is commercially available.

C: Standards widely adopted in Canada such as ASTM and RRW410 have a tolerance of -0, +5%.

A: Canada has requested a tighter standard, on the wire rope diameter.

C: We believe Canada will not be able to obtain an independent third party verification on the wire rope to a tolerance of -0, +1.5%. In short, Canada will not receive wire rope of a tolerance of -0, +1.5%.

A: Canada does not agree.

Q: Will Canada reject wire rope that does not meet the tolerance of -0, +1.5%?

A: Yes. Canada's specification for wire rope diameter is 25.4mm (1.0") diameter +/- 1.5%.

Q: Will Canada accept delivered wire rope not meeting tolerance even if the below specification wire rope is essential at the time of delivery?

A: No. The supplied sample, as requested in the specification, will be measured as well as the wire on the spool for compliance with specification.

Q: Could you let us know what thickness of galvanizing (Zinc) you are looking for?

A: The thickness of the galvanized coating should be Class B per ASTM A603/A586/A475 or the equivalent classification under the EN 10264 standard.
