

Annexe 1 – Étendue de l'équipement des groupes de propulsion J85				
Cet onglet contient une liste de tous les codes de l'autorité technique (CAT) que l'entrepreneur sera chargé de gérer.				
Définitions				
<b>CAT</b> : Un code attribué à chaque code de stock par le SCGC pour identifier le gestionnaire du cycle de vie qui est chargé de gérer les articles au nom de l'ARC. L'entrepreneur sera chargé de gérer ces CAT.				
<b>Code de stock</b> : Un numéro attribué à des numéros de pièces similaires par le SCGC en conjonction avec le système de catalogage de l'OTAN. <b>REMARQUE</b> : Un code de stock comprend les neuf derniers chiffres du code de stock de l'OTAN et peut se voir attribuer plusieurs numéros de pièces.				
<b>Pris en considération ou réparable</b> : Articles de grande valeur ou réparables qui doivent être échangés un pour un au point d'approvisionnement de première ligne.				
<b>Consommable</b> : Articles de faible valeur ou non réparables. Ces articles ne nécessitent pas un échange un pour un au point d'approvisionnement de première ligne et sont éliminés directement par le technicien.				
<b>REMARQUE</b> : La disponibilité de ce matériel est requise au point d'approvisionnement de première

Annexe 1 – Étendue de l’équipement des groupes de propulsion J85			
Cette liste contient tous les codes d’unité de travail que l’entrepreneur sera chargé de gérer. L’entrepreneur se verra également assigner les activités de GCVM pour cet équipement.			
Source des données : CUT – Référence – C-12-114-000/NE-000 – CODES D’ÉQUIPEMENT D’AÉRONEF ET EXIGENCES EN MATIÈRE D’INSPECTION			
Définitions			
CUT : Un code utilisé dans l’ARC pour gérer et suivre l’entretien des éléments qui ont des besoins significatifs de maintenance. REMARQUE : Un CUT peut avoir plusieurs numéros de pièces et codes de stock.			
EPPL : Les ensembles principaux Première ligne sont des articles de grande valeur qui peuvent être remplacés au premier niveau de la maintenance et devront être disponibles aux points d’approvisionnement de première ligne.			
URPL : Les unités remplaçables de première ligne sont des articles qui peuvent être remplacés au premier niveau de la maintenance et devront être disponibles aux points d’approvisionnement de première ligne.

Cettable liste contient tous les codes d’unité de travail que l’entrepreneur sera chargé de gérer. L’entrepreneur se verra également assigner les activités de GCVM pour cet équipement.			
Source des données : CUT – Référence – C-12-114-000/NE-000 – CODES D’ÉQUIPEMENT D’AÉRONEF ET EXIGENCES EN MATIÈRE D’INSPECTION			
Définitions			
CUT : Un code utilisé dans l’ARC pour gérer et suivre l’entretien des éléments qui ont des besoins significatifs de maintenance. REMARQUE : Un CUT peut avoir plusieurs numéros de pièces et codes de stock.			
EPPL : Les ensembles principaux Première ligne sont des articles de grande valeur qui peuvent être remplacés au premier niveau de la maintenance et devront être disponibles aux points d’approvisionnement de première ligne.			
URPL : Les unités remplaçables de première ligne sont des articles qui peuvent être remplacés au premier niveau de la maintenance et devront être disponibles aux points d’approvisionnement de première ligne.
