This Amendment 006 is raised to address a question.

Q1. The cost of flying a concrete tester to site for every concrete pour adds a very significant amount of cost to this project. Will CCG accept cylinders cast by the contractor and brought back to the tester for each pour? This will drastically reduce costs.

The cylinders would be brought back at the end of each crew shift to further reduce costs. Please also reconsider the testing specifications also for slump, air, etc.

A1. *CCG will accept concrete cylinders cast by the Contractor provided that any person who will be doing the cylinders is certified as an ACI (American Concrete Institute) Concrete Field Testing Technician – Grade I. Proof of certification is to be provided in the Construction Plan. Timing for transportation of cylinders from site to the lab will be discussed in the contract phase. The other specified concrete field tests and documentation can also be done by this same person in lieu of an independent agency.*

Lab tests are to be completed by an independent third party as specified.

All other terms and conditions remain unchanged.
