**This amendment # 002 has been raised to address the following questions:**

**The following questions were submitted for clarification purposes.**

**1. Question:**

addendum #1 issued for this project with a question regarding the 5001 series RoofBarrier product which we supply. Someone had requested that it be approved for use on the above noted project and the request was rejected due to lack of space on the roof.

As the manufacturer we can adjust the layout and configuration of the posts/baseplates to ensure there is enough room available. I have studied the tender drawings and

We will provide shop drawings etc. and work our design to suit your needs on site.

The benefits of a non-penetrating system:

- Approx. half or less than half the cost of the fixed system
- Can be installed in less than half the time
- No risk of roof leaks or damage in the future

Would you be open to reconsidering if we could show you the time savings, cost savings, and ability to provide space on the roof?

**Answer:**

The proposed method does not follow the contract specs and drawings, therefore PSPC does not accept the proposed solution

**All other terms and conditions of the solicitation remain unchanged.**

**End of Amendment**
